OMAN

INTRODUCTION

Background: The inhabitants of the area of Oman have long prospered on Indian Ocean trade. In the late 18th century, a newly established sultanate in Muscat signed the first in a series of friendship treaties with Britain. Over time, Oman's dependence on British political and military advisors increased, but it never became a British colony. In 1970, QABOOS bin Said Al-Said overthrew his father, and he has since ruled as sultan. His extensive modernization program has opened the country to the outside world while preserving the longstanding close ties with the UK. Oman's moderate, independent foreign policy has sought to maintain good relations with all Middle Eastern countries. Inspired by the popular uprisings that swept the Middle East and North Africa beginning in January 2011, Omanis began staging marches and demonstrations to demand economic benefits, an end to corruption, and greater political rights. In response to protester demands, QABOOS in 2011 pledged to implement economic and political reforms, such as granting legislative and regulatory powers to the Majlis al-Shura and introducing unemployment benefits. In August 2012, the Sultan announced a royal directive mandating the speedy implementation of a national job creation plan for thousands of public and private sector jobs. As part of the government's efforts to decentralize authority and allow greater citizen participation in local governance, Oman successfully conducted its first municipal council elections in December 2012. Announced by the Sultan in 2011, the municipal councils will have the power to advise the Royal Court on the needs of local districts across Oman's 11 governorates.

ECONOMY

Economy—overview: Oman is a middle-income economy that is heavily dependent on dwindling oil resources. Because of declining reserves and a rapidly growing labor force, Muscat has actively pursued a development plan that focuses on diversification, industrialization, and privatization, with the objective of reducing the oil sector's contribution to GDP to 9% by 2020 and creating more jobs to employ the rising numbers of Omanis entering the workforce. Tourism and gas-based industries are key components of the government's diversification strategy. However, increases in social welfare benefits, particularly since the Arab Spring, will challenge the government's ability to effectively balance its budget if oil revenues decline. By using enhanced oil recovery techniques, Oman succeeded in increasing oil production, giving the country more time to diversify, and the increase in global oil prices through 2011 provided the government greater financial resources to invest in non-oil sectors. In 2012, continued surpluses resulting from sustained high oil prices and increased enhanced oil recovery allowed the government to maintain growth in social subsidies and public sector job creation. However, the Sultan made widely reported statements indicating this would not be sustainable, and called for expanded efforts to support SME development and entrepreneurship. Government agencies and large oligarchic group companies heeded his call, announcing new initiatives to spin off non-essential functions to entrepreneurs, incubate new businesses, train and mentor up and coming business people, and provide financing for start-ups. In response to fast growth in household indebtedness, the Central Bank reduced the ceiling on personal interest loans from 8 to 7%, lowered mortgage rates, capped the percentage of consumer loans at 50% of borrower's salaries for personal loans and 60% for housing loans, and limited maximum repayment terms to 10 and 25 years respectively. In 2012 the Central Bank also issued final regulations governing Islamic banking and two full-fledged Islamic banks held oversubscribed IPOs while four traditional banks opened sharia-compliant Islamic windows.

PACIFIC OCEAN

INTRODUCTION

Background: The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean). Strategically important access waterways include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Pacific Ocean south of 60 degrees south.

GEOGRAPHY

Location: body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates: 0 00 N, 160 00 W

Map references: Physical Map of the World

Area: total: 155,557 million sq km

note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Gulf of Tonkin, Philippine Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Area—comparative: about 15 times the size of the US; covers about 28% of the global surface; almost equal to the total land area of the world

Coastline: 135,663 km

Climate: planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by

seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal—a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain: surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation extremes: lowest point: Challenger Deep in the Mariana Trench-10,924 m highest point: sea level 0 m

Natural resources: oil and gas fields, polymetallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards: surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the "Pacific Ring of Fire"; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment—current issues: endangered marine species include the dugong, sea lion, sea

otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea

Geography—note: the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

ECONOMY

Economy—overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of the US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has led to fluctuations in new drillings.

TRANSPORTATION

Ports and terminals: Bangkok (Thailand), Hong Kong (China), Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Transportation—note: the Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state); the International Maritime Bureau reports the territorial waters of littoral states and offshore waters in the South China Sea as high risk for piracy and armed robbery against ships; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crew and passengers are often held for ransom, murdered, or cast adrift

TRANSNATIONAL ISSUES

Disputes—international: some maritime disputes (see littoral states)

PAKISTAN

INTRODUCTION

Background: The Indus Valley civilization, one of the oldest in the world and dating back at least 5,000 years, spread over much of what is presently Pakistan. During the second millennium B.C., remnants of this culture fused with the migrating Indo-Aryan peoples. The area underwent successive invasions in subsequent centuries from the Persians, Greeks, Scythians, Arabs (who brought Islam), Afghans, and Turks. The Mughal Empire flourished in the 16th and 17th centuries; the

British came to dominate the region in the 18th century. The separation in 1947 of British India into the Muslim state of Pakistan (with West and East sections) and largely Hindu India was never satisfactorily resolved, and India and Pakistan fought two wars—in 1947-48 and 1965—over the disputed Kashmir territory. A third war between these countries in 1971—in which India capitalized on Islamabad's marginalization of Bengalis in Pakistani politics—resulted in East Pakistan becoming the separate nation of Bangladesh. In response to Indian nuclear weapons testing,

Pakistan conducted its own tests in 1998. India-Pakistan relations have been rocky since the November 2008 Mumbai attacks, but both countries are taking small steps to put relations back on track. In February 2008, Pakistan held parliamentary elections and in September 2008, after the resignation of former President MUSHARRAF, elected Asif Ali ZARDARI to the presidency. Pakistani government and military leaders are struggling to control domestic insurgents, many of whom are located in the tribal areas adjacent to the border with Afghanistan. In January 2012,

Pakistan assumed a nonpermanent seat on the UN Security Council for the 2012-13 term.

ECONOMY

Economy—overview: Decades of internal political disputes and low levels of foreign investment have led to slow growth and underdevelopment in Pakistan. Agriculture accounts for more than one-fifth of output and two-fifths of employment. Textiles account for most of Pakistan's export earnings, and Pakistan's failure to expand a viable export base for other manufactures has left the country vulnerable to shifts in world demand. Official unemployment is under 6%, but this fails to capture the true picture, because much of the economy is informal and underemployment remains high. Over the past few years, low growth and high inflation, led by a spurt in food prices, have increased the amount of poverty—the UN Human Development Report estimated poverty in 2011 at almost 50% of the population. Inflation has worsened the situation, climbing from 7.7% in 2007 to almost 12% for 2011, before declining to 10% in 2012. As a result of political and economic instability, the Pakistani rupee has depreciated more than 40% since 2007. The government agreed to an International Monetary Fund Standby Arrangement in November 2008 in response to a balance of payments crisis. Although the economy has stabilized since the crisis, it has failed to recover. Foreign investment has not returned, due to investor concerns related to governance, energy, security, and a slow-down in the global economy. Remittances from overseas workers, averaging about \$1 billion a month since

March 2011, remain a bright spot for Pakistan. However, after a small current account surplus in fiscal year 2011 (July 2010/June 2011), Pakistan's current account turned to deficit in fiscal year 2012, spurred by higher prices for imported oil and lower prices for exported cotton. Pakistan remains stuck in a low-income, low-growth trap, with growth averaging about 3% per year from 2008 to 2012. Pakistan must address long-standing issues related to government revenues and energy production in order to spur the amount of economic growth that will be necessary to employ its growing and rapidly urbanizing population, more than half of which is under 22. Other long term challenges include expanding investment in education and healthcare, adapting to the effects of climate change and natural disasters, and reducing dependence on foreign donors.

TRANSNATIONAL ISSUES

Disputes—international: various talks and confidence-building measures cautiously have begun to defuse tensions over Kashmir, particularly since the October 2005 earthquake in the region; Kashmir nevertheless remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); UN Military Observer Group in India and Pakistan has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; India and Pakistan have maintained their 2004 cease-fire in Kashmir and initiated discussions on defusing the armed standoff in the Siachen glacier region; Pakistan protests India's fencing the highly militarized Line of Control and construction of the Baglihar Dam on the Chenab River in Jammu and Kashmir, which is part of the larger dispute on water sharing of the Indus River and its tributaries; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show the Junagadh claim in India's Gujarat State; by 2005, Pakistan, with UN assistance, repatriated 2.3 million Afghan refugees leaving slightly more than a million, many of whom remain at their own choosing; Pakistan has sent troops across and built fences along some remote tribal areas of its treaty-defined Durand Line border with Afghanistan, which serve as bases for foreign terrorists and other illegal activities; Afghan, Coalition, and Pakistan military meet periodically to clarify the alignment of the boundary on the ground and on maps

Refugees and internally displaced persons:

refugees (country of origin): 2.9 million (1.9 million registered, 1 million undocumented) (Afghanistan) (2013)

IDPs: 758,000 (primarily includes IDPs who remain displaced by conflict in the Federally Administered Tribal Areas (FATA) and Khyber-Paktunkwa Province that peaked in 2009) (2013)

Illicit drugs: significant transit area for Afghan drugs, including heroin, opium, morphine, and hashish, bound for Iran, Western markets, the Gulf States, Africa, and Asia; financial crimes related to drug trafficking, terrorism, corruption, and smuggling remain problems; opium poppy cultivation estimated to be 2,300 hectares in 2007 with 600 of those hectares eradicated; federal and provincial authorities continue to conduct anti-poppy campaigns that utilizes forced eradication, fines, and arrests

PALAU

INTRODUCTION

Background: After three decades as part of the UN Trust Territory of the Pacific under US administration, this westernmost cluster of the Caroline Islands opted for independence in 1978 rather than join the Federated States of Micronesia. A Compact of Free Association with the US was approved in 1986 but not ratified until 1993. It entered into force the following year when the islands gained independence.

ECONOMY

Economy—overview: The economy consists of tourism and other services such as trade, subsistence agriculture, and fishing. Government is a major employer of the work force relying on financial assistance from the US under the Compact of Free Association (Compact) with the US. The Compact took effect, after the end of the UN trusteeship on 1 October 1994. The US provided Palau with roughly \$700 million in aid for the first 15 years following commencement of the Compact in 1994 in return for unrestricted access to its land and waterways for strategic purposes. Business and leisure tourist arrivals numbered over 109,000 in 2011, for a 27% increase over 2010. The population enjoys a per capita income roughly double that of the Philippines and much of Micronesia. Long-run prospects for tourism have been bolstered by the expansion of air travel in the Pacific, the rising prosperity of industrial East Asia, and the willingness of foreigners to finance infrastructure development. Proximity to Guam, the region's major destination for tourists from East Asia, and a regionally competitive tourist infrastructure enhance Palau's advantage as destination.

PANAMA

INTRODUCTION

Background: Explored and settled by the Spanish in the 16th century, Panama broke with Spain in 1821 and joined a union of Colombia, Ecuador, and Venezuela—named the Republic of Gran Colombia. When the latter dissolved in 1830, Panama remained part of Colombia. With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. In 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of the century. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the subsequent decades. With US help, dictator Manuel NORIEGA was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were transferred to Panama by the end of 1999. In October 2006, Panamanians approved an ambitious plan (estimated to cost \$5.3 billion) to expand the Canal. The project, which began in 2007 and could double the Canal's capacity, is expected to be completed in 2015.

Languages: Spanish (official), English 14%

Religions: Roman Catholic 85%, Protestant 15%

Demographic profile: Panama is a country of demographic and economic contrasts. It is in the midst of a demographic transition, characterized by steadily declining rates of fertility, mortality, and population growth, but disparities persist based on wealth, geography, and ethnicity. Panama has one of the fastest growing economies in Latin America and dedicates substantial funding to social programs, yet poverty and inequality remain prevalent. The indigenous population accounts for a growing share of Panama's poor and extreme poor, while the non-indigenous rural poor have been more successful at rising out of poverty through rural-to-urban labor migration. The government's large expenditures on untargeted, indirect subsidies for water, electricity, and fuel have been ineffective, but its conditional cash transfer program has shown some promise in helping to decrease extreme poverty among the indigenous population.

Panama has expanded access to education and clean water, but the availability of sanitation and, to a lesser extent, electricity remains poor. The increase in secondary schooling—led by female enrollment—is spreading to rural and indigenous areas, which probably will help to alleviate poverty if educational quality and the availability of skilled jobs improve. Inadequate access to sanitation contributes to a high incidence of diarrhea in Panama's children, which is one of the main causes of Panama's elevated chronic malnutrition rate, especially among indigenous communities.

ECONOMY

Economy—overview: Panama's dollar-based economy rests primarily on a well-developed services sector that accounts for more than three-quarters of GDP. Services include operating the Panama Canal, logistics, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. Economic growth will be bolstered by the Panama Canal expansion project that began in 2007 and is estimated to be completed by 2015 at a cost of \$5.3 billion—about 10-15% of current GDP. The expansion project will more than double the Canal's capacity, enabling it to accommodate ships that are too large to traverse the existing canal. The United States and China are the top users of the Canal. Panama is also constructing a metro system in Panama City, valued at \$1.2 billion and scheduled to be completed by 2014. Panama's booming transportation and logistics services sectors, along with aggressive infrastructure development projects, have led the economy to continued high growth in 2012. Foreign investment, at around 10% of GDP in both 2011 and 2012, has continued to be a source of growth. Strong economic performance has not translated into broadly shared prosperity, as Panama has the second worst income distribution in Latin America. About 30% of the population lives in poverty; however, from 2006 to 2012 poverty was reduced by 10 percentage points, while unemployment dropped from 12% to 4.4% of

the labor force in 2012. The US-Panama Trade Promotion Agreement was approved by Congress and signed into law in October 2011, and entered into force in October 2012. Panama also achieved removal from the Organization of Economic Development's gray-list of tax havens by signing various double taxation treaties with other nations.

Manpower reaching militarily significant age annually: male: 32,142

female: 30,879 (2010 est.)

Military expenditures: 1% of GDP (2012)

country comparison to the world: 128

Military—note: on 10 February 1990, the government of then President ENDARA abolished Panama's military and reformed the security apparatus by creating the Panamanian Public Forces; in October 1994, Panama's Legislative Assembly approved a constitutional amendment prohibiting the creation of a standing military force but allowing the temporary establishment of special police units to counter acts of "external aggression"

TRANSNATIONAL ISSUES

Disputes—International: organized illegal narcotics operations in Colombia operate within the remote border region with Panama

Refugees and internally displaced persons: refugees (country of origin): 15,598 (Colombia) (2011)

Illicit drugs: major cocaine transshipment point and primary money-laundering center for narcotics revenue; money-laundering activity is especially heavy in the Colon Free Zone; offshore financial center; negligible signs of coca cultivation; monitoring of financial transactions is improving; official corruption remains a major problem

PAPUA NEW GUINEA

INTRODUCTION

Background: The eastern half of the island of New Guinea—second largest in the world—was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997 after claiming some 20,000 lives.

GEOGRAPHY

Location: Oceania, group of islands including the eastern half of the island of New Guinea between the Coral Sea and the South Pacific Ocean, east of Indonesia

Geographic coordinates: 6 00 S, 147 00 E

ECONOMY

Economy—overview: Papua New Guinea (PNG) is richly endowed with natural resources, but exploitation has been hampered by rugged terrain, land tenure issues, and the high cost of developing infrastructure. The economy has a small formal sector, focused mainly on the export of those natural resources, and an informal sector, employing the majority of the population. Agriculture provides a subsistence livelihood for 85% of the people. Mineral deposits, including copper, gold, and oil, account for nearly two-thirds of export earnings. Natural gas reserves amount to an estimated 155 billion cubic meters. A consortium led by a major American oil company is constructing a liquefied natural gas (LNG) production facility that could begin exporting in 2014. As the largest investment project in the country's history, it has the potential to double GDP in the near-term and triple Papua New Guinea's export revenue. An American-owned firm also opened PNG's first oil refinery in 2004 and is building a second LNG production facility. The government faces the challenge of ensuring transparency and accountability for revenues flowing from this and other large LNG projects. In 2011 and 2012, the National Parliament passed legislation that created an off-shore Sovereign Wealth Fund (SWF) to manage government surpluses from mineral, oil, and natural gas projects. In recent years, the government has opened up markets in telecommunications and air transport, making both more affordable to the people. Numerous challenges still face the government of Peter O'NEILL, including providing physical security for foreign investors, regaining investor confidence, restoring integrity to state institutions, promoting economic efficiency by privatizing moribund state institutions, and maintaining good relations with Australia, its former

colonial ruler. Other socio-cultural challenges could upend the economy including chronic law and order and land tenure issues. The global financial crisis had little impact because of continued foreign demand for PNG's commodities.

TRANSNATIONAL ISSUES

Disputes—international: relies on assistance from Australia to keep out illegal cross-border activities from primarily Indonesia, including goods smuggling, illegal narcotics trafficking, and squatters and secessionists
Refugees and internally displaced persons: refugees (country of origin): 9,368 (Indonesia) (2011)
Trafficking in persons: *current situation:* Papua New Guinea is a source, destination, and transit country for men, women, and children subjected to sex trafficking and forced labor; women and children are subjected to sex trafficking and domestic servitude; trafficked men are forced to labor in logging and mining camps; migrant women and teenage girls from Malaysia, Thailand, China, and the Philippines are subjected to sex trafficking; men from China are transported to the country for forced labor
tier rating: Tier 3—Papua New Guinea does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; despite the government's acknowledgement of trafficking as a problem in the country, the government did not investigate any suspected trafficking offenses, prosecute or convict any trafficking offenders under existing laws, address allegations of officials complicit in human trafficking crimes, or identify or assist any trafficking victims (2008)
Illicit drugs: major consumer of cannabis

PARACEL ISLANDS

INTRODUCTION

Background: The Paracel Islands are surrounded by productive fishing grounds and by potential oil and gas reserves. In 1932, French Indochina annexed the islands and set up a weather station on Pattle Island; maintenance was continued by its successor, Vietnam. China has occupied all the Paracel Islands since 1974, when its troops

seized a South Vietnamese garrison occupying the western islands. China built a military installation on Woody Island with an airfield and artificial harbor. The islands also are claimed by Taiwan and Vietnam.

PARAGUAY

INTRODUCTION

Background: Paraguay achieved its independence from Spain in 1811. In the disastrous War of the Triple Alliance (1865-70)—between Paraguay and Argentina, Brazil, and Uruguay—Paraguay lost two-thirds of all its adult males and much of its territory. The country stagnated economically for the next half century. Following the Chaco War of 1932-35 with Bolivia, Paraguay gained a large part of the Chaco low land region. The 35-year military dictatorship of Alfredo STROESSNER ended in 1989, and, despite a marked increase in political infighting in recent years, Paraguay has held relatively free and regular presidential elections since the country's return to democracy.

GEOGRAPHY

Location: Central South America, northeast of Argentina, southwest of Brazil

per capita: 88.05 cu m/yr (2000)

Natural hazards: local flooding in southeast (early September to June); poorly drained plains may become boggy (early October to June)

Environment—current issues: deforestation; water pollution; inadequate means for waste disposal pose health risks for many urban residents; loss of wetlands

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Hazardous Wastes, Law of the Sea, Ozone Layer Protection, Wetlands
signed, but not ratified: none of the selected agreements

Geography—note: landlocked; lies between Argentina, Bolivia, and Brazil; population concentrated in southern part of country

PEOPLE AND SOCIETY

Nationality: noun: Paraguayan(s)

adjective: Paraguayan

Ethnic groups: mestizo (mixed Spanish and Amerindian) 95%, other 5%

Languages: Spanish (official), Guaraní (official)

Religions: Roman Catholic 89.6%, Protestant 6.2%, other Christian 1.1%, other or unspecified 1.9%, none 1.1% (2002 census)

Demographic profile: Paraguay falls below the Latin American average in several socioeconomic categories, including immunization rates, potable water, sanitation, and secondary school enrollment, and has greater rates of income inequality and child and maternal mortality. Paraguay's poverty rate has declined in recent years but remains high, especially in rural areas, with more than a third of the population below the poverty line. However, the well-being of the poor in many regions has improved in terms of housing quality and access to clean water, telephone service, and electricity. The fertility rate continues to drop,

declining sharply from an average 4.3 births per woman in the late 1990s to about 2 in 2013, as a result of the greater educational attainment of women, increased use of contraception, and a desire for smaller families among young women. Paraguay is a country of emigration; it has not attracted large numbers of immigrants because of political instability, civil wars, years of dictatorship, and the greater appeal of neighboring countries. Paraguay first tried to encourage immigration in 1870 in order to rebound from the heavy death toll it suffered during the War of the Triple Alliance, but it received few European and Middle Eastern immigrants. In the 20th century, limited numbers of immigrants arrived from Lebanon, Japan, South Korea, and China, as well as Mennonites from Canada, Russia, and Mexico. Large flows of Brazilian immigrants have been arriving since the 1960s, mainly to work in agriculture. Paraguayans continue to emigrate to Argentina, Brazil, Uruguay, the United States, Italy, Spain, and France.

Flag description: three equal, horizontal bands of red (top), white, and blue with an emblem centered in the white band; unusual flag in that the emblem is different on each side; the obverse (hoist side at the left) bears the national coat of arms (a yellow five-pointed star within a green wreath capped by the words REPUBLICA DEL PARAGUAY, all within two circles); the reverse (hoist side at the right) bears a circular seal of the treasury (a yellow lion below a red Cap of Liberty and the words PAZ Y JUSTICIA (Peace and Justice)); red symbolizes bravery and patriotism, white represents integrity and peace, and blue denotes liberty and generosity

note: the three color bands resemble those on the flag of the Netherlands; one of only three national flags that differ on their obverse and reverse sides—the others are Moldova and Saudi Arabia

National symbol(s): lion

National anthem: *name:* "Paraguayos, Republica o muerte!" (Paraguayans, The Republic or Death!) *lyrics/music:* Francisco Esteban ACUNA de Figueroa/disputed

note: adopted 1934, in use since 1846; the anthem was officially adopted following its rearrangement in 1934

ECONOMY

Economy—overview: Landlocked Paraguay has a market economy distinguished by a large informal sector, featuring re-export of imported consumer goods to neighboring countries, as well as the activities of thousands of micro enterprises and urban street vendors. A large percentage of the population, especially in rural areas, derives its living from agricultural activity, often on a subsistence basis. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. On a per capita basis, real income has stagnated at 1980 levels. The economy grew rapidly between 2003 and 2008 as growing world demand for commodities combined with high prices and favorable weather to support Paraguay's commodity-based export expansion. Paraguay is the sixth largest soy producer in the world. Drought hit in 2008, reducing agricultural exports and slowing the economy even before the onset of the global recession. The economy fell 3.8% in 2009, as lower world demand and commodity prices caused exports to contract. The government reacted by introducing fiscal and monetary stimulus packages. Growth resumed at a 13% level in 2010, the highest in South America, but slowed to about 4% in 2011 as the stimulus subsided. In 2012, severe drought and outbreaks of foot-and-mouth disease led to a drop in beef and other agricultural exports and the economy contracted about 0.5%. Political uncertainty, corruption, limited progress on structural reform, and deficient infrastructure are the main obstacles to long-term growth.

TRANSNATIONAL ISSUES

Disputes—international: unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics trafficking, and fundraising for extremist organizations

Illicit drugs: major illicit producer of cannabis, most or all of which is consumed in Brazil, Argentina, and Chile; transshipment country for Andean cocaine headed for Brazil, other Southern Cone markets, and Europe; weak border controls, extensive corruption and money-laundering activity, especially in the Tri-Border Area; weak anti-money-laundering laws and enforcement

PERU

INTRODUCTION

Background: Ancient Peru was the seat of several prominent Andean civilizations, most notably that of the Incas whose empire was captured by Spanish conquistadors in 1533. Peruvian independence was declared in 1821, and remaining Spanish forces were defeated in 1824. After a dozen years of military rule, Peru returned to democratic leadership in 1980, but experienced economic problems and the growth of a violent insurgency. President Alberto FUJIMORI's election in 1990 ushered in a decade that saw a dramatic turnaround in the

economy and significant progress in curtailing guerrilla activity. Nevertheless, the president's increasing reliance on authoritarian measures and an economic slump in the late 1990s generated mounting dissatisfaction with his regime, which led to his ouster in 2000. A caretaker government oversaw new elections in the spring of 2001, which installed Alejandro TOLEDO Manrique as the new head of government—Peru's first democratically elected president of indigenous Quechuan ethnicity. The presidential election of 2006 saw the return of Alan GARCIA Perez who, after a disappointing presidential term from 1985 to 1990,

oversaw a robust economic rebound. In June 2011, former army officer Ollanta HUMALA Tasso was elected president, defeating Keiko FUJIMORI Higuchi, the daughter of Alberto FUJIMORI. Since his election, HUMALA has carried on the sound, market-oriented economic policies of the three preceding administrations.

Religions: Roman Catholic 81.3%, Evangelical 12.5%, other 3.3%, unspecified or none 2.9% (2007 Census)

Demographic profile: Peru's urban and coastal communities have benefited much more from recent economic growth than rural, Afro-Peruvian, indigenous, and poor populations of the Amazon and mountain regions. The poverty rate has dropped substantially during the last decade but remains stubbornly high at about 30% (more than 55% in rural areas). After remaining almost static for about a decade, Peru's malnutrition rate began falling in 2005, when the government introduced a coordinated strategy focusing on hygiene, sanitation, and clean water. School enrollment has improved, but achievement scores reflect ongoing problems with educational quality. Many poor children temporarily or permanently drop out of school to help support their families. About a quarter to a third of Peruvian children aged 6 to 14 work, often putting in long hours at hazardous mining or construction sites.

Peru was a country of immigration in the 19th and early 20th centuries, but has become a country of emigration in the last few decades. Beginning in the 19th century, Peru brought in Asian contract laborers mainly to work on coastal plantations. Populations of Chinese and Japanese descent—among the largest in Latin America—are economically and culturally influential in Peru today. Peruvian emigration began rising in the 1980s due to an economic crisis and a violent internal conflict, but outflows have stabilized in the last few years as economic conditions have improved. Nonetheless, more than 2 million Peruvians have emigrated in the last decade, principally to the US, Spain, and Argentina.

ECONOMY

Economy—overview: Peru's economy reflects its varied geography—an arid low land coastal region, the central high sierra of the Andes, the dense forest of the Amazon, with tropical lands bordering Colombia and Brazil. A wide range of important mineral resources are found in the mountainous and coastal areas, and Peru's coastal waters provide excellent fishing grounds. The Peruvian economy has been growing by an average of 6.4% per year since 2002 with a stable/slightly appreciating exchange rate and low inflation, which in 2013 is expected to be below the upper limit of the Central Bank target range of 1 to 3%. Growth has been in the 6-9% range for the last three years, due partly to a leap in private investment, especially in the extractive sector, which accounts for more than 60% of Peru's total exports. Despite Peru's strong macroeconomic performance, dependence on minerals and metals exports and imported foodstuffs subjects the economy to fluctuations in world prices. Poor infrastructure hinders the spread of growth to Peru's non-coastal areas. Peru's rapid expansion coupled with cash transfers and other programs have helped to reduce

the national poverty rate by 23 percentage points since 2002, but inequality persists and continues to pose a challenge for the new Ollanta HUMALA administration, which has championed a policy of social inclusion and a more equitable distribution of income. Peru's free trade policy has continued under the HUMALA administration; since 2006, Peru has signed trade deals with the US, Canada, Singapore, China, Korea, Mexico, Japan, the European Free Trade Association, Chile, and four other countries; concluded negotiations with Venezuela, Costa Rica, and Guatemala; and begun trade talks with two other Central American countries and the Trans-Pacific Partnership. Peru also has signed a trade pact with Chile, Colombia, and Mexico called the Pacific Alliance that rivals Mercosur in combined population, GDP, and trade. The US-Peru Trade Promotion Agreement entered into force 1 February 2009, opening the way to greater trade and investment between the two economies. Although Peru has continued to attract foreign investment, political activism and protests are hampering development of some projects related to natural resource extraction.

TRANSNATIONAL ISSUES

Disputes—international: Chile and Ecuador rejected Peru's November 2005 unilateral legislation to shift the axis of their joint treaty-defined maritime boundaries along the parallels of latitude to equidistance lines which favor Peru; organized illegal narcotics operations in Colombia have penetrated Peru's shared border; Peru rejects Bolivia's claim to restore maritime access through a sovereign corridor through Chile along the Peruvian border

Refugees and internally displaced persons: IDPs: 150,000 (civil war from 1980-2000; most IDPs are indigenous peasants in Andean and Amazonian regions; as of 2011, no new information on the situation of these IDPs) (2007)

Illicit drugs: until 1996 the world's largest coca leaf producer, Peru is now the world's second largest producer of coca leaf, though it lags far behind Colombia; cultivation of coca in Peru was estimated at 40,000 hectares in 2009, a slight decrease over 2008; second largest producer of cocaine, estimated at 225 metric tons of potential pure cocaine in 2009; finished cocaine is shipped out from Pacific ports to the international drug market; increasing amounts of base and finished cocaine, however, are being moved to Brazil, Chile, Argentina, and Bolivia for use in the Southern Cone or transshipment to Europe and Africa; increasing domestic drug consumption

PHILIPPINES

INTRODUCTION

Background: The Philippine Islands became a Spanish colony during the 16th century; they were ceded to the US in 1898 following the Spanish-American War. In 1935 the Philippines became a self-governing commonwealth. Manuel QUEZON was elected president and was tasked with preparing the country for independence after a 10-year transition. In 1942 the islands fell under Japanese occupation during World War II, and US forces and Filipinos fought together during 1944-45 to regain control. On 4 July 1946 the Republic of the Philippines attained its independence. A 20-year rule by Ferdinand MARCOS ended in 1986, when a "people power" movement in Manila ("EDSA 1") forced him into exile and installed Corazon AQUINO as president. Her presidency was hampered by several coup attempts that prevented a return to full political stability and economic development. Fidel RAMOS was elected president in 1992. His administration was marked by increased stability and by progress on economic reforms. In 1992, the US closed its last military bases on the islands. Joseph ESTRADA was elected president in 1998. He was succeeded by his vice-president, Gloria MACAPAGAL-ARROYO, in January 2001 after ESTRADA's stormy impeachment trial on corruption charges broke down and another "people power" movement ("EDSA 2") demanded his resignation. MACAPAGAL-ARROYO was elected to a six-year term as

president in May 2004. Her presidency was marred by several corruption allegations but the Philippine economy was one of the few to avoid contraction following the 2008 global financial crisis, expanding each year of her administration. Benigno AQUINO III was elected to a six-year term as president in May 2010. The Philippine Government faces threats from several groups, some of which are on the US Government's Foreign Terrorist Organization list. Manila has waged a decades-long struggle against ethnic Moro insurgencies in the southern Philippines, which has led to a peace accord with the Moro National Liberation Front and ongoing peace talks with the Moro Islamic Liberation Front. The decades-long Maoist-inspired New People's Army insurgency also operates through much of the country. The Philippines faces increased tension with China over disputed territorial and maritime claims in the South China Sea.

lyrics/music: Jose PALMA (revised by Felipe PADILLA de Leon)/Julian FELIPE

note: music adopted 1898, original Spanish lyrics adopted 1899, Filipino (Tagalog) lyrics adopted 1956; although the original lyrics were written in Spanish, later English and Filipino versions were created; today, only the Filipino version is used

ECONOMY

Economy—overview: Philippine GDP growth, which cooled from 7.6% in 2010 to 3.9% in 2011, expanded to 6.6% in 2012—meeting the government's targeted 6%-7% growth range. The 2012 expansion partly reflected a rebound from depressed 2011 export and public sector spending levels. The economy has weathered global economic and financial downturns better than its regional peers due to minimal exposure to troubled international securities, lower dependence on exports, relatively resilient domestic consumption, large remittances from four-to five-million overseas Filipino workers, and a rapidly expanding business process-outsourcing industry. The current account balance had recorded consecutive surpluses since 2003; international reserves are at record highs; the banking system is stable; and the stock market was Asia's second best-performer in 2012. Efforts to improve tax administration and expenditure management have helped ease the Philippines' tight fiscal situation and reduce high debt levels. The Philippines received several credit rating upgrades on its sovereign debt in 2012, and has had little difficulty tapping domestic and international markets to finance its deficits. Achieving a higher growth path nevertheless remains a pressing challenge. Economic growth in the Philippines averaged 4.5% during the MACAPAGAL-ARROYO administration but poverty worsened during her term. Growth has accelerated under the AQUINO government, but with limited progress thus far in bringing down unemployment, which hovers around 7%, and improving the quality of jobs. Underemployment is nearly 20% and more than 40% of the employed are estimated to be working in the informal sector. The AQUINO administration has been working to boost the budgets for education, health, cash transfers to the poor, and other social spending programs, and is relying on the private sector to help fund major infrastructure projects under its Public-Private Partnership program. Long-term challenges include reforming governance and the judicial system, building infrastructure, improving regulatory predictability, and the ease of doing business, attracting higher levels of local and foreign investments. The Philippine Constitution and the other laws continue to restrict foreign ownership in important activities/sectors (such as land ownership and public utilities).

TRANSNATIONAL ISSUES

Disputes—International: Philippines claims sovereignty over Scarborough Reef (also claimed by China together with Taiwan) and over certain of the Spratly Islands, known locally as the Kalayaan (Freedom) Islands, also claimed by China, Malaysia, Taiwan, and Vietnam; the 2002 "Declaration on the Conduct of Parties in the South China Sea," has eased tensions in the

Spratly Islands but falls short of a legally binding "code of conduct" desired by several of the disputants; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Philippines retains a dormant claim to Malaysia's Sabah State in northern Borneo based on the Sultanate of Sulu's granting the Philippines Government power of attorney to pursue a sovereignty claim on his behalf; maritime delimitation negotiations continue with Palau

Refugees and internally displaced persons: **IDPs:** at least 843,000 (government troops fighting the Moro Islamic Liberation Front, the Abu Sayyaf Group, and the New People's Army; clan feuds; natural disasters (December 2012 Typhoon Bopha) (2013)

Illicit drugs: domestic methamphetamine production has been a growing problem in recent years despite government crackdowns; major consumer of amphetamines; longstanding marijuana producer mainly in rural areas where Manila's control is limited

PITCAIRN ISLANDS

INTRODUCTION

Background: Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Out migration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to less than 50 today.

ECONOMY

Economy—overview: The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships.

POLAND

INTRODUCTION

Background: Poland's history as a state begins near the middle of the 10th century. By the mid-16th century, the Polish-Lithuanian Commonwealth ruled a vast tract of land in central and eastern Europe. During the 18th century, internal disorders weakened the nation, and in a series of agreements between 1772 and 1795, Russia, Prussia, and Austria partitioned Poland among themselves. Poland regained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite state following the war, but its government was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union "Solidarity" that over time became a political force with over ten million members. Free elections in 1989 and 1990 won Solidarity

control of the parliament and the presidency, bringing the Communist era to a close. A "shock therapy" program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe. Poland joined NATO in 1999 and the European Union in 2004. With its transformation to a democratic, market-oriented country largely completed, Poland is an increasingly active member of Euro-Atlantic organizations.

Environment—current issues: situation has improved since 1989 due to decline in heavy industry and increased environmental concern. Dy post-Communist governments; air pollution nonetheless remains serious because of sulfur dioxide emissions from coal-fired power plants, and the resulting acid rain has caused forest damage; water pollution from industrial and municipal sources is also a problem, as is disposal of hazardous wastes; pollution levels should continue to decrease as industrial establishments bring their facilities up to EU code, but at substantial cost to business and the government

note: adopted 1927; the anthem, commonly known as "Jeszcze Polska nie zginęła" (Poland Has Not Yet Perished), was written in 1797; the lyrics resonate strongly with Poles because they reflect the numerous occasions in which the nation's lands have been occupied

ECONOMY

Economy—overview: Poland has pursued a policy of economic liberalization since 1990 and Poland's economy was the only one in the European Union to avoid a recession through the 2008-09 economic downturn. Although EU membership and access to EU structural funds have provided a major boost to the economy since 2004, GDP per capita remains significantly below the EU average while unemployment continues to exceed the EU average. The government of Prime Minister Donald TUSK steered the Polish economy through the economic downturn by skillfully managing public finances without stifling economic growth and adopted controversial pension and tax reforms to further shore up public finances. While the Polish economy has performed well over the past five years, growth slowed in 2012, in part due to the ongoing economic difficulties in the euro zone. The key policy challenge is to provide support to the economy through monetary easing, while maintaining the pace of structural fiscal consolidation. Poland's economic performance could improve over the longer term if the country addresses some of the remaining deficiencies in its road and rail infrastructure and its business environment. An inefficient commercial court system, a rigid labor code, red tape, and a burdensome tax system keep the private sector from realizing its full potential.

PORTUGAL

INTRODUCTION

Background: Following its heyday as a global maritime power during the 15th and 16th centuries, Portugal lost much of its wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the Napoleonic Wars, and the independence of its wealthiest colony of Brazil in 1822. A 1910 revolution deposed the monarchy; for most of the next six decades, repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year, Portugal granted independence to all of its African colonies. Portugal is a founding member of NATO and entered the EC (now the EU) in 1986.

Flag description: two vertical bands of green (hoist side, two-fifths) and red (three-fifths) with the national coat of arms (armillary sphere and Portuguese shield) centered on the dividing line; explanations for the color meanings are ambiguous, but a popular interpretation has green symbolizing hope and red the blood of those defending the nation

National symbol(s): armillary sphere (a spherical astrolabe modeling objects in the sky)

National anthem: name: "A Portuguesa" (The Song of the Portuguese)
lyrics/music: Henrique LOPES DE MENDOCA/ Alfredo KEIL
note: adopted 1910; "A Portuguesa" was originally written to protest the Portuguese monarchy's acquiescence to the 1890 British ultimatum forcing Portugal to give up areas of Africa; the lyrics refer to the "insult" that resulted from the event

ECONOMY

Economy—overview: Portugal has become a diversified and increasingly service-based economy since joining the European Community—the EU's predecessor—in 1986. Over the following two decades, successive governments privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country qualified for the Economic and Monetary Union (EMU) in 1998 and began circulating the euro on 1 January 2002 along with 11 other EU members. The economy grew by more than the EU average for much of the 1990s, but the rate of growth slowed in 2001-08. The economy contracted 2.5% in 2009, before growing 1.4% in 2010, but GDP fell again in 2011 and 2012, as the government began implementing spending cuts and tax increases to comply with conditions of an EU-IMF financial rescue package, agreed to in May 2011. GDP per capita stands at roughly two-thirds of the EU-27 average. Portugal also has been increasingly overshadowed by lower-cost producers in Central Europe and Asia as a destination for foreign direct investment, in part because its rigid labor market hindered greater productivity and growth. However, the government of Pedro PASSOS COELHO has enacted several measures to introduce more flexibility into the labor market, and, this, along with steps to reduce high levels of public debt, could make Portugal more attractive to foreign investors. The government reduced the budget deficit from 10.1% of GDP in 2009 to 4.5% in 2011, an achievement made possible only by the extraordinary revenues obtained from the one-time transfer of bank pension funds to the social security system. The budget deficit worsened in 2012 as a sharp reduction in domestic consumption took a bigger bite out of value-added tax revenues while rising unemployment benefits increased expenditures more than anticipated. Poor growth prospects over the next year have reinforced investors' concerns about the government's ability to achieve its budget deficit targets and regain full access to

bond market financing when the EU-IMF financing program expires in 2013.

TRANSNATIONAL ISSUES

Disputes—international: Portugal does not recognize Spanish sovereignty over the territory of Olivenza based on a difference of interpretation of the 1815 Congress of Vienna and the 1801 Treaty of Badajoz

Illicit drugs: seizing record amounts of Latin American cocaine destined for Europe; a European gateway for Southwest Asian heroin; transshipment point for hashish from North Africa to Europe; consumer of Southwest Asian heroin

PUERTO RICO

INTRODUCTION

Background: Populated for centuries by aboriginal peoples, the island was claimed by the Spanish Crown in 1493 following Christopher COLUMBUS' second voyage to the Americas. In 1898, after 400 years of colonial rule that saw the indigenous population nearly exterminated and African slave labor introduced, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917. Popularly-elected governors have served since 1948. In 1952, a constitution was enacted providing for internal self government. In plebiscites held in 1967, 1993, and 1998, voters chose not to alter the existing political status with the US, but the results of a 2012 vote left open the possibility of American statehood.

GEOGRAPHY

Location: Caribbean, island between the Caribbean Sea and the North Atlantic Ocean, east of the Dominican Republic

National anthem: name: "La Borinquena" (The Puerto Rican)

lyrics/music: Manuel Fernandez JUNCOS/Felix Astol ARTES

note: music adopted 1952, lyrics adopted 1977; the local anthem's name is a reference to the indigenous name of the island, Borinquen; the music was originally composed as a dance in 1867 and gained popularity in the early 20th century; there is some evidence that the music was written by Francisco RAMIREZ; as a commonwealth of the United States, "The Star-Spangled Banner" is official (see United States)

ECONOMY

Economy—overview: Puerto Rico has one of the most dynamic economies in the Caribbean region, however, growth has been negative for the past four years, and unemployment rose to nearly 16% in 2011. The industrial sector has surpassed agriculture as the primary locus of economic activity and income. Mainland US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income with estimated arrivals of more than 3.6 million tourists in 2008. Closing the budget deficit while restoring economic growth and employment remain the central concerns of the government.

QATAR

INTRODUCTION

Background: Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the Amir, who had ruled the country since 1972. His son, the current Amir HAMAD bin Khalifa Al Thani, overthrew the father in a bloodless coup in 1995. In 2001, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. As of 2007, oil and natural gas revenues had enabled Qatar to attain the highest per capita income in the world. Qatar has not experienced the level of unrest or violence seen in other Near Eastern and North African countries in 2010-11, due in part to its immense wealth. Qatar's international image is bolstered in part by the Doha-based Al Jazeera news network, which has provided comprehensive coverage of the Near East and North African Arab revolutions. Additionally, Qatar played a significant role in the Libyan revolution by pressing the Gulf Cooperation Council and the Arab League to assist the Libyan rebel movement.

Flag description: maroon with a broad white serrated band (nine white points) on the hoist side; maroon represents the blood shed in Qatari wars, white stands for peace; the nine-pointed serrated edge signifies Qatar as the ninth member of the "reconciled emirates" in the wake of the Qatari-British treaty of 1916

note: the other eight emirates are the seven that compose the UAE and Bahrain; according to some sources, the dominant color was formerly red, but this darkened to maroon upon exposure to the sun and the new shade was eventually adopted

National anthem: name: "Al-Salam Al-Amiri" (The Peace for the Anthem)

lyrics/music: Sheikh MUBARAK bin Saif al-Thani/Abdul Aziz Nasser OBAIDAN

note: adopted 1996; the anthem was first performed that year at a meeting of the Gulf Cooperative Council hosted by Qatar

ECONOMY

Economy—overview: Qatar has prospered in the last several years with continued high real GDP growth. Throughout the financial crisis Qatari authorities sought to protect the local banking sector with direct investments into domestic banks. GDP had rebounded in 2010 largely due to the increase in oil prices, and 2011's growth was supported by Qatar's investment in expanding its gas sector. GDP slowed to 6.3% in 2012 as Qatar's gas sector expansion moved toward completion. Economic policy is focused on developing Qatar's non associated natural gas reserves and increasing private and foreign investment in non-energy sectors, but oil and gas still account for more than 50% of GDP, roughly 85% of export earnings, and 70% of government revenues. Oil and gas have made Qatar the world's highest per-capita income country and the country with the lowest unemployment. Proved oil reserves in excess of 25 billion barrels should enable continued output at current levels for 57 years. Qatar's proved reserves of natural gas exceed 25 trillion cubic meters, more than 13% of the world total and third largest in the world. Qatar's successful 2022 world cup bid will likely accelerate large-scale infrastructure projects such as Qatar's metro system, light rail system, and the Qatar-Bahrain causeway. The Hamad International Airport is projected to open by the end of 2013 with an annual passenger capacity of 24 million.

ROMANIA

INTRODUCTION

Background: The principalities of Wallachia and Moldavia—for centuries under the suzerainty of the Turkish Ottoman Empire—secured their autonomy in 1856; they were de facto linked in 1859 and formally united in 1862 under the new name of Romania. The country gained recognition of its independence in 1878. It joined the Allied Powers in World War I and acquired new territories—most notably Transylvania—following the conflict. In 1940, Romania allied with the Axis powers and participated in the 1941 German invasion of the USSR. Three years later, overrun by the Soviets, Romania signed an armistice. The post-war Soviet occupation led to the formation of a Communist “people’s republic” in 1947 and the abdication of the king. The decades-long rule of dictator Nicolae CEAUSESCU, who took power in 1965, and his Securitate police state became increasingly oppressive and draconian through the 1980s. CEAUSESCU was overthrown and executed in late 1989. Former Communists dominated the government until 1996 when they were swept from power. Romania joined NATO in 2004 and the EU in 2007.

Flag description: three equal vertical bands of blue (hoist side), yellow, and red; modeled after the flag of France, the colors are those of the principalities of Walachia (red and yellow) and Moldavia (red and blue), which united in 1862 to form Romania; the national coat of arms that used to be centered in the yellow band has been removed

note: now similar to the flag of Chad, whose blue band is darker; also resembles the flags of Andorra and Moldova

National symbol(s): golden eagle

National anthem: name: "Desteapta-te romane!"

(Wake up, Romanian!)

lyrics/music: Andrei MURESIANU/Anton PANN

note: adopted 1 990; the anthem was written during the 1 848 Revolution

ECONOMY

Economy—overview: Romania, which joined the European Union on 1 January 2007, began the transition from Communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. The country emerged in 2000 from a punishing three-year recession thanks to strong demand in EU export markets. Domestic consumption and investment fueled strong GDP growth, but led to large current account imbalances. Romania's macroeconomic gains have only recently started to spur creation of a middle class and to address Romania's widespread poverty. Corruption

and red tape continue to permeate the business environment. Inflation rose in 2007-08, driven by strong consumer demand, high wage growth, rising energy costs, a nation-wide drought, and a relaxation of fiscal discipline. As a result of the increase in fiscal and current account deficits and the global financial crisis, Romania signed on to a \$26 billion emergency assistance package from the IMF, the EU, and other international lenders. Worsening international financial markets, as well as a series of drastic austerity measures implemented to meet Romania's obligations under the IMF-led bail-out agreement contributed to a GDP contraction of 6.6% in 2009, followed by a 1.1% GDP contraction in 2010. The economy returned to positive growth in 2011 due to strong exports, a better than expected harvest, and weak domestic demand. In 2012, however, growth slowed to less than 1%, partially due to slackening export demand and an extended drought that resulted in an exceptionally poor harvest. In March 2011, Romania and the IMF/EU/World Bank signed a 24-month precautionary stand-by agreement, worth \$6.6 billion, to promote fiscal discipline, encourage progress on structural reforms, and strengthen financial sector stability. The Romanian authorities announced that they do not intend to draw funds under the agreement.

TRANSNATIONAL ISSUES

Disputes—international: the ICJ ruled largely in favor of Romania in its dispute submitted in 2004 over Ukrainian-administered Zmiynyy/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Illicit drugs: major transshipment point for Southwest Asian heroin transiting the Balkan route and small amounts of Latin American cocaine bound for Western Europe; although not a significant financial center, role as a narcotics conduit leaves it vulnerable to laundering, which occurs via the banking system, currency exchange houses, and casinos

RUSSIA

INTRODUCTION

Background: Founded in the 12th century, the Principality of Muscovy, was able to emerge from over 200 years of Mongol domination (13th–15th centuries) and to gradually conquer and absorb surrounding principalities. In the early 17th

century, a new Romanov Dynasty continued this policy of expansion across Siberia to the Pacific. Under PETER I (ruled 1682–1725), hegemony was extended to the Baltic Sea and the country was renamed the Russian Empire. During the 19th century, more territorial acquisitions were made in Europe and Asia. Defeat in the Russo-Japanese War of 1904–05 contributed to the Revolution of 1905, which resulted in the formation of a parliament and other reforms. Repeated devastating defeats of the Russian army in World War I led to widespread rioting in the major cities of the Russian Empire and to the overthrow in 1917 of the imperial household. The Communists under Vladimir LENIN seized power soon after and formed the USSR. The brutal rule of Iosif STALIN

(1928–53) strengthened Communist rule and Russian dominance of the Soviet Union at a cost of tens of millions of lives. The Soviet economy and society stagnated in the following decades until General Secretary Mikhail GORBACHEV (1985–91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize Communism, but his initiatives inadvertently released forces that by December 1991 splintered the USSR into Russia and 14 other independent republics. Since then, Russia has shifted its post-Soviet democratic ambitions in favor of a centralized semi-authoritarian state in which the leadership seeks to legitimize its rule through managed national elections, populist appeals by President PUTIN, and continued economic growth. Russia

has severely disabled a Chechen rebel movement, although violence still occurs throughout the North Caucasus.

GEOGRAPHY

Location: North Asia bordering the Arctic Ocean, extending from Europe (the portion west of the Urals) to the North Pacific Ocean

Geographic coordinates: 60 00 N, 100 00 E

Map references: Asia

Area: total: 17,098,242 sq km
country comparison to the world: 1

Coastline: 37,653 km

Maritime claims: territorial sea: 12 nm
contiguous zone: 24 nm
exclusive economic zone: 200 nm
continental shelf: 200 m depth or to the depth of exploitation

Climate: ranges from steppes in the south through humid continental in much of European Russia; subarctic in Siberia to tundra climate in the polar north; winters vary from cool along Black Sea coast to frigid in Siberia; summers vary from warm in the steppes to cool along Arctic coast

Terrain: broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains along southern border regions

Elevation extremes: lowest point: Caspian Sea -28 m
highest point: Gora El'brus 5,633 m (highest point in Europe)

Natural resources: wide natural resource base including major deposits of oil, natural gas, coal, and many strategic minerals, reserves of rare earth elements, timber
note: formidable obstacles of climate, terrain, and distance hinder exploitation of natural resources

Land use: arable land: 7.11%
permanent crops: 0.1%
other: 92.79% (2011)

Irrigated land: 43,460 sq km (2008)

Total renewable water resources: 4,508 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): total: 66.2 cu km/yr (20%/60%/20%)
per capita: 454.9 cu m/yr (2001)

Natural hazards: permafrost over much of Siberia is a major impediment to development; volcanic activity in the Kuril Islands; volcanoes and earthquakes on the Kamchatka Peninsula; spring floods and summer/autumn forest fires throughout Siberia and parts of European Russia
volcanism: significant volcanic activity on the Kamchatka Peninsula and Kuril Islands; the peninsula alone is home to some 29 historically active volcanoes, with dozens more in the Kuril Islands;

Kliuchevskoi (elev. 4,835 m), which erupted in 2007 and 2010, is Kamchatka's most active volcano; Avachinsky and Koryaksky volcanoes, which pose a threat to the city of Petropavlovsk-Kamchatskiy, have been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; other notable historically active volcanoes include Bezimianny, Chikurachki, Ebeko, Gorely, Grozny, Karymsky, Ketoi, Kronotsky, Ksudach, Medvezhia, Mutnovsky, Sarychev Peak, Shiveluch, Tiatia, Tolbachik, and Zheltovsky

Environment—current issues: air pollution from heavy industry, emissions of coal-fired electric plants, and transportation in major cities; industrial, municipal, and agricultural pollution of inland waterways and seacoasts; deforestation; soil erosion; soil contamination from improper application of agricultural chemicals; scattered areas of sometimes intense radioactive contamination; groundwater contamination from toxic waste; urban solid waste management; abandoned stocks of obsolete pesticides

Environment—international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulfur 85, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Wetlands, Whaling
signed, but not ratified: Air Pollution-Sulfur 94

Geography—note: largest country in the world in terms of area but unfavorably located in relation to major sea lanes of the world; despite its size, much of the country lacks proper soils and climates (either too cold or too dry) for agriculture; Mount El'brus is Europe's tallest peak; Lake Baikal, the deepest lake in the world, is estimated to hold one fifth of the world's fresh water

Flag description: three equal horizontal bands of white (top), blue, and red

note: the colors may have been based on those of the Dutch flag; despite many popular interpretations, there is no official meaning assigned to the colors of the Russian flag; this flag inspired other Slav countries to adopt horizontal tricolors of the same colors but in different arrangements, and so red, blue, and white became the Pan-Slav colors

National symbol(s): bear; double-headed eagle

National anthem: *name:* "Gimn Rossiyskoy Federatsii" (National Anthem of the Russian Federation)

lyrics/music: Sergei Vladimirovich MIKHALKOV/Alexandr Vasilievich ALEXANDROV

note: in 2000, Russia adopted the tune of the anthem of the former Soviet Union (composed in 1939); the lyrics, also adopted in 2000, were written by the same person who authored the Soviet lyrics in 1943

ECONOMY

Economy—overview: Russia has undergone significant changes since the collapse of the Soviet Union, moving from a globally-isolated, centrally-planned economy to a more market-based and globally-integrated economy. Economic reforms in the 1990s privatized most industry, with notable exceptions in the energy and defense-related sectors. The protection of property rights is still weak and the private sector remains subject to heavy state interference. In 2011, Russia became the world's leading oil producer, surpassing Saudi Arabia; Russia is the second-largest producer of natural gas; Russia holds the world's largest natural gas reserves, the second-largest coal reserves, and the eighth-largest crude oil reserves. Russia is also a top exporter of metals such as steel and primary aluminum. Russia's reliance on commodity exports makes it vulnerable to boom and bust cycles that follow the volatile swings in global prices. The government since 2007 has embarked on an ambitious program to reduce this dependency and build up the country's high technology sectors, but with few visible results so far. The economy had averaged 7% growth in the decade following the 1998 Russian financial crisis, resulting in a doubling of real disposable incomes and the emergence of a middle

class. The Russian economy, however, was one of the hardest hit by the 2008-09 global economic crisis as oil prices plummeted and the foreign credits that Russian banks and firms relied on dried up. According to the World Bank the government's anti-crisis package in 2008-09 amounted to roughly 6.7% of GDP. The economic decline bottomed out in mid-2009 and the economy began to grow again in the third quarter of 2009. High oil prices buoyed Russian growth in 2011-12 and helped Russia reduce the budget deficit inherited from 2008-09. Russia has reduced unemployment to a record low and has lowered inflation below double digit rates. Russia joined the World Trade Organization in 2012, which will reduce trade barriers in Russia for foreign goods and services and help open foreign markets to Russian goods and services. At the same time, Russia has sought to cement economic ties with countries in the former Soviet space through a Customs Union with Belarus and Kazakhstan, and, in the next several years, through the creation of a new Russia-led economic bloc called the Eurasian Economic Union. Russia has had difficulty attracting foreign direct investment and has experienced large capital outflows in the past several years, leading to official programs to improve Russia's international rankings for its investment climate. Russia's adoption of a new oil-price-based fiscal rule in 2012 and a more flexible exchange rate policy have improved its ability to deal with external shocks, including volatile oil prices. Russia's long-term challenges also include a shrinking workforce, rampant corruption, and underinvestment in infrastructure.

TRANSNATIONAL ISSUES

Disputes—international: Russia remains concerned about the smuggling of poppy derivatives from Afghanistan through Central Asian countries; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with the 2004 Agreement, ending their centuries-long border disputes; the sovereignty dispute over the islands of Etorofu, Kunashiri, Shikotan, and the Habomai group, known in Japan as the "Northern Territories" and in Russia as the "Southern Kurils," occupied by the Soviet Union in 1945, now administered by Russia, and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Russia's military support and subsequent recognition of Abkhazia and South Ossetia independence in 2008 continue to sour relations with Georgia; Azerbaijan, Kazakhstan, and Russia ratified Caspian seabed delimitation treaties based on equidistance, while Iran continues to insist on a one-fifth slice of the sea; Norway and Russia signed a comprehensive maritime boundary agreement in 2010; various groups in Finland advocate restoration of Karelia (Kareliya) and other areas ceded to the Soviet Union following World War II but the Finnish Government asserts no territorial demands; Russia and Estonia signed a technical border agreement in May 2005, but Russia recalled its signature in June 2005 after the Estonian parliament added to its domestic ratification act a historical preamble referencing the Soviet occupation and Estonia's pre-war borders under the 1920 Treaty of Tartu; Russia contends that the preamble allows Estonia to make territorial claims on Russia in the future, while Estonian officials deny that the preamble has any legal impact on the treaty text; Russia demands better treatment

of the Russian-speaking population in Estonia and Latvia; Lithuania and Russia committed to demarcating their boundary in 2006 in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming, as an EU member state with an EU external border, where strict Schengen border rules apply; preparations for the demarcation delimitation of land boundary with Ukraine have commenced; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and on-going expert-level discussions; Kazakhstan and Russia boundary delimitation was ratified on November 2005 and field demarcation should commence in 2007; Russian Duma has not yet ratified 1990 Bering Sea Maritime Boundary Agreement with the US; Denmark (Greenland) and Norway have made submissions to the Commission on the Limits of the Continental shelf (CLCS) and Russia is collecting additional data to augment its 2001 CLCS submission

Refugees and internally displaced persons: IDPs: 8,500-28,450 (displacement from Chechnya and North Ossetia-Alania) (2011)

Trafficking in persons: *current situation:* Russia is a source, transit, and destination country for men, women, and children trafficked for various purposes; people from Russia and other countries, including Belarus, Tajikistan, and Uzbekistan, are subjected to conditions of forced labor in Russia; children are subjected to prostitution in large Russian cities and to forced begging; Russian women were reported to be victims of sex trafficking in many countries, including in Northeast Asia, Europe, and throughout the Middle East
tier rating: Tier 2 Watch List—Russia failed to show evidence of increased efforts to combat trafficking; victim protection in Russia remains very weak, as the government allocated scant funding for victim shelters and little funding for anti-trafficking efforts by governmental or non-governmental organizations; the government did not make discernible efforts to fund a national awareness campaign, although some local efforts were assisted by local government funding (2008)

Illicit drugs: limited cultivation of illicit cannabis and opium poppy and producer of methamphetamine, mostly for domestic consumption; government has active illicit crop eradication program; used as transshipment point for Asian opiates, cannabis, and Latin American cocaine bound for growing domestic markets, to a lesser extent Western and Central Europe, and occasionally to the US; major source of heroin precursor chemicals; corruption and organized crime are key concerns; major consumer of opiates

RWANDA

INTRODUCTION

Background: In 1959, three years before independence from Belgium, the majority ethnic group, the Hutus, overthrew the ruling Tutsi king. Over the next several years, thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF), and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions, culminating in April 1994 in a state-orchestrated genocide, in which Rwandans killed up to a million of their fellow citizens, including approximately three-quarters of the Tutsi population. The genocide ended later that same year when the predominantly Tutsi RPF, operating out of Uganda and northern Rwanda, defeated the national army and Hutu militias, and established an RPF-led government of national unity. Approximately 2 million Hutu refugees—many fearing Tutsi retribution—fled to neighboring Burundi, Tanzania, Uganda, and former Zaire. Since then, most of the refugees have returned to Rwanda, but several thousand remained in the neighboring Democratic Republic of the Congo (DRC, the former Zaire) and formed an extremist insurgency bent on retaking Rwanda, much as the RPF did in 1990. Rwanda held its first local elections in 1999 and its first post-genocide presidential and legislative elections in 2003. Rwanda in 2009 staged a joint military operation with the Congolese Army in DRC to rout out the Hutu extremist insurgency there, and Kigali and Kinshasa restored diplomatic relations. Rwanda also joined the Commonwealth in late 2009. In January 2013, Rwanda assumed a nonpermanent seat on the UN Security Council for the 2013-14 term.

ECONOMY

Economy—overview: Rwanda is a poor rural country with about 90% of the population engaged in (mainly subsistence) agriculture and some mineral and agro-processing. Tourism, minerals, coffee and tea are Rwanda's main sources of foreign exchange. Minerals exports declined 40% in 2009-10 due to the global economic downturn. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and temporarily stalled the country's ability to attract private and external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels. GDP has rebounded with an average annual growth of 7%-8% since 2003 and inflation has been reduced to single digits. Nonetheless, a significant percent of the population still live below the official poverty line. Despite Rwanda's fertile ecosystem, food production often does not keep pace with demand, requiring food imports. Rwanda continues to receive substantial aid money and obtained IMF-World Bank Heavily Indebted Poor Country (HIPC) initiative debt relief in 2005-06. In recognition of Rwanda's successful management of its macro economy, in 2010, the IMF graduated Rwanda to a Policy Support Instrument (PSI). Rwanda also received a Millennium Challenge Threshold Program in 2008. Africa's most densely populated country is trying to overcome the limitations of its small, landlocked economy by leveraging regional trade. Rwanda joined the East African Community and is aligning its budget, trade, and immigration policies with its regional partners.

The government has embraced an expansionary fiscal policy to reduce poverty by improving education, infrastructure, and foreign and domestic investment and pursuing market-oriented reforms. Energy shortages, instability in neighboring states, and lack of adequate transportation linkages to other countries continue to handicap private sector growth. The Rwandan government is seeking to become regional leader in information and

communication technologies. In 2010, Rwanda neared completion of the first modern Special Economic Zone (SEZ) in Kigali. The SEZ seeks to attract investment in all sectors, but specifically in agribusiness, information and communications technologies, trade and logistics, mining, and construction. The global downturn hurt export demand and tourism, but economic growth has recovered, driven in large part by the services sector, but inflation has grown. On the back of this growth, government is gradually ending its fiscal stimulus policy while protecting aid to the poor.

SAINT BARTHELEMY

INTRODUCTION

Background: Discovered in 1493 by Christopher COLUMBUS who named it for his brother Bartolomeo, Saint Barthelemy was first settled by the French in 1648. In 1784, the French sold the island to Sweden, who renamed the largest town Gustavia, after the Swedish King GUSTAV III, and made it a free port; the island prospered as a trade and supply center during the colonial wars of the 18th century. France repurchased the island in 1877 and took control the following year. It was placed under the administration of Guadeloupe. Saint Barthelemy retained its free port status along with various Swedish appellations such as Swedish street and town names, and the three-crown symbol on the coat of arms. In 2003, the populace of the island voted to secede from Guadeloupe and in 2007, the island became a French overseas collectivity.

GEOGRAPHY

Location: Caribbean, island between the Caribbean Sea and the North Atlantic Ocean; located in the Leeward Islands (northern) group; Saint Barthelemy lies east of the US Virgin Islands

ECONOMY

Economy—overview: The economy of Saint Barthelemy is based upon high-end tourism and duty-free luxury commerce, serving visitors primarily from North America. The luxury hotels and villas host 70,000 visitors each year with another 130,000 arriving by boat. The relative isolation and high cost of living inhibits mass tourism. The construction and public sectors also enjoy significant investment in support of tourism. With limited fresh water resources, all food must be imported, as must all energy resources and most manufactured goods. Employment is strong and attracts labor from Brazil and Portugal.

SAINT HELENA, ASCENSION, AND TRISTAN DA CUNHA

INTRODUCTION

Background: Saint Helena is a British Overseas Territory consisting of Saint Helena and Ascension Islands, and the island group of Tristan da Cunha.

Saint Helena: Uninhabited when first discovered by the Portuguese in 1502, Saint Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. During the Anglo-Boer War in

South Africa, several thousand Boer prisoners were confined on the island between 1900 and 1903.

Ascension Island: This barren and uninhabited island was discovered and named by the Portuguese in 1503. The British garrisoned the island in 1815 to prevent a rescue of Napoleon from Saint Helena. It served as a provisioning station for the Royal Navy's West Africa Squadron on anti-slavery patrol. The island remained under Admiralty control until 1922, when it became a dependency of Saint Helena. During World War II, the UK permitted the US to construct an airfield on Ascension in support of transatlantic flights to Africa and anti-submarine operations in the South Atlantic. In the 1960s the island became an important space tracking station for the US. In 1982, Ascension was an essential staging area for British forces during the Falklands War. It remains a critical refueling point in the air-bridge from the UK to the South Atlantic.

Tristan da Cunha: The island group consists of the islands of Tristan da Cunha, Nightingale, Inaccessible, and Gough. Tristan da Cunha is named after its Portuguese discoverer (1506); it was garrisoned by the British in 1816 to prevent any attempt to rescue Napoleon from Saint Helena. Gough and Inaccessible Islands have been designated World Heritage Sites. South Africa leases a site for a meteorological station on Gough Island.

GEOGRAPHY

Location: islands in the South Atlantic Ocean, about midway between South America and Africa; Ascension Island lies 700 nm northwest of Saint Helena; Tristan da Cunha lies 2,300 nm southwest of Saint Helena

Geographic coordinates: Saint Helena: 15 57 S, 5 42 W

Ascension Island: 7 57 S, 14 22 W

Climate: *Saint Helena:* tropical marine; mild, tempered by trade winds

Ascension Island: tropical marine; mild, semi-arid
Tristan da Cunha: temperate marine; mild, tempered by trade winds (tends to be cooler than Saint Helena)

Terrain: the islands of this group result from volcanic activity associated with the Atlantic Mid-Ocean Ridge

Saint Helena: rugged, volcanic; small scattered plateaus and plains

Ascension: surface covered by lava flows and cinder cones of 44 dormant volcanoes; ground rises to the east

Tristan da Cunha: sheer cliffs line the coastline of the nearly circular island; the flanks of the central volcanic peak are deeply dissected; narrow coastal plain lies between The Peak and the coastal cliffs

Elevation extremes: *lowest point:* Atlantic Ocean 0 m

highest point: Queen Mary's Peak on Tristan da Cunha 2,060 m; Green Mountain on Ascension Island 859 m; Mount Actaeon on Saint Helena Island 818 m

SAINT KITTS AND NEVIS

INTRODUCTION

Background: Carib Indians occupied the islands of the West Indies for hundreds of years before the British began settlement in 1623. In 1967, the island territory of Saint Christopher-Nevis-Anguilla became an associated state of the UK with full internal autonomy. The island of Anguilla rebelled and was allowed to secede in 1971. The remaining islands achieved independence in 1983 as Saint Kitts and Nevis. In 1998, a vote in Nevis on a referendum to separate from

Saint Kitts fell short of the two-thirds majority needed. Nevis continues in its efforts to separate from Saint Kitts.

ECONOMY

Economy—overview: The economy of Saint Kitts and Nevis depends on tourism; since the 1970s tourism has replaced sugar as the traditional mainstay of the economy. Following the 2005 harvest, the government closed the sugar industry, after several decades of losses. To compensate for lost jobs, the government has embarked on a program to diversify the agricultural sector and to stimulate other sectors of the economy, such as export-oriented manufacturing and offshore banking. Roughly tourists visited the islands in 2009, but reduced tourism arrivals and foreign investment led to an economic contraction in 2009-2012, and the economy has not yet returned to growth. Like other tourist destinations in the Caribbean, St. Kitts and Nevis is vulnerable to damage from natural disasters and shifts in tourism

demand. Furthermore, the government is constrained by one of the world's highest public debt burdens—equivalent to roughly 140% of GDP in 2012—largely attributable to public enterprise losses.

TRANSNATIONAL ISSUES

Disputes—international: joins other Caribbean states to counter Venezuela's claim that Aves Island sustains human habitation, a criterion under United Nations Convention on the Law of the Sea, which permits Venezuela to extend its Economic Exclusion Zone/continental shelf over a large portion of the eastern Caribbean Sea

Illicit drugs: transshipment point for South American drugs destined for the US and Europe; some money-laundering activity

SAINT LUCIA

INTRODUCTION

Background: The island, with its fine natural harbor at Castries, was contested between England and France throughout the 17th and early 18th centuries (changing possession 14 times); it was finally ceded to the UK in 1814. Even after the abolition of slavery on its plantations in 1834, Saint Lucia remained an agricultural island, dedicated to producing tropical commodity crops. Self-government was granted in 1967 and independence in 1979.

ECONOMY

Economy—overview: The island nation has been able to attract foreign business and investment, especially in its offshore banking and tourism industries. Tourism is Saint Lucia's main source of jobs and income—accounting for 65% of GDP—and the island's main source of foreign exchange earnings. The manufacturing sector is the most diverse in the Eastern Caribbean area. Crops such as bananas, mangos, and avocados continue to be grown for export, but St. Lucia's once solid banana industry has been devastated by strong competition and by Hurricane Tomas in 2010. Saint Lucia is vulnerable to a variety of external shocks, including volatile tourism receipts, natural disasters, and dependence on foreign oil. Furthermore, high public debt—77% of GDP in 2012—and high debt servicing obligations constrain the ANTHONY administration's ability to respond to adverse external shocks. St. Lucia has experienced anemic growth since the onset of the global financial crisis in 2008, largely because of a slow down in tourism. As airlines cut back on their routes to St. Lucia in 2012, tourism growth slowed. Also, St. Lucia

introduced a value added tax in 2012 of 15%, becoming the last country in the Eastern Caribbean to do so.

SAINT MARTIN

INTRODUCTION

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The

Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished Saint Martin to the French and Dutch, who divided it between themselves in 1648. Friction between the two sides caused the border to frequently fluctuate over the next two centuries, with the French eventually holding the greater portion of the island (about 57%). The cultivation of sugar cane introduced African slavery to the island in the late 18th century; the practice was not abolished until 1848. The island became a free port in 1939; the tourism industry was dramatically expanded during the 1970s and 1980s. In 2003, the populace of Saint Martin voted to secede from Guadeloupe and in 2007, the northern portion of the island became a French overseas collectivity. In 2010, the southern Dutch portion of the island became the independent nation of Sint Maarten within the Kingdom of the Netherlands.

ECONOMY

Economy—overview: The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. France heavily subsidizes the islands to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects. Fish farming, crab fishing, and agriculture are being developed to diversify the local economy. Recent test drilling for oil may pave the way for development of the energy sector.

SAINT VINCENT AND THE GRENADINES

INTRODUCTION

Background: Resistance by native Caribs prevented colonization on Saint Vincent until 1719. Disputed between France and the United Kingdom for most of the 18th century, the island was ceded to the latter in 1783. Between 1960 and 1962, Saint Vincent and the Grenadines was a separate administrative unit of the Federation of the West Indies. Autonomy was granted in 1969 and independence in 1979.

GEOGRAPHY

ECONOMY

Economy—overview: Success of the economy hinges upon seasonal variations in agriculture, tourism, and construction activity as well as remittance inflows. Much of the workforce is employed in banana production and tourism, but persistent high unemployment has prompted many to leave the islands. This lower-middle-income country is vulnerable to natural disasters—tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002. In 2008, the islands had more than 200,000 tourist

arrivals, mostly to the Grenadines, a drop of nearly 20% from 2007. Saint Vincent is home to a small offshore banking sector and has moved to adopt international regulatory standards. The government's ability to invest in social programs and respond to external shocks is constrained by its high public debt burden, which was 68% of GDP at the end of 2011. GDP grew on average 6% annually from 2002-07, but contracted between 2008-10 as a result of the global economic downturn; growth remains slow.

SAMOA

INTRODUCTION

Background: New Zealand occupied the German protectorate of Western Samoa at the outbreak of World War I in 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the "Western" from its name in 1997.

ECONOMY

Economy—overview: The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, agriculture, and fishing. The country is vulnerable to devastating storms. Agriculture employs roughly two-thirds of the labor force and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. One factory in the Foreign Trade Zone employs 3,000 people to make automobile electrical harnesses for an assembly plant in Australia. Tourism is an expanding sector accounting for 25% of GDP; 122,000 tourists visited the islands in 2007. In late September 2009, an earthquake and the resulting tsunami severely damaged Samoa, and nearby American Samoa, disrupting

transportation and power generation, and resulting in about 200 deaths. In December 2012, extensive flooding and wind damage from Tropical Cyclone Evan killed four people, displaced over 6,000, and damaged or destroyed an estimated 1,500 homes in Samoa's Upolu island. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline, while at the same time protecting the environment. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

SAN MARINO

INTRODUCTION

Background: Geographically the third smallest state in Europe (after the Holy See and Monaco), San Marino also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named Marinus in A.D. 301. San Marino's foreign policy is aligned with that of the European Union, although it is not a member; social and political trends in the republic track closely with those of its larger neighbor, Italy.

ECONOMY

Economy—overview: San Marino's economy relies heavily on tourism, the banking industry and the manufacture and export of ceramics, clothing, fabrics, furniture, paints, spirits, tiles, and wine. The manufacturing and financial sectors account for more than half of San Marino's GDP. The per capita level of output and standard of living are comparable to those of the most prosperous regions of Italy. The economy benefits from foreign investment due to its relatively low corporate taxes and low taxes on interest earnings. The income tax rate is also very low, about one-third the average EU level. San Marino does not issue public debt securities; when necessary, it finances deficits by drawing down central bank deposits. San Marino's economy has encountered five years' of GDP contraction, largely due to weakened demand from Italy—which accounts for 90% of its export market—and financial sector consolidation. Difficulties in the banking sector, the recent global economic downturn, and the sizeable decline in tax revenues have contributed to negative real GDP growth. The government has adopted measures to counter the economic downturn, including subsidized credit to businesses. For the first time since 2009, there were signs of improvements in the financial sector in the third quarter of 2012. San Marino continues to work towards harmonizing its fiscal laws with EU and international standards. In September 2009, the OECD removed San Marino from its list of tax havens that have yet to fully adopt global tax standards, and in 2010 San Marino signed Tax Information Exchange Agreements with most major countries. San Marino's government continues to work with Italy to ratify a financial information exchange agreement, seen by businesses and investors as crucial to strengthening the economic relationship between the two countries.

SAO TOME AND PRINCEPE

INTRODUCTION

Background: Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century—all grown with African plantation slave labor, a form of which lingered into the 20th century. While independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. The country held its first free elections in 1991, but frequent internal wrangling between the various political parties precipitated repeated changes in leadership and two failed coup attempts in 1995 and 2003. In 2012, three opposition parties combined in a no confidence vote to bring down the majority government of former Prime Minister Patrice TROVOADA. The new government of Prime Minister Gabriel Arcanjo Ferreira DA COSTA is entirely composed of opposition party members with limited experience in governance. The recent discovery of oil in the Gulf of Guinea promises to attract increased attention to the small island nation.

Flag description: three horizontal bands of green (top), yellow (double width), and green with two black five-pointed stars placed side by side in the center of the yellow band and a red isosceles triangle based on the hoist side; green stands for the country's rich vegetation, red recalls the struggle for independence, and yellow represents cocoa, one of the country's main agricultural products; the two stars symbolize the two main islands
note: uses the popular Pan-African colors of Ethiopia

National anthem: name: "Independencia total" (Total Independence)

lyrics/music: Alda Neves DA GRACA do Espirito Santo/Manuel dos Santos Barreto de Sousa e ALMEIDA

note: adopted 1975

ECONOMY

Economy—overview: This small, poor island economy has become increasingly dependent on cocoa since independence in 1975. Cocoa production has substantially declined in recent years because of drought and mismanagement. Sao Tome and Principe has to import fuels, most manufactured goods, consumer goods, and a substantial amount of food, making it vulnerable to fluctuations in global commodity prices. Over the years, it has had difficulty servicing its external debt and has relied heavily on concessional aid and debt rescheduling. Sao Tome and Principe benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program, which helped bring down the country's \$300 million debt burden. In August 2005, the government signed on to a new 3-year IMF Poverty Reduction and Growth Facility (PRGF) program worth \$4.3 million. In April 2011 the country completed a Threshold Country Program with The Millennium

Challenge Corporation to help increase tax revenues, reform customs, and improve the business environment. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies. Potential exists for the development of petroleum resources in Sao Tome and Principe's territorial waters in the oil-rich Gulf of Guinea, which are being jointly developed in a 60-40 split with Nigeria, but any actual production is at least several years off. The first production licenses were sold in 2004, though a dispute over licensing with Nigeria delayed the country's receipt of more than \$20 million in signing bonuses for almost a year. Maintaining control of inflation, fiscal discipline, and increasing flows of foreign direct investment into the oil sector are the major economic problems facing the country.

Military—note: Sao Tome and Principe's army is a tiny force with almost no resources at its disposal and would be wholly ineffective operating unilaterally; infantry equipment is considered simple to operate and maintain but may require refurbishment or replacement after 25 years in tropical climates; poor pay, working conditions, and alleged nepotism in the promotion of officers have been problems in the past, as reflected in the 1995 and 2003 coups; these issues are being addressed with foreign assistance aimed at improving the army and its focus on realistic security concerns; command is exercised from the president, through the Minister of Defense, to the Chief of the Armed Forces staff (2005)

SAUDI ARABIA

INTRODUCTION

Background: Saudi Arabia is the birthplace of Islam and home to Islam's two holiest shrines in Mecca and Medina. The king's official title is the Custodian of the Two Holy Mosques. The modern Saudi state was founded in 1932 by ABD AL-AZIZ bin Abd al-Rahman Al SAUD (Ibn Saud) after a 30-year campaign to unify most of the Arabian Peninsula. One of his male descendants rules the country today, as required by the country's 1992 Basic Law. King ABDAL-LAH bin Abd al-Aziz ascended to the throne in 2005. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. The continuing presence of foreign troops on Saudi soil after the liberation of Kuwait became

a source of tension between the royal family and the public until all operational US troops left the country in 2003. Major terrorist attacks in May and November 2003 spurred a strong ongoing campaign against domestic terrorism and extremism. King ABDALLAH has continued the cautious reform program begun when he was crown prince. The king instituted an interfaith dialogue initiative in 2008 to encourage religious tolerance on a global level; in 2009, he reshuffled the cabinet, which led to more moderates holding ministerial and judicial positions, and appointed the first female to the cabinet. The 2010-12 uprisings across Middle Eastern and North African countries sparked modest incidents in Saudi cities, predominantly by Shia demonstrators calling for the release of detainees and the withdrawal from Bahrain of the Gulf Cooperation Council's Peninsula Shield Force. Protests in general were met by a strong police presence, with some arrests, but not the level of bloodshed seen in protests elsewhere in the region. In response to the unrest, King ABDALLAH in February and March 2011 announced a series of benefits to Saudi citizens including funds to build affordable housing, salary increases for government workers, and unemployment entitlements. To promote increased political participation, the government held elections nationwide in September 2011 for half the members of 285 municipal councils. Also in September, the king announced that women will be allowed to run for and vote in future municipal elections—first held in 2005—and serve as full members of the advisory Consultative Council. During 2012, Shia protests increased in violence, while peaceful Sunni protests expanded. The country remains a leading producer of oil and natural gas

and holds about 17% of the world's proven oil reserves. The government continues to pursue economic reform and diversification, particularly since Saudi Arabia's accession to the WTO in December 2005, and promotes foreign investment in the kingdom. A burgeoning population, aquifer depletion, and an economy largely dependent on petroleum output and prices are ongoing governmental concerns.

Flag description: green, a traditional color in Islamic flags, with the Shahada or Muslim creed in large white Arabic script (translated as "There is no god but God; Muhammad is the Messenger of God") above a white horizontal saber (the tip points to the hoist side); design dates to the early twentieth century and is closely associated with the Al Saud family which established the kingdom in 1932; the flag is manufactured with differing obverse and reverse sides so that the Shahada reads—and the sword points—correctly from right to left on both sides

—note: one of only three national flags that differ on their obverse and reverse sides—the others are Moldova and Paraguay

National symbol(s): palm tree surmounting two crossed swords

National anthem: name: "Aash Al Maleek" (Long Live Our Beloved King)
lyrics/music: Ibrahim KHAFAJI/Abdul Rahman al-KHATEEB •

note: music adopted 1947, lyrics adopted 1984

ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 80% of budget revenues, 45% of GDP, and 90% of export earnings. Saudi Arabia is encouraging the growth of the private sector in order to diversify its economy and to employ more Saudi nationals. Diversification efforts are focusing on power generation, telecommunications, natural gas exploration, and petrochemical sectors. Over 5 million foreign workers play an important role in the Saudi economy, particularly in the oil and service sectors, while Riyadh is struggling to reduce unemployment among its own nationals. Saudi officials are particularly focused on employing its large youth population, which generally lacks the education and technical skills the private sector needs. Riyadh has substantially boosted spending on job training and education, most recently with the opening of the King Abdallah University of Science and Technology—Saudi Arabia's first co-educational university. As part of its effort to attract foreign investment, Saudi Arabia acceded to the WTO in 2005. The government has begun establishing six "economic cities" in different regions of the country to promote foreign investment and plans to spend \$373 billion between 2010 and 2014 on social development and infrastructure projects to advance Saudi Arabia's economic development.

TRANSNATIONAL ISSUES

Disputes—international: Saudi Arabia has reinforced its concrete-filled security barrier along sections of the now fully demarcated border with Yemen to stem illegal cross-border activities; Kuwait and Saudi Arabia continue discussions on a maritime boundary with Iran; Saudi Arabia claims Egyptian-administered islands of Tiran and Sanafir

Refugees and internally displaced persons: refugees (country of origin): 291,000 (Palestinian Territories) (2009)

Trafficking in persons: current situation: Saudi Arabia is a destination country for men and women subjected to forced labor and to a much lesser extent, forced prostitution; men and women from Bangladesh, India, Sri Lanka, Nepal, Pakistan, the Philippines, Indonesia, Sudan, Ethiopia, Kenya, and many other countries voluntarily travel to Saudi Arabia as domestic servants or other low-skilled laborers, but some subsequently face conditions indicative of involuntary servitude; women, primarily from Asian and African

countries, were believed to have been forced into prostitution in Saudi Arabia; others were reportedly kidnapped and forced into prostitution after running away from abusive employers; Yemeni, Nigerian, Pakistani, Afghan, Chadian, and Sudanese children were subjected to forced labor as beggars and street vendors in Saudi Arabia, facilitated by criminal gangs; some Saudi nationals travel to destinations including Morocco, Egypt, Yemen, Afghanistan, Pakistan, India, and Bangladesh to solicit prostitution

tier rating: Tier 3—Saudi Arabia does not fully comply with the minimum standards for the elimination of trafficking and is not making significant

efforts to do so; however, the government undertook some efforts to improve its response to the vast human trafficking problem in Saudi Arabia, including training government officials on its 2009 anti-trafficking law and conducting surprise visits to places where victims may be found; it also achieved its first conviction under its human trafficking law; nonetheless, the government did not prosecute and punish a significant number of trafficking offenders or significantly improve victim protection services (2008)

Illicit drugs: death penalty for traffickers; improving anti-money-laundering legislation and enforcement

SENEGAL

INTRODUCTION

Background: The French colonies of Senegal and the French Sudan were merged in 1959 and granted their independence as the Mali Federation in 1960. The union broke up after only a few months. Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. The envisaged integration of the two countries was never carried out, and the union was dissolved in 1989. The Movement of Democratic Forces in the Casamance (MFDC) has led a low-level separatist insurgency in southern Senegal since the 1980s, and several peace deals have failed to resolve the conflict. Nevertheless, Senegal remains one of the most stable democracies in Africa and has a long history of participating in international peacekeeping and regional mediation. Senegal was ruled by a Socialist Party for 40 years until Abdoulaye WADE was elected president in 2000. He was reelected in 2007 and during his two terms amended Senegal's constitution over a dozen times to increase executive power and to weaken the opposition. His decision to run for a third presidential term sparked a large public backlash that led to his defeat in a March 2012 runoff election with Macky SALL.

ECONOMY

Economy—overview: Senegal relies heavily on donor assistance and foreign direct investment. The country's key export industries are phosphate mining, fertilizer production, and commercial fishing. The country is also working on iron ore and oil exploration projects. After seeing its economy contract by 2.1% in 1993, Senegal made an important turnaround, thanks to an economic reform program backed by the donor community, which led to real growth in GDP averaging over 5% annually during 1995-2007. Annual inflation was pushed down to the single digits. The global economic downturn reduced growth to 2.2% in 2009. The IMF completed a non-dispersing, Policy Support Initiative program in 2010 and approved a new three-year policy support instrument in December 2010 to assist with economic reforms. Senegal also receives disbursements from a \$540 million Millennium Challenge Account for infrastructure and agriculture development. In 2012, the economy began to rebound after a weak 2011. The economy continues to suffer from unreliable power supply, which has led to public protests and high unemployment and has prompted migrants to flee Senegal in search of better job opportunities in Europe.

SERBIA

INTRODUCTION

Background: The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Various paramilitary bands resisted Nazi Germany's occupation and division of Yugoslavia from 1941 to 1945, but fought each other and ethnic opponents as much as the invaders. The military and political movement headed by Josip "TITO" Broz (Partisans) took full control of Yugoslavia when German and Croatian separatist forces were defeated in 1945. Although Communist, TITO's new government and his successors (he died in 1980) managed to steer their own path between the Warsaw Pact nations and the West for the next four and a half decades. In 1989, Slobodan MILOSEVIC became president of the Republic of Serbia and his ultranationalist calls for Serbian domination led to the violent breakup of Yugoslavia along ethnic lines. In 1991, Croatia, Slovenia, and Macedonia declared independence, followed by Bosnia in 1992. The remaining republics of Serbia and Montenegro declared a new Federal Republic of Yugoslavia (FRY) in April 1992 and under MILOSEVIC's leadership, Serbia led various military campaigns to upite ethnic Serbs in neighboring republics into a "Greater Serbia." These actions were ultimately unsuccessful and led to the signing of the Dayton Peace Accords in 1995. MILOSEVIC retained control over Serbia and eventually became president of the FRY in 1997. In 1998, an ethnic Albanian insurgency in the formerly autonomous Serbian province of Kosovo provoked a Serbian counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians living in Kosovo. The MILOSEVIC government's rejection of a proposed international settlement led to NATO's bombing of Serbia in the spring of 1999, to the withdrawal of Serbian military and police forces from Kosovo in June 1999, and to the stationing of a NATO-led force in Kosovo to provide a safe and secure environment for the region's ethnic communities. FRY elections in late 2000 led to the ouster of MILOSEVIC and the installation of democratic government. In 2003, the FRY became Serbia and Montenegro, a loose federation of the two republics. Widespread violence

predominantly targeting ethnic Serbs in Kosovo in March 2004 caused the international community to open negotiations on the future status of Kosovo in January 2006. In June 2006, Montenegro seceded from the federation and declared itself an independent nation. Serbia subsequently gave notice that it was the successor state to the union of Serbia and Montenegro. In February 2008, after nearly two years of inconclusive negotiations, the UN-administered province of Kosovo declared itself independent of Serbia—an action Serbia refuses to recognize. At Serbia's request, the UN General Assembly (UNGA) in October 2008 sought an advisory opinion from the International Court of Justice (ICJ) on whether Kosovo's unilateral declaration of independence was in accordance with international law. In a ruling considered unfavorable to Serbia, the ICJ issued an advisory opinion in July 2010 stating that international law did not prohibit declarations of independence. In late 2010, Serbia agreed to an EU-drafted UNGA Resolution acknowledging the ICJ's decision and calling for a new round of talks between Serbia and Kosovo, this time on practical issues rather than Kosovo's status. The EU-moderated Belgrade-Pristina dialogue began in March 2011 and was raised to the level of prime ministers in October 2012.

Flag description: three equal horizontal stripes of red (top), blue, and white—the Pan-Slav colors representing freedom and revolutionary ideals; charged with the coat of arms of Serbia shifted slightly to the hoist side; the principal field of the coat of arms represents the Serbian state and

displays a white two-headed eagle on a red shield; a smaller red shield on the eagle represents the Serbian nation, and is divided into four quarters by a white cross; interpretations vary as to the meaning and origin of the white, curved symbols resembling firesteels or Cyrillic "C's" in each quarter; a royal crown surmounts the coat of arms

note: the Pan-Slav colors were inspired by the 19th-century flag of Russia

National symbol(s): double-headed eagle

National anthem: *name:* "Boze pravde" (God of Justice)

lyrics/music: Jovan DORDEVIC/Davorin JENKO
note: adopted 1904; the song was originally written as part of a play in 1872 and has been used by the Serbian people throughout the 20th and 21st centuries

ECONOMY

Economy—overview: Serbia has a transitional economy mostly dominated by market forces, but the state sector remains large and many institutional reforms are needed. The economy relies on manufacturing and exports, driven largely by foreign investment. MILOSEVIC-era mismanagement of the economy, an extended period of international economic sanctions, civil war, and the damage to Yugoslavia's infrastructure and industry during the NATO airstrikes in 1999 left the economy only half the size it was in 1990. After the ousting of former Federal Yugoslav President MILOSEVIC in September 2000, the Democratic Opposition of Serbia (DOS) coalition government implemented stabilization measures and embarked on a market reform program. After renewing its membership in the IMF in December 2000, Serbia continued to reintegrate into the international community by rejoining the World Bank (IBRD) and the European Bank for Reconstruction and Development (EBRD). Serbia has made progress in trade liberalization and enterprise restructuring and privatization, but many large enterprises—including the power utilities, telecommunications company, natural gas company, national air carrier, and others—remain in state hands. Serbia has made some progress towards EU membership, signing a Stabilization and Association Agreement with Brussels in May 2008, and with full implementation of the Interim Trade Agreement with the EU in February 2010, gained candidate status in March 2012. Serbia's negotiations with the World Trade Organization are advanced, with the country's complete ban on the trade and cultivation of agricultural biotechnology products representing the primary remaining obstacle to accession. Serbia's program with the IMF was frozen in early 2012 because the 2012 budget approved by parliament deviated from the program parameters; the arrangement is now void. High unemployment and stagnant household incomes are ongoing political and economic problems. Structural economic reforms needed to ensure the country's long-term prosperity have largely stalled since the onset of the global financial crisis. The economy slipped by an estimated 2.0% in 2012, following growth of 1.6% in 2011, 1.0% in 2010, and a 3.5% contraction in 2009. Growing deficits constrain the use of stimulus efforts to revive the economy and contribute to growing concern of a public debt crisis, given that Serbia's total public debt as a share of

GDP doubled between 2008 and 2012, reaching 61.5% of GDP at the end of 2012. Further, Serbia's concerns about inflation and exchange rate stability preclude the use of expansionary monetary policy. Serbia adopted a new long-term economic growth plan in 2010 that calls for a quadrupling of exports over ten years and heavy investments in basic infrastructure. In 2012, however, exports fell by 3.6% compared to 2011, largely as a result of the halt in production at the former US Steel plant and a summer drought that slashed agricultural production. Major challenges ahead include: high unemployment rates and the need for job creation; high government expenditures for salaries, pensions, and unemployment benefits; a growing need for new government borrowing; rising public and private foreign debt; attracting new foreign direct investment; and getting the IMF program back on track. Other serious challenges include an inefficient judicial system, high levels of corruption, and an aging population. Factors favorable to Serbia's economic growth include a strategic location, a relatively inexpensive and skilled labor force, and free trade agreements with the EU, Russia, Turkey, and countries that are members of the Central European Free Trade Agreement (CEFTA).

SEYCHELLES

INTRODUCTION

Background: A lengthy struggle between France and Great Britain for the islands ended in 1814, when they were ceded to the latter. Independence came in 1976. Socialist rule was brought to a close with a new constitution and free elections in 1993. President France-Albert RENE, who had served since 1977, was re-elected in 2001, but stepped down in 2004. Vice President James MICHEL took over the presidency and in July 2006 was elected to a new five-year term; he was reelected in May 2011.

ECONOMY

Economy—overview: since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle-income group of countries. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. In July 2008 the government defaulted on a Euro amortizing note worth roughly US\$80 million, leading to a downgrading of Seychelles credit rating. In an effort to obtain loans to service its debt, Seychelles in November 2008 signed a standby arrangement with the IMF that mandated floating the exchange rate, removing foreign exchange controls, cutting government spending, and tightening monetary policy. In response to Seychelles' successful implementation of these policies, the IMF upgraded Seychelles to a three-year extended fund facility (EFF) of \$31 million in December 2009. In 2008, GDP fell more than 1% due to declining tourism and the initial effects of liberalization, but the economy recovered in 2010-11 after the reforms took hold and tourism increased. Growth slowed again in 2012 with flagging tourism from Russia and the United Arab Emirates. Seychelles is attempting to implement further structural reforms, including overhauling the tax system, reorganizing of state enterprises, and deregulating the finance and communications sectors.

SIERRA LEONE

INTRODUCTION

Background: Democracy is slowly being reestablished after the civil war from 1991 to 2002 that resulted in tens of thousands of deaths and the displacement of more than 2 million people (about a third of the population). The military, which took over full responsibility for security following the departure of UN peacekeepers at the end of 2005, is increasingly developing as a guarantor of the country's stability. The armed forces remained on the sideline during the 2007 and 2012 national elections but still look to the UN Integrated Peace building Office in Sierra Leone (UNIPSIL)—a civilian UN mission—to support efforts to consolidate peace. The new government's priorities include furthering development, creating jobs, and stamping out endemic corruption.

ECONOMY

Economy—overview: Sierra Leone is an extremely poor nation with tremendous inequality in income distribution. While it possesses substantial mineral, agricultural, and fishery resources, its physical and social infrastructure has yet to recover from the civil war, and serious social disorders continue to hamper economic development. Nearly

half of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Alluvial diamond mining remains the major source of hard currency earnings, accounting for nearly half of Sierra Leone's exports. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad, which is essential to offset the severe trade imbalance and supplement government revenues. The IMF completed a Poverty Reduction and Growth Facility program that helped stabilize economic growth and reduce inflation and in 2010 approved a new program worth \$45 million over three years. Political stability has led to a revival of economic activity such as the rehabilitation of bauxite and rutile mining, which are set to benefit from planned tax incentives. A number of offshore oil discoveries were announced in 2009 and 2010. The development on these reserves, which could be significant, is still several years away, however, growth skyrocketed to more than 20% in 2012, as exploitation activities began.

TRANSNATIONAL ISSUES

Disputes—international: as domestic fighting among disparate ethnic groups, rebel groups, warlords, and youth gangs in Cote d'Ivoire, Guinea, Liberia, and Sierra Leone gradually abates, the number of refugees in border areas has begun to slowly dwindle; Sierra Leone considers excessive Guinea's definition of the flood plain limits to define the left bank boundary of the Makona and Moa rivers and protests Guinea's continued occupation of these lands including the hamlet of Yenga occupied since 1998

Refugees and internally displaced persons: refugees (country of origin): 8,046 (Liberia) (2011)

SINGAPORE

INTRODUCTION

Background: Singapore was founded as a British trading colony in 1819. It joined the Malaysian Federation in 1963 but separated two years later and became independent. Singapore subsequently became one of the world's most prosperous countries with strong international trading links (its port is one of the world's busiest in terms of tonnage handled) and with per capita GDP equal to that of the leading nations of Western Europe.

ECONOMY

Economy—overview: Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. The economy depends heavily on exports, particularly in consumer electronics, information technology products, pharmaceuticals, and on a growing financial services sector. Real GDP growth averaged 8.6% between 2004 and 2007. The economy contracted 0.8% in 2009 as a result of the global financial crisis, but rebounded 14.8% in 2010, on the strength of renewed exports, before slowing to 5.2% in 2011 and 1.3% in 2012, largely a result of soft demand for exports during the second European recession. Over the longer term, the government hopes to establish a new growth path that focuses on raising productivity, which has sunk to an average of about 1.0% in the last decade. Singapore has attracted major investments in pharmaceuticals and medical technology production and will continue efforts to establish Singapore as Southeast Asia's financial and high-tech hub.

TRANSNATIONAL ISSUES

Disputes—international: disputes persist with Malaysia over deliveries of fresh water to Singapore, Singapore's extensive land reclamation works, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; piracy remains a problem in the Malacca Strait

Illicit drugs: drug abuse limited because of aggressive law enforcement efforts; as a transportation and financial services hub, Singapore is vulnerable, despite strict laws and enforcement, as a venue for money laundering

SLOVAKIA

INTRODUCTION

Background: Slovakia's roots can be traced to the 9th century state of Great Moravia. Subsequently, the Slovaks became part of the Hungarian Kingdom, where they remained for the next 1,000 years. Following the formation of the dual Austro-Hungarian monarchy in 1867, language and education policies favoring the use of Hungarian

(Magyarization) resulted in a strengthening of Slovak nationalism and a cultivation of cultural ties with the closely related Czechs, who were under Austrian rule. After the dissolution of the Austro-Hungarian Empire at the close of World War I, the Slovaks joined the Czechs to form Czechoslovakia. During the interwar period, Slovak nationalist leaders pushed for autonomy within Czechoslovakia, and in 1939 Slovakia became an independent

state allied with Nazi Germany. Following World War II, Czechoslovakia was reconstituted and came under communist rule within Soviet-dominated Eastern Europe. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize communist rule and create "socialism with a human face," ushering in a period of repression known as "normalization." The peaceful "Velvet Revolution" swept the

Communist Party from power at the end of 1989 and inaugurated a return to democratic rule and a market economy. On 1 January 1993, the country underwent a nonviolent "velvet divorce" into its two national components, Slovakia and the Czech Republic. Slovakia joined both NATO and the EU in the spring of 2004 and the euro zone on 1 January 2009.

National anthem: *name:* "Nad Tatrou sa blýska" (Lightning Over the Tatras)

lyrics/music: Janko MATUSKA/traditional

note: adopted 1993, in use since 1844; the anthem's music is based on the Slovak folk song "Kopala studienku"

ECONOMY

Economy—overview: Slovakia has made significant economic reforms since its separation from the Czech Republic in 1993. Reforms to the taxation, healthcare, pension, and social welfare systems helped Slovakia consolidate its budget and get on track to join the EU in 2004 after a period

of relative stagnation in the early and mid 1990s and to adopt the euro in January 2009. Major privatizations are nearly complete, the banking sector is almost entirely in foreign hands, and the government has helped facilitate a foreign investment boom with business friendly policies. Slovakia's economic growth exceeded expectations in 2001-08 despite a general European slowdown. Foreign direct investment (FDI), especially in the automotive and electronic sectors, fueled much of the growth until 2008. Cheap and skilled labor, low taxes, no dividend taxes, a relatively liberal labor code and a favorable geographical location are Slovakia's main advantages for foreign investors. The economy contracted 5% in 2009 primarily as a result of smaller inflows of FDI and reduced demand for Slovakia's exports before rebounding in 2010-11, but growth slowed in 2012 due to weakening external demand. The government of Prime Minister Robert FICO in 2012 implemented tax increases on higher-earning individuals and corporations, effectively scrapping Slovakia's flat tax to help meet budget deficit targets of 4.9% of GDP in 2012 and 3% of GDP in 2013.

A map of Slovenia with a scale bar at the top left indicating 0, 20, and 40 km. The map shows the borders with Austria to the north and Croatia to the south. Major cities marked with dots include Trieste, Jesenice, Kranj, Kamnik, Velenje, Celje, Trbovlje, Ljubljana (marked with a star), Nova Gorica, Koper, Novo Mesto, Maribor, and Ptuj. The Sava River is shown flowing through the eastern part of the country. The word 'SLOVENIA' is written in large, bold, capital letters across the center of the map.

Background: The Slovene lands were part of the Austro-Hungarian Empire until the latter's dissolution at the end of World War I. In 1918, the Slovenes joined the Serbs and Croats in forming a new multinational state, which was named Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power by the majority Serbs, the Slovenes succeeded in establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy

Geography—note: despite its small size, this eastern Alpine country controls some of Europe's major transit routes

Flag description: three equal horizontal bands of white (top), blue, and red, derive from the medieval coat of arms of the Duchy of Carniola; the Slovenian seal (a shield with the image of Triglav, Slovenia's highest peak, in white against a blue background at the center; beneath it are two wavy blue lines depicting seas and rivers, and above it are three six-pointed stars arranged in an inverted triangle, which are taken from the coat of arms of the Counts of Celje, the great Slovene dynastic house of the late 14th and early 15th centuries) appears in the upper hoist side of the flag centered on the white and blue bands

National symbol(s): Mount Triglav

National anthem: *name:* "Zdravljica" (A Toast)
lyrics/music: France PRESEREN/Stanko PREMRL

note: adopted 1989; the anthem was originally written in 1848; the full poem, whose seventh verse is used as the anthem, speaks of pan-Slavic nationalism

ECONOMY

Economy—overview: Slovenia became the first 2004 European Union entrant to adopt the euro (on 1 January 2007) and has experienced one of the most stable political and economic transitions in Central and Southeastern Europe. With the highest per capita GDP in Central Europe, Slovenia has excellent infrastructure, a well-educated work force, and a strategic location between the Balkans and Western Europe. Privatization has lagged since 2002, and the economy has one of the highest levels of state control in the EU. Structural reforms to improve the business environment have allowed for somewhat greater foreign participation in Slovenia's economy and helped to lower unemployment. In March 2004, Slovenia became the first transition country to graduate from borrower status to donor partner at the World Bank. In 2007, Slovenia was invited to begin the process for joining the OECD; it became a member in 2012. Despite its economic success, foreign direct investment (FDI) in Slovenia has lagged behind the region average, and taxes remain relatively high. Furthermore,

the labor market is often seen as inflexible, and legacy industries are losing sales to more competitive firms in China, India, and elsewhere. In 2009, the global recession caused the economy to contract—through falling exports and industrial production—by 8%, and unemployment to rise. Although growth resumed in 2010, it dipped into negative territory in 2012 and the unemployment rate continued to rise, approaching 12% in 2012.

TRANSNATIONAL ISSUES

Disputes—International: the Croatia-Slovenia land and maritime boundary agreement, which would have ceded most of Piran Bay and maritime access to Slovenia and several villages to Croatia, remains unratified and in dispute; Slovenia also protests Croatia's 2003 claim to an exclusive economic zone in the Adriatic; as a member state that forms part of the EU's external border, Slovenia has implemented the strict Schengen border rules to curb illegal migration and commerce through southeastern Europe while encouraging close cross-border ties with Croatia

Illicit drugs: minor transit point for cocaine and Southwest Asian heroin bound for Western Europe, and for precursor chemicals

SOLOMON ISLANDS

INTRODUCTION

Background: The UK established a protectorate over the Solomon Islands in the 1890s. Some of the most bitter fighting of World War II occurred on this archipelago. Self-government was achieved in 1976 and independence two years later. Ethnic violence, government malfeasance, and endemic crime have undermined stability and civil society. In June 2003, then Prime Minister Sir Allan KEMAKEZA sought the assistance of Australia in reestablishing law and order; the following month, an Australian-led multinational force arrived to restore peace and disarm ethnic militias. The Regional Assistance Mission to the Solomon Islands (RAMSI) has generally been effective in restoring law and order and rebuilding government institutions.

ECONOMY

Economy—overview: The bulk of the population depends on agriculture, fishing, and forestry for at least part of its livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Prior to the arrival of The Regional Assistance Mission to the Solomon Islands (RAMSI), severe ethnic violence, the closing of key businesses, and an empty government treasury culminated in economic collapse. RAMSI's efforts to restore law and order and economic

stability have led to modest growth as the economy rebuilds.

SOMALIA

INTRODUCTION

Background: Britain withdrew from British Somaliland in 1960 to allow its protectorate to join with Italian Somaliland and form the new nation of Somalia. In 1969, a coup headed by Mohamed SIAD Barre ushered in an authoritarian socialist rule characterized by the persecution, jailing, and torture of political opponents and dissidents. After the regime's collapse early in 1991, Somalia descended into turmoil, factional fighting, and anarchy. In May 1991, northern clans declared an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence and continues efforts to establish a constitutional democracy, including holding municipal, parliamentary, and presidential elections. The regions of Bari, Nugaal, and northern Mudug comprise a neighboring semi-autonomous state of Puntland, which has been self-governing since 1998 but does not aim at independence; it has also made strides toward reconstructing a legitimate, representative government but has suffered some civil strife. Puntland disputes its border with Somaliland as it also claims portions of eastern Sool and Sanaag. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. In 2000, the Somalia National Peace Conference (SNPC) held in Djibouti resulted in the formation of an interim government, known as the Transitional National Government (TNG). When the TNG failed to establish

adequate security or governing institutions, the Government of Kenya, under the auspices of the Intergovernmental Authority on Development (IGAD), led a subsequent peace process that concluded in October 2004 with the election of Abdullahi YUSUF Ahmed as President of a second interim government, known as the Transitional Federal Government (TFG) of the Somali Republic. The TFG included a 275-member parliamentary body, known as the Transitional Federal Parliament (TFP). President YUSUF resigned late in 2008 while United Nations-sponsored talks between the TFG and the opposition Alliance for the Re-Liberation of Somalia (ARS) were underway in Djibouti. In January 2009, following the creation of a TFG-ARS unity government, Ethiopian military forces, which had entered Somalia in December 2006 to support the TFG in the face of advances by the opposition Islamic Courts Union (ICU), withdrew from the country. The TFP was doubled in size to 550 seats with the addition of 200 ARS and 75 civil society members of parliament. The expanded parliament elected Sheikh SHARIF Sheikh Ahmed, the former ICU and ARS chairman as president in January 2009. The creation of the TFG was based on the Transitional Federal Charter (TFC), which outlined a five-year mandate leading to the establishment of a new Somali constitution and a transition to a representative government following national elections. In 2009, the TFP amended the TFC to extend TFG's mandate until 2011 and in 2011 Somali principals agreed to institute political transition by August 2012. The transition process ended in September 2012 when clan elders appointed 275 members to a new parliament replacing the TFP and the subsequent election, by parliament, of a new president.

Government—note: regional and local governing bodies continue to exist and control various areas of the country, including the self-declared Republic of Somaliland in northwestern Somalia and the semi-autonomous State of Puntland in northeastern Somalia

ECONOMY

Economy—overview: Despite the lack of effective national governance, Somalia has maintained a healthy informal economy, largely based on livestock, remittance/money transfer companies, and telecommunications. Agriculture is the most important sector with livestock normally accounting for about 40% of GDP and more than 50% of export earnings. Nomads and semi-pastoralists, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar, sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and the machinery sold as scrap metal. Somalia's service sector has grown. Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money transfer/remittance services have sprouted throughout the country, handling up to \$1.6 billion in remittances annually. Mogadishu's main market offers a variety of goods from food to the newest electronic gadgets. Hotels continue to operate and are supported with private-security militias. Somalia's arrears to the IMF have continued to grow. Somalia's capital city—Mogadishu—has enjoyed a rebirth following the departure of al-Shabaab in August 2011. Mogadishu has witnessed the development of the city's first gas stations, supermarkets, and flights between Europe (Istanbul-Mogadishu) since the collapse of central authority in 1991. This economic growth has yet to expand outside of Mogadishu.

Transportation—note: despite a dramatic drop in the number of attacks in 2012, the International Maritime Bureau continues to report the territorial and offshore waters in the Gulf of Aden and Indian Ocean as a region of significant risk for piracy and armed robbery against ships accounting for 25% of all attacks in 2012; 75 vessels, including commercial shipping and pleasure craft, were attacked or hijacked both at anchor and while underway compared with 237 in 2011; the number of hijackings off the coast of Somalia was reduced to 14 in 2012, down from 28 in 2011; as of April 2013, 77 vessels and 7 hostages were being held for ransom by Somali pirates; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators, including the use of on-board armed security teams, have reduced piracy incidents in that body of water; in response Somali-based pirates, using hijacked fishing trawlers as “mother ships” to extend their range, shifted operations as far south as the Mozambique Channel, eastward to

the vicinity of the Maldives, and northeastward to the Strait of Hormuz

TRANSNATIONAL ISSUES

Disputes—international: Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; “Somaliland” secessionists provide port facilities in Berbera to landlocked Ethiopia and have established commercial ties with other regional states; “Puntland” and “Somaliland” “governments” seek international support in their secessionist aspirations and overlapping border claims; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia’s Ogaden and southern Somalia’s Oromo region; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading south across the border, which has long been open to nomadic pastoralists

Refugees and internally displaced persons: IDPs: 1.1 million (civil war since 1988, clan-based competition for resources; 2011 famine; insecurity because of fighting between al-Shabaab and TFG allied forces) (2012)

SOUTH AFRICA

INTRODUCTION

Background: Dutch traders landed at the southern tip of modern day South Africa in 1652 and established a stopover point on the spice route between the Netherlands and the Far East, founding the city of Cape Town. After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Boers resisted British encroachments but were defeated in the Boer War (1899-1902); however, the British and the Afrikaners, as the Boers became known, ruled together beginning in 1910 under the Union of South Africa, which became

a republic in 1961 after a whites-only referendum. In 1948, the National Party was voted into power and instituted a policy of apartheid—the separate development of the races—which favored the white minority at the expense of the black majority. The African National Congress (ANC) led the opposition to apartheid and many top ANC leaders, such as Nelson MANDELA, spent decades in South Africa’s prisons. Internal protests and insurgency, as well as boycotts by some Western nations and institutions, led to the regime’s eventual willingness to negotiate a peaceful transition to majority rule. The first multi-racial elections in 1994 brought an end to apartheid and ushered in majority rule under an ANC-led government. South Africa since then has struggled to address apartheid-era imbalances in decent housing,

education, and health care. ANC infighting, which has grown in recent years, came to a head in September 2008 when President Thabo Mbeki resigned, and Kgalema Motlanthe, the party's General-Secretary, succeeded him as interim president. Jacob Zuma became president after the ANC won general elections in April 2009.

Flag description: two equal width horizontal bands of red (top) and blue separated by a central green band that splits into a horizontal Y, the arms of which end at the corners of the hoist side; the Y embraces a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes; the flag colors do not have any official symbolism, but the Y stands for the “convergence of diverse elements within South African society, taking the road ahead in unity”; black, yellow, and green are found on the flag of the African National Congress, while red, white, and blue are the colors in the flags of the Netherlands and the UK, whose settlers ruled South Africa during the colonial era
note: the South African flag is one of only two national flags to display six colors as part of its primary design, the other is South Sudan's

National symbol(s): springbok antelope

National anthem: name: “National Anthem of South Africa”

lyrics/music: Enoch SONTONGA and Cornelius Jacob LANGENHOVEN/Enoch SONTONGA and Marthinus LOURENS de Villiers

note: adopted 1994; the anthem is a combination of “Nkosi Sikelel' iAfrica” (God Bless Africa) and “Die Stem van Suid Afrika” (The Call of South Africa), which were respectively the anthems of the non-white and white communities under apartheid; the official lyrics contain a mixture of Xhosa, Zulu, Sesotho, Afrikaans, and English; the music incorporates the melody used in the Tanzanian and Zambian anthems

ECONOMY

Economy—overview: South Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors and a stock exchange that is the 15th largest in the world. Even though the country possesses modern infrastructure that support a relatively efficient distribution of goods to major urban centers throughout the region, some components retard growth. The economy began to slow in the second half of 2007 due to an electricity crisis. State power supplier Eskom encountered problems with aging plants and meeting electricity demand necessitating “load-shedding” cuts in 2007 and 2008 to residents and businesses in the major cities. Subsequently, the global financial crisis reduced commodity prices and world demand. GDP fell nearly 2% in 2009 but has recovered since then. Unemployment, poverty, and inequality remain a challenge, with official unemployment at nearly 25% of the work force. State power supplier Eskom has built two new power stations and installed new power demand management programs to improve power grid reliability. South Africa's economic policy has focused on controlling inflation, however, the country has had significant budget deficits that restrict its ability to deal with pressing economic problems. The current government faces growing pressure from special interest groups to use state-owned enterprises to deliver basic services to low-income areas and to increase job growth.

Military—note: with the end of apartheid and the establishment of majority rule, former military, black homelands forces, and ex-opposition forces were integrated into the South African National Defense Force (SANDF); as of 2003 the integration process was considered complete

TRANSNATIONAL ISSUES

Disputes—international: South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration; the governments of South Africa and Namibia have not signed or ratified the text of the 1994 Surveyor's General agreement placing the boundary in the middle of the Orange River

Refugees and internally displaced persons: refugees (country of origin): 15,186 (Somalia); 12,973 (Democratic Republic of Congo); 5,808 (Angola) (2011)

Illicit drugs: transshipment center for heroin, hashish, and cocaine, as well as a major cultivator of marijuana in its own right; cocaine and heroin consumption on the rise; world's largest market for illicit methaqualone, usually imported illegally from India through various east African countries, but increasingly producing its own synthetic drugs for domestic consumption; attractive venue for money launderers given the increasing level of organized criminal and narcotics activity in the region and the size of the South African economy

SOUTH GEORGIA AND SOUTH SANDWICH ISLANDS

INTRODUCTION

Background: The islands, which have large bird and seal populations, lie approximately 1,000 km east of the Falkland Islands and have been under British administration since 1908—except for a brief period in 1982 when Argentina occupied them. Grytviken, on South Georgia, was a 19th and early 20th century whaling station. Famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses scientists

from the British Antarctic Survey. Recognizing the importance of preserving the marine stocks in adjacent waters, the UK, in 1993, extended the exclusive fishing zone from 12 nm to 200 nm around each island.

GEOGRAPHY

Location: Southern South America, islands in the South Atlantic Ocean, east of the tip of South America

Geographic coordinates: 54 30 S, 37 00 W

Map references: South America

Area: total: 3,903 sq km

country comparison to the world: 177

land: 3,903 sq km

water: 0 sq km

note: includes Shag Rocks, Black Rock, Clerke Rocks, South Georgia Island, Bird Island, and the South Sandwich Islands, which consist of 11 islands

Area—comparative: slightly larger than Rhode Island

Land boundaries: 0 km

Coastline: NA

Maritime claims: territorial sea: 12 nm

exclusive fishing zone: 200 nm

Climate: variable, with mostly westerly winds throughout the year interspersed with periods of calm; nearly all precipitation falls as snow
Terrain: most of the islands, rising steeply from the sea, are rugged and mountainous; South Georgia is largely barren and has steep, glacier-covered mountains; the South Sandwich Islands are of volcanic origin with some active volcanoes

Elevation extremes: lowest point: Atlantic Ocean 0 m

highest point: Mount Paget (South Georgia) 2,934 m

Natural resources: fish

Land use: arable land: 0%

permanent crops: 0%

other: 100% (largely covered by permanent ice and snow with some sparse vegetation consisting of grass, moss, and lichen) (2011)

Irrigated land: 0 sq km (2011)

Natural hazards: the South Sandwich Islands have prevailing weather conditions that generally make them difficult to approach by ship; they are also subject to active volcanism

Environment—current issues: NA

Geography—note: the north coast of South Georgia has several large bays, which provide good anchorage; reindeer, introduced early in the 20th century, live on South Georgia

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: the small military garrison on South Georgia withdrew in March 2001 replaced by a permanent group of scientists of the British Antarctic Survey, which also has a biological station on Bird Island; the South Sandwich Islands are uninhabited

GOVERNMENT

Country name: conventional long form: South Georgia and the South Sandwich Islands

conventional short form: South Georgia and South Sandwich Islands

abbreviation: SGSSI

Dependency status: overseas territory of the UK, also claimed by Argentina; administered from the Falkland Islands by a commissioner, who is concurrently governor of the Falkland Islands, representing Queen ELIZABETH II

Legal system: the laws of the UK where applicable apply; the senior magistrate from the Falkland Islands presides over the Magistrates Court

Diplomatic representation in the US: none (overseas territory of the UK, also claimed by Argentina)

Diplomatic representation from the US: none (overseas territory of the UK, also claimed by Argentina)

Flag description: blue, with the flag of the UK in the upper hoist-side quadrant and the South Georgia and South Sandwich Islands coat of arms centered on the outer half of the flag; the coat of arms features a shield with a golden lion rampant, holding a torch; the shield is supported by a fur seal on the left and a Macaroni penguin on the right; a reindeer appears above the crest, and below the shield on a scroll is the motto LEO TERRAM PROPRIAM

PROTEGAT (Let the Lion Protect its Own Land)); the lion with the torch represents the UK and discovery; the background of the shield, blue and white estoiles, are found in the coat of arms of James Cook, discoverer of the islands; all the outer supporting animals represented are native to the islands

ECONOMY

Economy—overview: Some fishing takes place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from postage stamps produced in the UK, sale of fishing licenses, and harbor and 'landing fees' from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

SOUTHERN OCEAN

INTRODUCTION

Background: A large body of recent oceanographic research has shown that the Antarctic

Circumpolar Current (ACC), an ocean current that flows from west to east around Antarctica, plays a crucial role in global ocean circulation. The region where the cold waters of the ACC meet and mingle with the warmer waters of the north defines a distinct border—the Antarctic Convergence—which fluctuates with the seasons, but which encompasses a discrete body of water and a unique ecologic region. The Convergence concentrates nutrients, which promotes marine plant life, and which, in turn, allows for a greater abundance of animal life. In the spring of 2000, the International Hydrographic Organization decided to delimit the waters within the Convergence as a fifth world ocean—the Southern Ocean—by combining the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude, which coincides with the Antarctic Treaty Limit and which approximates the extent of the Antarctic

Convergence. As such, the Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean). It should be noted that inclusion of the Southern Ocean does not imply recognition of this feature as one of the world's primary oceans by the US Government.

GEOGRAPHY

Location: body of water between 60 degrees south latitude and Antarctica

Geographic coordinates: 60 00 S, 90 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references: Antarctic Region

Area: total: 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area—comparative: slightly more than twice the size of the US

Coastline: 17,968 km

Climate: sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain: the Southern Ocean is deep, 4,000 to 5,000 m over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 m (the global mean is 133 m); the Antarctic icepack grows from an average minimum of 2.6 million sq km in March to about 18.8 million sq km in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second—100 times the flow of all the world's rivers

Elevation extremes: lowest point: -7,235 m at the southern end of the South Sandwich Trench
highest point: sea level 0 m

Natural resources: probable large and possible giant oil and gas fields on the continental margin; manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals—none exploited; krill, fish

Natural hazards: huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 m thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large

waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Environment—current issues: increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton) by as much as 15% and damaging the DNA of some fish; illegal, unreported, and unregulated fishing in recent years, especially the landing of an estimated five to six times more Patagonian toothfish than the regulated fishery, which is likely to affect the sustainability of the stock; large amount of incidental mortality of seabirds resulting from long-line fishing for toothfish

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment—international agreements: the Southern Ocean is subject to all international agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)

note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence), which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the cold polar surface waters to the south and the warmer waters to the north

Geography—note: the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

ECONOMY

Economy—overview: Fisheries in 2006-07 landed 126,976 metric tons, of which 82%

(104,586 tons) was krill (*Euphausia superba*) and 9.5% (12,027 tons) Patagonian toothfish (*Dissostichus eleginoides*—also known as Chilean sea bass), compared to 127,910 tons in 2005-06 of which 83% (106,591 tons) was krill and 9.7% (12,396 tons) Patagonian toothfish (estimated fishing from the area covered by the Convention of the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Southern Ocean area). International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and Antarctic toothfish. In the 2007-08 Antarctic summer, 45,213 tourists visited the Southern Ocean, compared to 35,552 in 2006-07, and 29,799 in 2005-06 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO), and does not include passengers on overflights and those flying directly in and out of Antarctica).

TRANSPORTATION

Ports and terminals: McMurdo, Palmer, and offshore anchorages in Antarctica

note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most to short periods in midsummer; even then some cannot be entered without icebreaker escort; most Antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels

Transportation—note: Drake Passage offers alternative to transit through the Panama Canal

TRANSNATIONAL ISSUES

Disputes—international: Antarctic Treaty defers claims (see Antarctica entry), but Argentina, Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the United Nations Convention on the Law of the Sea to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west

SPAIN

INTRODUCTION

Background: Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World Wars I and II but suffered through a devastating civil war (1936-39). A peaceful transition to democracy following the death of dictator Francisco FRANCO in 1975, and rapid economic modernization (Spain joined the EU in 1986) gave Spain a dynamic and rapidly growing economy and made it a global champion of freedom and human rights. More recently the government has had to focus on measures to reverse a severe economic recession that began in mid-2008. Austerity measures implemented to reduce a large budget deficit and reassure foreign investors have led to one of the highest unemployment rates in Europe.

GEOGRAPHY

Location: Southwestern Europe, bordering the Mediterranean Sea, North Atlantic Ocean, Bay of Biscay, and Pyrenees Mountains; southwest of France

Geographic coordinates: 40 00 N, 4 00 W

local long form: Reino de España

local short form: España

Government type: parliamentary monarchy

Capital: name: Madrid

geographic coordinates: 40 24 N, 3 41 W

time difference: UTC+1 (6 hours ahead of Washington, DC during Standard Time)

daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October

note: Spain is divided into two time zones including the Canary Islands

Administrative divisions: 17 autonomous communities (comunidades autonomas, singular—comunidad autonoma) and 2 autonomous cities* (ciudades autonomas, singular—ciudad autonoma); Andalucía, Aragón, Asturias, Baleares (Balearic Islands), Ceuta*, Canarias (Canary Islands), Cantabria, Castilla-La Mancha, Castilla y León, Cataluña (Catalonia), Comunidad Valenciana (Valencian Community), Extremadura, Galicia, La Rioja, Madrid, Melilla*, Murcia, Navarra, País Vasco (Basque Country)

note: the autonomous cities of Ceuta and Melilla plus three small islands of Islas Chafarinas, Penón de Alhucemas, and Penón de Velez de la Gomera, administered directly by the Spanish central government, are all along the coast of Morocco and are collectively referred to as Places of Sovereignty (Plazas de Soberanía)

Independence: 1492; the Iberian peninsula was characterized by a variety of independent kingdoms prior to the Muslim occupation that began in the early 8th century A.D. and lasted nearly seven centuries; the small Christian redoubts of the north began the reconquest almost immediately, culminating in the seizure of Granada in 1492; this event completed the unification of several kingdoms and is traditionally considered the forging of present-day Spain National holiday: National Day, 12 October (1492); year when Columbus first set foot in the Americas Constitution: approved by legislature 31 October 1978; passed by referendum 6 December 1978; signed by the king 27 December 1978

Legal system: civil law system with regional variations

International law organization participation: accepts compulsory ICJ jurisdiction with reservations; accepts ICCt jurisdiction

Suffrage: 18 years of age; universal

Executive branch: chief of state: King JUAN CARLOS I (since 22 November 1975); Heir Apparent Prince FELIPE, son of the monarch, born 30 January 1968

Flag description: three horizontal bands of red (top), yellow (double width), and red with the national coat of arms on the hoist side of the yellow band; the coat of arms is quartered to display the emblems of the traditional kingdoms of Spain (clockwise from upper left, Castile, Leon, Navarre, and Aragon) while Granada is represented by the stylized pomegranate at the bottom of the shield; the arms are framed by two columns representing the Pillars of Hercules, which are the two promontories (Gibraltar and Ceuta) on either side of the eastern end of the Strait of Gibraltar; the red scroll across the two columns bears the imperial motto of "Plus Ultra" (further beyond) referring to Spanish lands beyond Europe; the triband arrangement with the center stripe twice the width of the outer dates to the 18th century
note: the red and yellow colors are related to those of the oldest Spanish kingdoms: Aragon, Castile, Leon, and Navarre

National symbol(s): Pillars of Hercules

National anthem: *name:* "Himno Nacional Español" (National Anthem of Spain)
lyrics/music: none/unknown

note: officially in use between 1770 and 1931, restored in 1939; the Spanish anthem has no lyrics; in the years prior to 1931 it became known as "Marcha Real" (The Royal March); it first appeared in a 1761 military bugle call book and was replaced by "Himno de Riego" in the years between 1931 and 1939; the long version of the anthem is used for the king, while the short version is used for the prince, prime minister, and occasions such as sporting events

ECONOMY

Economy—overview: After almost 15 years of above average GDP growth, the Spanish economy began to slow in late 2007 and entered into a recession in the second quarter of 2008. GDP contracted by 3.7% in 2009, ending a 16-year growth trend, and by another 0.3% in 2010; GDP expanded 0.4% in 2011, before contracting 1.4% in 2012. The economy has once again fallen into recession as deleveraging in the private sector, fiscal consolidation, and continued high unemployment weigh on domestic demand and investment, even as exports have shown signs of resiliency. The unemployment rate rose from a low of about 8% in 2007 to 26.0% in 2012. The economic downturn has also hurt Spain's public finances. The government budget deficit peaked at 11.2% of GDP in 2010 and the process to reduce this imbalance has been slow despite the central government's efforts to raise new tax revenue and cut spending. Spain reduced its budget deficit to 9.4% of GDP in 2011, and roughly 7.4% of GDP in 2012, above the 6.3% target negotiated between Spain and the EU. Although Spain's large budget deficit and poor economic growth prospects remain a source of concern for foreign investors, the government's ongoing efforts to cut spending and introduce flexibility into the labor markets are intended to assuage these concerns. The government is also taking steps to shore up the banking system, namely by using up to \$130 billion in EU funds to recapitalize struggling banks exposed to the collapsed domestic construction and real estate sectors.

TRANSNATIONAL ISSUES

Disputes—International: in 2002, Gibraltar residents voted overwhelmingly by referendum to reject any "shared sovereignty" arrangement; the government of Gibraltar insists on equal participation in talks between the UK and Spain; Spain disapproves of UK plans to grant Gibraltar greater autonomy; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and the islands of Penon de Velez de la Gomera, Penon de Alhucemas, and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); Morocco serves as the primary launching site of illegal migration into Spain from North

Africa; Portugal does not recognize Spanish sovereignty over the territory of Olivenza based on a difference of interpretation of the 1815 Congress of Vienna and the 1801 Treaty of Badajoz

Illicit drugs: despite rigorous law enforcement efforts, North African, Latin American, Galician, and other European traffickers take advantage of Spain's long coastline to land large shipments of cocaine and hashish for distribution to the European market; consumer for Latin American cocaine and North African hashish; destination and minor transshipment point for Southwest Asian heroin; money-laundering site for Colombian narcotics trafficking organizations and organized crime

Military—note: Spratly Islands consist of more than 100 small islands or reefs of which about 45 are claimed and occupied by China, Malaysia, the Philippines, Taiwan, and Vietnam

TRANSNATIONAL ISSUES

Disputes—International: all of the Spratly Islands are claimed by China (including Taiwan) and Vietnam; parts of them are claimed by Brunei, Malaysia and the Philippines; despite no public territorial claim to Louisa Reef, Brunei implicitly lays claim by including it within the natural prolongation of its continental shelf and basis for a seabed median with Vietnam; claimants in November 2002 signed the "Declaration on the Conduct of Parties in the South China Sea," which has eased tensions but falls short of a legally binding "code of conduct"; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands

INTRODUCTION

Background: The Spratly Islands consist of more than 100 small islands or reefs. They are surrounded by rich fishing grounds and potentially by gas and oil deposits. They are claimed in their entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. About 45 islands are occupied by relatively small numbers of military forces from China, Malaysia, the Philippines, Taiwan, and Vietnam. Since 1985 Brunei has claimed a continental shelf that overlaps a southern reef but has not made any formal claim to the reef. Brunei claims an exclusive economic zone over this area.

SRI LANKA

INTRODUCTION

Background: The first Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced in about the mid-third century B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty established a Tamil kingdom in northern Sri Lanka. The coastal areas of the island were controlled by the Portuguese in the 16th century and by the Dutch in the 17th century. The island was ceded to the British in 1796, became a crown colony in 1802, and was formally united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted into war in 1983. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam (LTTE) formalized a cease-fire in February 2002 with Norway brokering peace negotiations. Violence between the LTTE and government forces intensified in 2006, but the government regained control of the Eastern Province in 2007. By May 2009, the government announced that its military had defeated the remnants of the LTTE. Since the end of the conflict, the government has enacted an ambitious program of economic development projects, many of which are financed by loans from the Government of China. In addition to efforts to reconstruct its economy, the government has resettled more than 95% of those civilians who were displaced during the final phase of the conflict and released the vast majority of former LTTE combatants captured by Government Security Forces. At the same time, there has been little progress on more contentious and politically difficult issues such as reaching a political settlement with Tamil elected representatives and holding accountable those alleged to have been involved in human rights violations at the end of the war.

Flag description: yellow with two panels; the
smaller hoist-side panel has two equal verti-
cal bands of green (hoist side) and orange; the
other larger panel depicts a yellow lion hold-
ing a sword on a dark red rectangular field that
also displays a yellow bo leaf in each corner;
the yellow field appears as a border around the
entire flag and extends between the two pan-
els; the lion represents Sinhalese ethnicity, the
strength of the nation, and bravery; the sword
demonstrates the sovereignty of the nation; the
four bo leaves—symbolizing Buddhism and its
influence on the country—stand for the four
virtues of kindness, friendliness, happiness, and
equanimity; orange signifies Sri Lankan Tamils,
green the Sri Lankan Moors; dark red represents
the European Burghers, but also refers to the
rich colonial background of the country; yellow
denotes other ethnic groups; also referred to as
the Lion Flag**National symbol(s):** lion**National anthem:** name: "Sri Lanka Matha"

experience strong economic growth following the
end of the 26-year conflict with the Liberation
Tigers of Tamil Eelam (LTTE). The government
has been pursuing large-scale reconstruction and
development projects in its efforts to spur growth
in war-torn and disadvantaged areas, develop small
and medium enterprises and increase agricultural
productivity. The government's high debt pay-
ments and bloated civil service have contributed
to historically high budget deficits, but fiscal con-
solidation efforts and strong GDP growth in recent
years have helped bring down the government's

fiscal deficit. However, low tax revenues are a major concern. The 2008-09 global financial crisis and recession exposed Sri Lanka's economic vulnerabilities and nearly caused a balance of payments crisis. Growth slowed to 3.5% in 2009. Economic activity rebounded with the end of the war and an IMF agreement, resulting in two straight years of 8% growth in 2010-11. Growth moderated to about 6% in 2012. Agriculture slowed due to a drought and weak global demand affected exports and trade. In early 2012, Sri Lanka floated the rupee, resulting in a sharp depreciation, and took steps to curb imports. A large trade deficit remains a concern. Strong remittances from Sri Lankan workers abroad have helped to offset the trade deficit.

SUDAN

INTRODUCTION

Background: Military regimes favoring Islamic-oriented governments have dominated national politics since independence from the UK in 1956. Sudan was embroiled in two prolonged civil wars during most of the remainder of the 20th century. These conflicts were rooted in northern economic, political, and social domination of largely

non-Muslim, non-Arab southern Sudanese. The first civil war ended in 1972 but broke out again in 1983. The second war and famine-related effects resulted in more than four million people displaced and, according to rebel estimates, more than two million deaths over a period of two decades. Peace talks gained momentum in 2002-04 with the signing of several accords. The final North/South Comprehensive Peace Agreement (CPA), signed in January 2005, granted the southern rebels autonomy for six years followed by a referendum on independence for Southern Sudan. The referendum was held in January 2011 and indicated overwhelming support for independence. South Sudan became independent on 9 July 2011. Since southern independence Sudan has been combating rebels from the Sudan People's Liberation Movement-North (SPLM-N) in Southern Kordofan and Blue Nile states. A separate conflict, which broke out in the western region of Darfur in 2003, has displaced nearly two million people and caused an estimated 200,000 to 400,000 deaths. The UN took command of the Darfur peacekeeping operation from the African Union in December 2007. Peacekeeping troops have struggled to stabilize the situation, which has become increasingly regional in scope and has brought instability to eastern

Chad. Sudan also has faced large refugee influxes from neighboring countries primarily Ethiopia and Chad. Armed conflict, poor transport infrastructure, and lack of government support have chronically obstructed the provision of humanitarian assistance to affected populations.

ECONOMY

Economy—overview: Sudan is an extremely poor country that has had to deal with social conflict, civil war, and the July 2011 secession of South Sudan—the region of the country that had been responsible for about three-fourths of the former Sudan's total oil production. The oil sector had driven much of Sudan's GDP growth since it began exporting oil in 1999. For nearly a decade, the economy boomed on the back of increases in oil production, high oil prices, and significant inflows of foreign direct investment. Following South Sudan's secession, Sudan has struggled to maintain economic stability, because oil earnings now provide a far lower share of the country's need for hard currency and for budget revenues. Sudan

is attempting to generate new sources of revenues, such as from gold mining, while carrying out an austerity program to reduce expenditures. Agricultural production continues to employ 80% of the work force. Sudan introduced a new currency, still called the Sudanese pound, following South Sudan's secession, but the value of the currency has fallen since its introduction. Khartoum formally devalued the currency in June 2012, when it passed austerity measures that included gradually repealing fuel subsidies. Sudan also faces rising inflation, which reached 47% on an annual basis in November 2012. Ongoing conflicts in Southern Kordofan, Darfur, and the Blue Nile states, lack of basic infrastructure in large areas, and reliance by much of the population on subsistence agriculture ensure that much of the population will remain at or below the poverty line for years to come.

TRANSNATIONAL ISSUES

Disputes—international: the effects of Sudan's almost constant ethnic and rebel militia fighting since the mid-20th century have penetrated all of the neighboring states; Chad wishes to be a helpful mediator in resolving the Darfur conflict, and in 2010 established a joint border monitoring force with Sudan, which has helped to reduce cross-border banditry and violence; as of 2006, Chad, Ethiopia, Kenya, Central African Republic, Democratic Republic of the Congo, and Uganda provided shelter for over a half million Sudanese refugees, which include 240,000 Darfur residents driven from their homes by Janjawid armed militia and Sudanese military forces; as of January 2011, Sudan, in turn, hosted about 138,700 Eritreans, 43,000 Chadians, and smaller numbers of Ethiopians; Sudan accuses Eritrea of supporting Sudanese rebel groups; efforts to demarcate the porous boundary with Ethiopia

proceed slowly due to civil and ethnic fighting in eastern Sudan; Sudan claims but Egypt de facto administers security and economic development of Halaib region north of the 22nd parallel boundary; periodic violent skirmishes with Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan

Refugees and internally displaced persons: refugees (country of origin): 100,464 (Eritrea); 31,871 (Chad); 4,421 (Ethiopia) (2011)

IDPs: more than 2.4 million (civil war 1983-2005; ongoing conflict in Darfur region; government and rebel fighting along South Sudan border) (2011)

Trafficking in persons: current situation: Sudan is a source, transit, and destination country for men, women, and children who are subjected to forced labor and sex trafficking; Sudanese women and girls, particularly those from rural areas or who are internally displaced, are vulnerable to forced labor as domestic workers in homes throughout the country; some of these women and girls are subsequently sexually abused by male occupants of the household or forced to engage in commercial sex acts; Sudanese women and girls are subjected to domestic servitude in Middle Eastern countries, such as Bahrain, Saudi Arabia, and Qatar, and to forced sex trafficking in European countries; some Sudanese men who voluntarily migrate to the

Middle East as low-skilled laborers face conditions indicative of forced labor; Sudanese children transit Yemen en route to Saudi Arabia, where they are used in forced begging and street vending, and reportedly work in exploitative labor situations for Sudanese traders in the Central African Republic; Sudan is a transit and destination country for Ethiopian and Eritrean women subjected to domestic servitude in Sudan and Middle Eastern countries; Sudan is a destination for Ethiopian, Somali, and possibly Thai women subjected to forced prostitution; Sudanese children in Darfur were forcibly conscripted, at times through abduction, and used by armed groups

tier rating: Tier 3—Sudan does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; while the government took some initial steps to acknowledge the existence of trafficking, draft anti-trafficking legislation, prosecute suspected traffickers, demobilize and reintegrate child soldiers, and waive overstay fines for foreign domestic workers, its efforts to combat human trafficking through law enforcement, protection, or prevention measures were undertaken in an ad hoc fashion, rather than as the result of strategic planning; the government convicted three traffickers, but did not officially identify trafficking victims or make public data regarding its efforts to combat human trafficking; its proxy militias reportedly unlawfully recruited and used child soldiers during the reporting period, and it did not take action to conclude a proposed action plan with the UN to address the problem (2012)

SURINAME

INTRODUCTION

Background: First explored by the Spaniards in the 16th century and then settled by the English in the mid-17th century, Suriname became a Dutch colony in 1667. With the abolition of African slavery in 1863, workers were brought in from India and Java. Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by

a military regime that soon declared a socialist republic. It continued to exert control through a succession of nominally civilian administrations until 1987, when international pressure finally forced a democratic election. In 1990, the military overthrew the civilian leadership, but a democratically elected government—a four-party coalition—returned to power in 1991. The coalition expanded to eight parties in 2005 and ruled until August 2010, when voters returned former military leader Desire BOUTERSE and his opposition coalition to power.

PEOPLE AND SOCIETY

Nationality: noun: Surinamer(s)
 adjective: Surinamese

Ethnic groups: Hindustani (also known locally as "East Indians"; their ancestors emigrated from northern India in the latter part of the 19th century) 37%, Creole (mixed white and black) 31%, Javanese 15%, "Maroons" (their African ancestors were brought to the country in the 17th and 18th centuries as slaves and escaped to the interior) 10%, Amerindian 2%, Chinese 2%, white 1%, other 2%

Languages: Dutch (official), English (widely spoken), Sranang Tongo (Surinamese, sometimes called Taki-Taki, is native language of Creoles and much of the younger population and is lingua franca among others), Caribbean Hindustani (a dialect of Hindi), Javanese

Religions: Hindu 27.4%, Protestant 25.2% (predominantly Moravian), Roman Catholic 22.8%, Muslim 19.6%, indigenous beliefs 5%

Demographic profile: Suriname is a pluralistic society consisting primarily of Creoles (persons of mixed African and European heritage), the descendants of escaped African slaves known as Maroons, and the descendants of Indian and Javanese contract workers. The country overall is in full, postindustrial demographic transition, with a low fertility rate, a moderate mortality rate, and a rising life expectancy. However, the Maroon population of the rural interior lags behind because of lower educational attainment and contraceptive use, higher malnutrition, and significantly less access to electricity, potable water, sanitation, infrastructure, and health care. Some 350,000 people of Surinamese descent live in the Netherlands, Suriname's former colonial ruler. In the 19th century, better-educated, largely Dutch-speaking Surinamese began emigrating to the Netherlands. World War II interrupted the outflow, but it resumed after the war when Dutch labor demands grew—emigrants included all segments of the Creole population. Suriname still is strongly influenced by the Netherlands because most Surinamese have relatives living there and it is the largest supplier of development aid. Other emigration destinations include French Guiana and the United States. Suriname's immigration rules are flexible, and the country is easy to enter illegally because rainforests obscure its borders. Since the mid-1980s, Brazilians have settled in CIA—The World Factbook Suriname's capital, Paramaribo, or eastern Suriname, where they mine gold. This immigration is likely to slowly re-orient Suriname toward its Latin American roots.

ECONOMY

Economy—overview: The economy is dominated by the mining industry, with exports of alumina, gold, and oil accounting for about 85% of exports and 25% of government revenues, making the economy highly vulnerable to mineral price volatility. Economic growth, which reached about 7% in 2008, owing to sizeable foreign investment in mining and oil, slowed to 2.2% in 2009 as investment waned and the country earned less from its commodity exports when global prices for most commodities fell. Trade picked up, boosting Suriname's economic growth about 4% per year in 2010-12, but the government's budget remained strained. Inflation rose from 1.3% in 2009 to 17.7% in 2011. In January 2011, the government devalued the currency by 20% and raised taxes to reduce the budget deficit. As a result of these

measures, inflation receded to 6% in 2012. Suriname's economic prospects for the medium term will depend on continued commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition.

TRANSNATIONAL ISSUES

Disputes—international: area claimed by French Guiana between Riviere Litani and Riviere Marouini (both headwaters of the Lawa); Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks United Nations Convention on the Law of the Sea arbitration to resolve the longstanding dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Illicit drugs: growing transshipment point for South American drugs destined for Europe via the Netherlands and Brazil; transshipment point for arms-for-drugs dealing

SVALBARD

INTRODUCTION

Background: First discovered by the Norwegians in the 12th century, the islands served as an international whaling base during the 17th and 18th centuries. Norway's sovereignty was recognized in 1920; five years later it officially took over the territory.

ECONOMY

Economy—overview: Coal mining, tourism, and international research are the major revenue sources on Svalbard. Coal mining is the dominant economic activity and a treaty of 9 February 1920 gave the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still engaging in this are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some hunting of seal, reindeer, and fox. Goods such as alcohol, tobacco, and vehicles, normally highly taxed on mainland Norway, are considerably cheaper in Svalbard in an effort by the Norwegian government to entice more people to live on the Arctic archipelago. By law, the Norwegians collect only enough taxes to pay for the needs of the local government; none of tax proceeds go to Norway.

SWAZILAND

INTRODUCTION

Background: Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted in 1968. Student and labor unrest during the 1990s pressured King MSWATI III, Africa's last absolute monarch, to grudgingly allow political reform and greater democracy, although he has backslid on these promises in recent years. A constitution came into effect in 2006, but the legal status of political parties remains unclear. The African United Democratic Party tried unsuccessfully to register as an official political party in mid 2006. Talks over the constitution broke down between the government and progressive groups in 2007. Swaziland recently surpassed Botswana as the country with the world's highest known HIV/AIDS prevalence rate.

ECONOMY

Economy—overview: Surrounded by South Africa, except for a short border with Mozambique, Swaziland depends heavily on South Africa from which it receives more than 90% of its imports and to which it sends 60% of its exports. Swaziland's currency is pegged to the South African rand, effectively subsuming Swaziland's monetary policy to South Africa. The government is heavily dependent on customs duties from the Southern African Customs Union (SACU), and worker remittances from South Africa supplement domestically earned income. Subsistence agriculture employs approximately 70% of the population. The manufacturing sector has diversified since the mid-1980s. Sugar and wood pulp were major foreign exchange earners; however, the wood pulp producer closed in January 2010, and sugar is now the main export earner. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Customs revenues plummeted due to the global economic crisis and a drop in South African imports. The resulting decline in revenue has pushed the country into a fiscal crisis. Swaziland is looking to other countries, including South Africa, for assistance, but continues to struggle to meet its monthly payroll and fund government programs. With an estimated 40% unemployment rate, Swaziland's need to increase the number and size of small and medium enterprises and attract foreign direct investment is acute. Overgrazing, soil depletion, drought, and floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2006-07 because of drought, and more than one-quarter of the adult population has been infected by HIV/AIDS.

INTRODUCTION

Background: A military power during the 17th century, Sweden has not participated in any war for almost two centuries. An armed neutrality was preserved in both world wars. Sweden's long-successful economic formula of a capitalist system interlarded with substantial welfare elements was challenged in the 1990s by high unemployment and in 2000-02 and 2009 by the global economic downturns, but fiscal discipline over the past several years has allowed the country to weather economic vagaries. Sweden joined the EU in 1995, but the public

ECONOMY

Economy—overview: Aided by peace and neutrality for the whole of the 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a highly skilled labor force. In September 2003, Swedish voters turned down entry into the euro system concerned about the impact on the economy and sovereignty. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for vast majority of industrial output, of which the engineering sector accounts for about 50% of output and exports. Agriculture accounts for little more than 1% of GDP and of employment. Until 2008, Sweden was in the midst of a sustained economic upswing, boosted by increased domestic demand and strong exports. This and robust finances offered the center-right government considerable scope to implement its reform program aimed at increasing employment, reducing welfare dependence, and streamlining the state's role in the economy. Despite strong finances and underlying fundamentals, the Swedish economy slid into recession in the third quarter of 2008 and the contraction continued in 2009 as deteriorating global conditions reduced export demand and consumption. Strong exports of commodities and a return to profitability by Sweden's banking sector drove the strong rebound in 2010, which continued in 2011, but growth slipped to 1.2% in 2012. The government proposed stimulus measures in 2012 to curb the effects of a global economic slow down and boost employment and growth.

SWITZERLAND

INTRODUCTION

Background: The Swiss Confederation was founded in 1291 as a defensive alliance among three cantons. In succeeding years, other localities joined the original three. The Swiss Confederation secured its independence from the Holy Roman Empire in 1499. A constitution of 1848, subsequently modified in 1874, replaced the confederation with a centralized federal government. Switzerland's sovereignty and neutrality have long been honored by the major European powers, and the country was not involved in either of the two world wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active in many UN and international organizations but retains a strong commitment to neutrality.

ECONOMY

Economy—overview: Switzerland is a peaceful, prosperous, and modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP among the highest in the world. Switzerland's economy benefits from a highly developed service sector, led by financial

services, and a manufacturing industry that specializes in high-technology, knowledge-based production. Its economic and political stability, transparent legal system, exceptional infrastructure, efficient capital markets, and low corporate tax rates also make Switzerland one of the world's most competitive economies. The Swiss have brought their economic practices largely into conformity with the EU's to enhance their international competitiveness, but some trade protectionism remains, particularly for its small agricultural sector. The fate of the Swiss economy is tightly linked to that of its neighbors in the euro zone, which purchases half of all Swiss exports. The global financial crisis of 2008 and resulting economic downturn in 2009 stalled export demand and put Switzerland in a recession. The Swiss National Bank (SNB) during this period effectively implemented a zero-interest rate policy to boost the economy as well as prevent appreciation of the franc, and Switzerland's economy recovered in 2010 with 3.0% growth. The sovereign debt crises currently unfolding in neighboring euro-zone countries pose a significant risk to Switzerland's financial stability and are driving up demand for the Swiss franc by investors seeking a safe-haven currency. The independent SNB has upheld its zero-interest rate policy and conducted major market interventions to prevent further appreciation of the Swiss franc, but parliamentarians have urged it to do more to weaken the currency. The franc's strength has made Swiss exports less competitive and weakened the country's growth outlook; GDP growth fell to 1.9% in 2011 and 0.8% in 2012. Switzerland has also come under increasing pressure from individual neighboring countries, the EU, the US, and international institutions to reform its banking secrecy laws. Consequently, the government agreed to conform to OECD regulations on administrative assistance in tax matters, including tax evasion. The government has renegotiated its double taxation agreements with numerous countries, including the US, to incorporate the OECD standard, and is considering the possibility of imposing taxes on bank deposits held by foreigners. These steps will have a lasting impact on Switzerland's long history of bank secrecy.

SYRIA

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French administered the area as Syria until granting it independence in 1946. The new country lacked political stability, however, and experienced a series of military coups during its first decades. Syria united with Egypt in February 1958 to form the United Arab Republic. In September 1961, the two entities separated, and the Syrian Arab Republic was reestablished. In November 1970, Hafiz al-ASAD, a member of the socialist Ba'th Party and the minority Alawi sect, seized power in a bloodless coup and brought political stability to the country. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. During the 1990s, Syria and Israel held occasional peace talks over its return. Following the death of President al-ASAD, his son, Bashar al-ASAD, was approved as president by popular referendum in July 2000. Syrian troops—stationed in Lebanon since 1976 in an ostensible peacekeeping role—were withdrawn in April 2005. During the July-August 2006 conflict between Israel and Hizballah, Syria placed its military forces on alert but did not intervene directly on behalf of its ally Hizballah. In May 2007 Bashar al-ASAD's second term as president was approved by popular referendum. Influenced by major uprisings that began elsewhere in the region, antigovernment protests broke out in the southern province of Dar'a in March 2011 with protesters calling for the repeal of the restrictive Emergency Law allowing arrests without charge, the legalization of political parties, and the removal of corrupt local officials. Since then demonstrations and unrest have spread to nearly every city in Syria, but the size and intensity of protests have fluctuated over time. The government responded to unrest with a mix of concessions—including the repeal of the Emergency Law and approving new laws permitting new political parties and liberalizing local and national elections—and force. However, the government's response has failed to meet opposition demands for ASAD to step down, and the government's ongoing security operations to quell unrest and widespread armed opposition activity have led to extended violent

clashes between government forces and oppositionists. International pressure on the ASAD regime has intensified since late 2011, as the Arab League, EU, Turkey, and the United States have expanded economic sanctions against the regime. Lakhdar BRAHIMI, current Joint Special Representative of the United Nations and the League of Arab States on the Syrian crisis, in October 2012 began meeting with regional heads of state to assist in brokering a cease-fire. In December 2012, the National Coalition of Syrian Revolution and Opposition Forces was recognized by more than 130 countries as the sole legitimate representative of the Syrian people. Unrest persists in 2013, and the death toll among Syrian Government forces, opposition forces, and civilians has topped 70,000.

ECONOMY

Economy—overview: Despite modest economic growth and reform prior to the outbreak of unrest, Syria's economy continues to suffer the effects of the ongoing conflict that began in 2011. The economy further contracted in 2012 because of international sanctions and reduced domestic consumption and production, and inflation has risen sharply. The government has struggled to address the effects of economic decline, which include dwindling foreign exchange reserves, rising budget and trade deficits, and the decreasing value of the Syrian pound. Prior to the unrest, Damascus began liberalizing economic policies, including cutting lending interest rates, opening private banks, consolidating multiple exchange rates, raising prices on some subsidized items, and establishing the Damascus Stock Exchange. The economy remains highly regulated by the government. Long-run economic constraints include foreign trade barriers, declining oil production, high unemployment, rising budget deficits, and increasing pressure on water supplies caused by heavy use in agriculture, rapid population growth, industrial expansion, and water pollution.

TRANSNATIONAL ISSUES

Disputes—International: Golan Heights is Israeli-occupied with the almost 1,000-strong UN Disengagement Observer Force patrolling a buffer zone since 1964; lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms in the Golan Heights; 2004 Agreement and pending demarcation settles border dispute with Jordan

Refugees and internally displaced persons: refugees (country of origin): 486,946 (Palestinian Refugees (UNRWA)); 87,741 (Iraq) IDPs: more than 2 million (ongoing civil war since 2011) (2012)

Trafficking in persons: current situation: Prior to the ongoing political uprising and violent unrest, Syria was principally a destination country for women and children subjected to forced labor or sex trafficking; women from Indonesia, the Philippines, Somalia, and Ethiopia were recruited by employment agencies to work in Syria as domestic servants, but are subsequently subjected to conditions of forced labor; some economically desperate Syrian children are subjected to conditions of forced labor within the country, particularly by organized street begging rings; undocumented Filipina domestic workers continue to be sent to Syria; the daughters of some Iraqi refugees are reportedly contracted to work as maids but made to be prostitutes or forced laborers; some Syrian women in Lebanon may be forced to engage in street prostitution and small numbers of Syrian girls are reportedly brought to Lebanon for the purpose of prostitution

tier rating: Tier 3—the government does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government did not demonstrate evidence of increasing efforts to investigate and punish trafficking offenses provide protective services to victims, widely inform the public about human trafficking, or provide much-needed anti-trafficking training to law enforcement and social welfare officials (2012)

Illicit drugs: a transit point for opiates, hashish, and cocaine bound for regional and Western markets; weak anti-money-laundering controls and bank privatization may leave it vulnerable to money laundering

TAIWAN

INTRODUCTION

Background: In 1895, military defeat forced China's Qing Dynasty to cede Taiwan to Japan. Taiwan came under Chinese Nationalist control after World War II. Following the Communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the 1947 constitution drawn up for all of China. Beginning in the 1950s, the ruling authorities gradually democratized and incorporated the local population within the governing structure. This process expanded rapidly in the 1980s. In 2000, Taiwan underwent its first peaceful transfer of power from the Nationalist to the Democratic Progressive Party. Throughout this period, the island prospered and became one of East Asia's economic "Tigers." The dominant political issues continue to be the relationship between Taiwan and China—specifically the question of Taiwan's eventual status—as well as domestic political and economic reform.

Flag description: red field with a dark blue rectangle in the upper hoist-side corner bearing a white sun with 12 triangular rays; the blue and white design of the canton (symbolizing the sun of progress) dates to 1895; it was later adopted as the flag of the Kuomintang Party; blue signifies liberty, justice, and democracy; red stands for fraternity, sacrifice, and nationalism, white represents equality, frankness, and the people's livelihood; the 12 rays of the sun are those of the months and the twelve traditional Chinese hours (each ray equals two hours)

National symbol(s): white, 12-rayed sun on blue field

National anthem: *name:* "Zhonghua Minguo guo" (National Anthem of the Republic of China)

lyrics/music: HU Han-min, TAI Chi-t'ao, and LIAO Chung-k'ai/CHENG Mao-Yun

note: adopted 1930; the anthem is also the song of the Kuomintang Party; it is informally known as "San Min Chu I" or "San Min Zhu Yi" (Three Principles of the People); because of political pressure from China, "Guo Qi Ge" (National Banner Song) is used at international events rather than the official anthem of Taiwan; the "National Banner Song" has gained popularity in Taiwan and is commonly used during flag raisings

ECONOMY

Economy—overview: Taiwan has a dynamic capitalist economy with gradually decreasing government guidance of investment and foreign trade. Exports, led by electronics, machinery, and petrochemicals have provided the primary impetus for economic development. This heavy dependence on exports exposes the economy to fluctuations in world demand. In 2009, Taiwan's GDP contracted 1.8%, due primarily to a 13.1% year-over-year decline in exports. In 2010 GDP grew 10.7%, as exports returned to the level of

previous years, and in 2011, grew 4.0%. In 2012, however, growth fell to 1.3%, because of softening global demand. Taiwan's diplomatic isolation, low birth rate, and rapidly aging population are major long-term challenges. Free trade agreements have proliferated in East Asia over the past several years, but except for the landmark Economic Cooperation Framework Agreement (ECFA) signed with China in June 2010, so far Taiwan has been excluded from this greater economic integration in part because of its diplomatic status. Negotiations continue on such follow-on components of ECFA regarding trade in goods and services. The MA administration has said that the ECFA will serve as a stepping stone toward trade pacts with other key trade partners, which Taiwan subsequently launched with Singapore and New Zealand. Taiwan's Total Fertility rate of just over one child per woman is among the lowest in the world, raising the prospect of future labor shortages, falling domestic demand, and declining tax revenues. Taiwan's population is aging quickly, with the number of people over 65 accounting for 11.2% of the island's total population as of 2012. The island runs a large trade surplus largely because of its surplus with China, and its foreign reserves are the world's fifth largest, behind China, Japan, Saudi Arabia, and Russia. In 2006 China overtook the US to become Taiwan's second-largest source of imports after Japan. China is also the island's number one destination for foreign direct investment. Three financial memorandums of understanding, covering banking, securities, and insurance, took effect in mid-January 2010, opening the island to greater investments from the mainland's financial firms and institutional investors, and providing new opportunities for Taiwan financial firms to operate in China. In August 2012, Taiwan Central Bank signed a memorandum of understanding on cross-strait currency settlement with its Chinese counterpart. The MOU allows for the direct settlement of Chinese RMB and the New Taiwan dollar across the Strait, which could help develop Taiwan into a local RMB hub. Closer economic links with the mainland bring greater opportunities for the Taiwan economy, but also poses new challenges as the island becomes more economically dependent on China while political differences remain unresolved.

TRANSNATIONAL ISSUES

Disputes—international: involved in complex dispute with Brunei, China, Malaysia, the Philippines, and Vietnam over the Spratly Islands, and with China and the Philippines over Scarborough Reef; the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions but falls short of a legally binding "code of conduct" desired by several of the disputants; Paracel Islands are occupied by China, but claimed by Taiwan and Vietnam; in 2003, China and Taiwan became more vocal in rejecting both Japan's claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared exclusive economic zone in the East China Sea where all parties engage in hydrocarbon prospecting

Illicit drugs: regional transit point for heroin, methamphetamine, and precursor chemicals; transshipment point for drugs to Japan; major problem with domestic consumption of methamphetamine and heroin; rising problems with use of ketamine and club drugs

TAJIKISTAN

INTRODUCTION

Background: The Tajik people came under Russian rule in the 1860s and 1870s, but Russia's hold on Central Asia weakened following the Revolution of 1917. Bolshevik control of the area was fiercely contested and not fully reestablished until 1925. Much of present-day Sughd province was transferred from the Uzbek SSR to the newly formed Tajik SSR in 1929. Ethnic Uzbeks form a substantial minority in Tajikistan. Tajikistan became independent in 1991 following the breakup of the Soviet Union, and experienced a civil war between regional factions from 1992-97. Tajikistan endured several domestic security incidents in 2010-12, including a mass prison-break from a Dushanbe

detention facility, the country's first suicide car bombing in Khujand, and armed conflict between government forces and local strongmen in the Rasht Valley and government forces and criminal groups in Gorno-Badakhshan Autonomous Oblast. The country remains the poorest in the former Soviet sphere. Attention by the international community since the beginning of the NATO intervention in Afghanistan has brought increased economic and security assistance, which could create jobs and strengthen stability in the long term. Tajikistan joined NATO's Partnership for Peace in 2002, and became a member of the World Trade Organization in March 2013.

Flag description: three horizontal stripes of red (top), a wider stripe of white, and green; a gold crown surmounted by seven gold, five-pointed stars is located in the center of the white stripe; red represents the sun, victory, and the unity of the nation, white stands for purity, cotton, and mountain snows, while green is the color of Islam and the bounty of nature; the crown symbolizes the Tajik people; the seven stars signify the Tajik magic number "seven"—a symbol of perfection and the embodiment of happiness

National symbol(s): crown surmounted by seven, five-pointed stars

National anthem: *name:* "Surudi milli" (National Anthem)

lyrics/music: Gulnazar KELDI/Suleiman YUDAKOV

note: adopted 1991; after the fall of the Soviet Union, Tajikistan kept the music of the anthem from its time as a soviet republic but adopted new lyrics

ECONOMY

Economy—overview: Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. Because of a lack of employment opportunities in Tajikistan, more than one million Tajik citizens work abroad, almost all of them in Russia, supporting families in Tajikistan through remittances. Less than 7% of the land area is arable. Cotton is the most important crop, and its production is closely monitored, and in many cases controlled, by the government. In the wake of the National Bank of Tajikistan's admission in December 2007 that it had improperly lent money to investors in the cotton sector, the IMF canceled its program in Tajikistan. A reform agenda is underway, according to which over half a billion dollars in farmer debt has been forgiven, and IMF assistance has been reinstated. Mineral resources include silver, gold, uranium, and tungsten. Industry consists mainly of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992-97) severely damaged the already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Tajikistan's economic situation remains fragile due to uneven implementation of structural reforms, corruption, weak governance, seasonal power shortages, and the external debt burden. Electricity output expanded with the completion of the Sangtuda-1 hydropower dam finished in 2009 with Russian investment. The smaller Sangtuda-2, built with Iranian investment, began operating in 2012. The government of Tajikistan is pinning major hopes on the massive Roghun dam which, if finished according to Tajik plans, will be the tallest dam in the world and significantly expand electricity output. The World Bank is funding two feasibility studies for the dam (technical-economic, and social-environmental), scheduled to be completed in mid-2013. In January 2010, the government began selling shares in the Roghun enterprise to its population, ultimately raising over \$180 million but Tajikistan will still need significant investment to complete the dam. According to numerous reports, many Tajik individuals and businesses were forced to buy shares. The coerced share sales finally ended in mid-2010 under intense criticism from donors, particularly the IMF. Food and fuel prices in 2011 increased to the highest levels seen since 2002 due in part to an increase in rail transport tariffs through Uzbekistan. Tajikistan imports approximately 60% of its food and 90% of that comes by rail. Uzbekistan closed one of the rail lines into Tajikistan in late 2011, hampering the transit of goods to and from the southern part of the country.

border and remove minefields; disputes in Isfara Valley delay delimitation with Kyrgyzstan

Illicit drugs: major transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of opium poppy for domestic consumption;

Tajikistan seizes roughly 80% of all drugs captured in Central Asia and stands third worldwide in seizures of opiates (heroin and raw opium); significant consumer of opiates

TANZANIA

INTRODUCTION

Background: Shortly after achieving independence from Britain in the early 1960s, Tanganyika and Zanzibar merged to form the nation of Tanzania in 1964. One-party rule ended in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition have led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities. The formation of a government of national unity between Zanzibar's two leading parties succeeded in minimizing electoral tension in 2010.

ECONOMY

Economy—overview: Tanzania is one of the world's poorest economies in terms of per capita income, however, it has achieved high overall growth rates based on gold production and tourism. Tanzania has largely completed its transition to a liberalized market economy, though the government retains a presence in sectors such as telecommunications, banking, energy, and mining. The economy depends on agriculture, which accounts for more than one-quarter of GDP, provides 85% of exports, and employs about 80% of the work force. The World Bank, the IMF, and bilateral donors have provided funds to rehabilitate Tanzania's aging economic infrastructure, including rail and port infrastructure that are important trade links for inland countries. Recent banking reforms have helped increase private-sector growth and investment, and the government has increased spending on agriculture to 7% of its budget. The financial sector in Tanzania has expanded in recent years and foreign-owned banks account for about 48% of the banking industry's total assets. Competition among foreign commercial banks has resulted in significant improvements in the efficiency and quality of financial services, though interest rates are still relatively high, reflecting high fraud risk. All land in Tanzania is

owned by the government, which can lease land for up to 99 years. Proposed reforms to allow for land ownership, particularly foreign land ownership, remain unpopular. Continued donor assistance and solid macroeconomic policies supported a positive growth rate, despite the world recession. In 2008, Tanzania received the world's largest Millennium Challenge Compact grant, worth \$698 million, and in December 2012 the Millennium Challenge Corporation selected Tanzania for a second Compact. Dares Salaam used fiscal stimulus and loosened monetary policy to ease the impact of the global recession. GDP growth in 2009-12 was a respectable 6% per year due to high gold prices and increased production.

THAILAND

INTRODUCTION

Background: A unified Thai kingdom was established in the mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US treaty ally in 1954 after sending troops to Korea and later fighting alongside the United States in Vietnam. Thailand since 2005 has experienced several rounds of political turmoil including a military coup in 2006 that ousted then Prime Minister THAKSIN Chinnawat, followed by large-scale street protests by competing political factions in 2008, 2009, and 2010. Demonstrations in 2010 culminated with clashes between security forces and pro-THAKSIN protesters, elements of which were armed, and resulted in at least 92 deaths and an estimated \$1.5 billion in arson-related property losses. THAKSIN's youngest sister, YINGLAK Chinnawat, in 2011 led the Puea Thai Party to an electoral win and assumed control of the government. YINGLAK's leadership was almost immediately challenged by historic flooding in late 2011 that had large swathes of the country underwater and threatened to inundate Bangkok itself. Throughout 2012 the Puea Thai-led government struggled with the opposition Democrat Party to fulfill some of its

main election promises, including constitutional reform and political reconciliation. Since January 2004, thousands have been killed and wounded in violence associated with the ethno-nationalist insurgency in Thailand's southern Malay-Muslim majority provinces.

ECONOMY

Economy—overview: With a well-developed infrastructure, a free-enterprise economy, generally pro-investment policies, and strong export industries, Thailand achieved steady growth due largely to industrial and agriculture exports—mostly electronics, agricultural commodities, automobiles and parts, and processed foods. Thailand is trying to maintain growth by encouraging domestic consumption and public investment to offset weak exports in 2012. Unemployment, at

less than 1% of the labor force, stands as one of the lowest levels in the world, which puts upward pressure on wages in some industries. Thailand also attracts nearly 2.5 million migrant workers from neighboring countries. The Thai government is implementing a nation-wide 300 baht (\$10) per day minimum wage policy and deploying new tax reforms designed to lower rates on middle-income earners. The Thai economy has weathered internal and external economic shocks in recent years. The global economic severely cut Thailand's exports, with most sectors experiencing double-digit drops. In 2009, the economy contracted 2.3%. However, in 2010, Thailand's economy expanded 7.8%, its fastest pace since 1995, as exports rebounded. In late 2011 growth was interrupted by historic flooding in the industrial areas in Bangkok and its five surrounding provinces, crippling the manufacturing sector. Industry recovered from the second quarter of 2012 onward with GDP growth at 5.5% in 2012. The government has approved flood mitigation projects worth \$11.7 billion, which were started in 2012, to prevent similar economic damage, and an additional \$75 billion for infrastructure over the next seven years with a plan to start in 2013.

TIMOR-LESTE

INTRODUCTION

Background: The Portuguese began to trade with the island of Timor in the early 16th century and colonized it in mid-century. Skirmishing with the Dutch in the region eventually resulted in an 1859 treaty in which Portugal ceded the western portion of the island. Imperial Japan occupied Portuguese Timor from 1942 to 1945, but Portugal resumed colonial authority after the Japanese defeat in World War II. East Timor declared itself independent from Portugal on 28 November 1975 and was invaded and occupied by Indonesian forces nine days later. It was incorporated into Indonesia in July 1976 as the province of Timor Timur (East Timor). An unsuccessful campaign of pacification followed over the next two decades, during which an estimated 100,000 to 250,000 individuals lost their lives. On 30 August 1999, in a UN-supervised popular referendum, an overwhelming majority of the people of Timor-Leste voted for independence from Indonesia. However, in the next three weeks, anti-independence Timorese militias—organized and supported by the Indonesian military—commenced a large-scale, scorched-earth campaign of retribution. The militias killed approximately 1,400 Timorese and forcibly pushed 300,000 people into western Timor as refugees. Most of the country's infrastructure, including

homes, irrigation systems, water supply systems, and schools, and nearly 100% of the country's electrical grid were destroyed. On 20 September 1999, Australian-led peacekeeping troops deployed to the country and brought the violence to an end. On 20 May 2002, Timor-Leste was internationally recognized as an independent state. In 2006, internal tensions threatened the new nation's security when a military strike led to violence and a breakdown of law and order. At Dili's request, an Australian-led International Stabilization Force (ISF) deployed to Timor-Leste, and the UN Security Council established the UN Integrated Mission in Timor-Leste (UNMIT), which included an authorized police presence of over 1,600 personnel. The ISF and UNMIT restored stability, allowing for presidential and parliamentary elections in 2007 in a largely peaceful atmosphere. In February 2008, a rebel group staged an unsuccessful attack against the president and prime minister. The ringleader was killed in the attack, and most of the rebels surrendered in April 2008. Since the attack, the government has enjoyed one of its longest periods of post-independence stability, including successful 2012 elections for both the parliament and president. In late 2012, the UN Security Council voted to end its peacekeeping mission in Timor-Leste and both the ISF and UNMIT departed the country by the end of the year.

Flag description: red, with a black isosceles triangle (based on the hoist side) superimposed on a slightly longer yellow arrow head that extends to the center of the flag; a white star—pointing to the upper hoist-side corner of the flag—is in the center of the black triangle; yellow denotes the colonialism in Timor-Leste's past; black represents the obscurantism that needs to be overcome; red stands for the national liberation struggle; the white star symbolizes peace and serves as a guiding light

National anthem: *name:* "Patria" (Fatherland)
lyrics/music: Francisco Borja DA COSTA/Afonso DE ARAUJO

note: adopted 2002; the song was first used as an anthem when Timor-Leste declared its independence from Portugal in 1975; the lyricist, Francisco Borja DA COSTA, was killed in the Indonesian invasion just days after independence was declared

ECONOMY

Economy—overview: Since its 1999 independence, Timor-Leste has faced great challenges in rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of oil and gas resources in offshore waters has greatly supplemented government revenues. This technology-intensive industry, however, has done little to create jobs for the unemployed in part because there are no production facilities in Timor-Leste. Gas is piped to Australia. In June 2005, the National Parliament unanimously approved the creation of a Petroleum Fund to serve as a repository for all petroleum revenues and to preserve the value of Timor-Leste's petroleum wealth for future generations. The Fund held assets of US\$9.3 billion as of December 2011. The economy continues to recover from the mid-2006 outbreak of violence and civil unrest, which disrupted both private and public sector economic activity. Government spending increased markedly from 2009 through 2012, primarily on basic infrastructure, including electricity and roads. Limited experience in procurement and infrastructure building has hampered these projects. The underlying economic policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty. Timor-Leste had a balanced budget in 2012 with government expenditures of \$1.7 billion focusing on development of public infrastructure. On the strength of its oil-wealth, the economy has achieved real

growth of approximately 10% per year for the last several years, among the highest sustained growth rates in the world.

TOGO

INTRODUCTION

Background: French Togoland became Togo in 1960. Gré. Gnassingbé EYADEMA, installed as military ruler in 1967, ruled Togo with a heavy hand for almost four decades. Despite the facade of multi-party elections instituted in the early 1990s, the government was largely dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party has maintained power almost continually since 1967 and maintains a majority of seats in today's legislature. Upon EYADEMA's death in February 2005, the military installed the president's son, Faure GNASSINGBE, and then

engineered his formal election two months later. Democratic gains since then allowed Togo to hold its first relatively free and fair legislative elections in October 2007. After years of political unrest and condemnation from international organizations for human rights abuses, Togo is finally being re-welcomed into the international community. In January 2012, Togo assumed a nonpermanent seat on the UN Security Council for the 2012-13 term.

ECONOMY

Economy—overview: This small, sub-Saharan economy depends heavily on both commercial and subsistence agriculture, which provides employment for a significant share of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings with cotton being the most important cash crop. Togo is among the world's largest producers of phosphate and Togo seeks to develop its carbonate phosphate reserves. The government's decade-long effort, supported by the World Bank and the IMF to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on follow through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors. Foreign direct investment inflows

have slowed over recent years. Togo completed its IMF Extended Credit Facility in 2011 and reached a HIPC debt relief completion point in 2010 at which 95% of the country's debt was forgiven. Togo continues to work with the IMF on structural reforms.

TOKELAU

INTRODUCTION

Background: Originally settled by Polynesian emigrants from surrounding island groups, the Tokelau Islands were made a British protectorate in 1889. They were transferred to New Zealand administration in 1925. Referenda held in 2006 and 2007 to change the status of the islands from that of a New Zealand territory to one of free association with New Zealand did not meet the needed threshold for approval.

National symbol(s): tuluma (fishing tackle box)

National anthem: name: "Te Atua" (For the Almighty)

lyrics/music: unknown/Falani KALOLO

note: adopted 2008; in preparation for eventual self governance, Tokelau held a national contest to choose an anthem; as a territory of New Zealand, "God Defend New Zealand" and "God Save the Queen" are official (see New Zealand)

ECONOMY

Economy—overview: Tokelau's small size (three villages), isolation, and lack of resources greatly restrain economic development and confine agriculture to the subsistence level. The people rely heavily on aid from New Zealand—about \$10 million annually in 2008 and 2009—to maintain public services. New Zealand's support amounts to 80% of Tokelau's recurrent government budget. An international trust fund, currently worth nearly US\$32 million, was established in 2004 to provide Tokelau an independent source of revenue. The principal sources of revenue come from sales of copra, postage stamps,

souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand.

TONGA

INTRODUCTION

Background: Tonga—unique among Pacific nations—never completely lost its indigenous governance. The archipelagos of "The Friendly Islands" were united into a Polynesian kingdom in

1845. Tonga became a constitutional monarchy in 1875 and a British protectorate in 1900; it withdrew from the protectorate and joined the Commonwealth of Nations in 1970. Tonga remains the only monarchy in the Pacific.

ECONOMY

Economy—overview: Tonga has a small, open, South Pacific island economy. It has a narrow export base in agricultural goods. Squash, vanilla beans, and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. Tourism is the second-largest source of hard currency earnings following remittances. Tonga had 39,000 visitors in 2006. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well developed social services. High unemployment among the young, moderate inflation, pressures for democratic reform, and rising civil service expenditures are major issues facing the government.

INTRODUCTION

Background: First colonized by the Spanish, the islands came under British control in the early 19th century. The islands' sugar industry was hurt by the emancipation of the slaves in 1834. Manpower was replaced with the importation of contract laborers from India between 1845 and 1917, which boosted sugar production as well as the cocoa industry. The discovery of oil on Trinidad in 1910 added another important export. Independence was attained in 1962. The country is one of the most prosperous in the Caribbean thanks largely to petroleum and natural gas production and processing. Tourism, mostly in Tobago, is targeted for expansion and is growing. The government is coping with a rise in violent crime.

ECONOMY

Economy—overview: Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses and has one of the highest growth rates and per capita incomes in Latin America. Economic growth between 2000 and 2007 averaged slightly over 8%, significantly above the regional average of about 3.7% for that same period; however, GDP has slowed down since then and contracted during 2009-2011 due to depressed natural gas prices and changing markets. Growth had been fueled by investments in liquefied natural gas, petrochemicals, and steel with additional upstream and downstream investment planned. Trinidad and Tobago is the leading Caribbean producer of oil and gas, and its economy is heavily dependent upon these resources but it also supplies manufactured goods, notably food products and beverages, as well as cement to the Caribbean region. Oil and gas account for about 40% of GDP and 80% of exports, but only 5% of employment. Oil production has declined over the last decade as the country focused the majority of its efforts on natural gas. However, declining reserves, lack of government investment in the sector, and the changing global gas market raises concern for the long-term growth of the country's energy sector. Although Trinidad and Tobago enjoys cheap electricity from natural gas, the renewable energy

sector has recently garnered increased interest. The country is also a regional financial center with a well-regulated and stable financial system. Other sectors the Government of Trinidad and Tobago targeted for increased investment and projected growth include tourism, agriculture, information and communications technology, and shipping. The economy benefits from a growing trade surplus with the US. The US is Trinidad and Tobago's leading trade partner. The previous MANNING administration benefited from fiscal surpluses fueled by the dynamic export sector; however, declines in oil and gas prices have reduced government revenues, challenging the current government's commitment to maintaining high levels of public investment. Crime and Bureaucratic hurdles continue to be the biggest deterrents for attracting more foreign direct investment and business.

TUNISIA

INTRODUCTION

Background: Rivalry between French and Italian interests in Tunisia culminated in a French invasion in 1881 and the creation of a protectorate. Agitation for independence in the decades following World War I was finally successful in getting the French to recognize Tunisia as an independent state in 1956. The country's first president, Habib BOURGUIBA, established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In November 1987, BOURGUIBA was removed from office and replaced by Zine el Abidine BEN ALI in a bloodless coup. Street protests that began in Tunis in December 2010 over high unemployment, corruption, widespread poverty, and high food prices escalated in January 2011, culminating in rioting that led to hundreds of deaths. On 14 January 2011, the same day BEN ALI dismissed the government, he fled the country, and by late January 2011, a "national unity government" was formed. Elections for the new Constituent Assembly were held in late October 2011, and in December, it elected human rights activist Moncef MARZOUKI as interim president. The Assembly began drafting a new constitution in February 2012, and released a second working draft in December 2012. The interim government has proposed presidential and parliamentary elections be held in 2013.

lyrics/music: Mustafa Sadik AL-RAFII and Aboul-Qacem ECHEBBI/Mohamad Abdel WAHAB

note: adopted 1957, replaced 1958, restored 1987; Mohamad Abdel WAHAB also composed the music for the anthem of the United Arab Emirates

ECONOMY

Economy—overview: Tunisia's diverse, market-oriented economy has long been cited as a success story in Africa and the Middle East, but it faces an array of challenges during the country's ongoing political transition. Following an ill-fated experiment with socialist economic policies in the 1960s, Tunisia embarked on a successful strategy focused on bolstering exports, foreign investment, and tourism, all of which have become central to the country's economy. Key exports now include textiles and apparel, food products, petroleum products, chemicals, and phosphates, with about 80% of exports

bound for Tunisia's main economic partner, the European Union. Tunisia's liberal strategy, coupled with investments in education and infrastructure, fueled decades of 4-5% annual GDP growth and improving living standards. Former President (1987-2011) Zine el Abidine BEN ALI continued these policies, but as his reign wore on cronyism and corruption stymied economic performance and unemployment rose among the country's growing ranks of university graduates. These grievances contributed to the January 2011 overthrow of BEN ALI, sending Tunisia's economy into a tailspin as tourism and investment declined sharply. As the economy recovers, Tunisia's government faces challenges reassuring businesses and investors, bringing budget and current account deficits under control, shoring up the country's financial system, bringing down high unemployment, and reducing economic disparities between the more developed coastal region and the impoverished interior.

TURKEY

INTRODUCTION

Background: Modern Turkey was founded in 1923 from the Anatolian remnants of the defeated Ottoman Empire by national hero Mustafa KEMAL, who was later honored with the title Ataturk or "Father of the Turks." Under his authoritarian leadership, the country adopted wide-ranging social, legal, and political reforms. After a period of one-party rule, an experiment with multi-party politics led to the 1950 election victory of the opposition Democratic

Party and the peaceful transfer of power. Since then, Turkish political parties have multiplied, but democracy has been fractured by periods of instability and intermittent military coups (1960, 1971, 1980), which in each case eventually resulted in a return of political power to civilians. In 1997, the military again helped engineer the ouster—popularly dubbed a "post-modern coup"—of the then Islamic-oriented government. Turkey intervened militarily on Cyprus in 1974 to prevent a Greek takeover of the island and has since acted as patron state to the "Turkish Republic of Northern Cyprus," which only Turkey recognizes. A separatist insurgency begun in 1984 by the Kurdistan Workers' Party (PKK)—now known as the Kurdistan People's Congress or Kongra-Gel (KGK)—has dominated the Turkish military's attention and claimed more than 30,000 lives. After the capture of the group's leader in 1999, the insurgents largely withdrew from Turkey mainly to northern Iraq. In 2004, KGK announced an end to its ceasefire

and attacks attributed to the KGK increased. Turkey joined the UN in 1945 and in 1952 it became a member of NATO. In 1964, Turkey became an associate member of the European Community. Over the past decade, it has undertaken many reforms to strengthen its democracy and economy; it began accession membership talks with the European Union in 2005.

ECONOMY

Economy—overview: Turkey's largely free-market economy is increasingly driven by its industry and service sectors, although its traditional agriculture sector still accounts for about 25% of employment. An aggressive privatization program has reduced state involvement in basic industry, banking, transport, and communication, and an emerging cadre of middle-class entrepreneurs is adding dynamism to the economy and expanding production beyond the traditional textiles and clothing sectors. The automotive, construction, and electronics industries, are rising in importance and have surpassed textiles within Turkey's export mix. Oil began to flow through the Baku-Tbilisi-Ceyhan pipeline in May 2006, marking a major milestone that will bring up to 1 million barrels per day from the Caspian to market. Several gas pipelines projects also are moving forward to help transport Central Asian gas to Europe through Turkey, which over the long term will help address Turkey's dependence on imported oil and gas to meet 97% of its energy needs. After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and fiscal reforms as part of an IMF program. The reforms strengthened the country's economic fundamentals and ushered in an era of strong growth—averaging more than 6% annually until 2008. Global economic conditions and tighter fiscal policy caused GDP to contract in 2009, but Turkey's well-regulated financial markets and banking system helped the country weather the global financial crisis and GDP rebounded strongly to 9.2% in 2010, as exports returned to normal levels following the recession. Growth dropped to approximately 3% in 2012. Turkey's public sector debt to GDP ratio has fallen to about 40%, and at least one rating agency upgraded Turkey's debt to investment grade in 2012. Turkey remains dependent on often volatile, short-term investment to finance its large trade deficit. The stock value of FDI stood at \$117 billion at year-end 2012. Inflows have slowed because of continuing economic turmoil in Europe, the source of much of Turkey's FDI. Turkey's relatively high current account deficit, uncertainty related to monetary policy-making, and political turmoil within Turkey's neighborhood leave the economy vulnerable to destabilizing shifts in investor confidence.

female: 670,328 (2010 est.)

Military expenditures: 5.3% of GDP (2005 est.)

country comparison to the world: 14

Military—note: the ruling Justice and Development Party (AKP) has incrementally asserted its supremacy over the military since first taking power in 2002 and has reduced the role of the Turkish Armed Forces (TSK) in internal security, increasing the responsibility of the Turkish National Police (TNP) in combating its Kurdish insurgency; the TSK leadership continues to play a role in politics and considers itself guardian of Turkey's secular state; primary domestic threats are listed as fundamentalism (with the definition in some dispute

with the civilian government), separatism (Kurdish discontent), and the extreme left wing; Ankara strongly opposed establishment of an autonomous Kurdish region; an overhaul of the Turkish Land Forces Command (TLFC) taking place under the "Force 2014" program is to produce 20-30% smaller, more highly trained forces characterized by greater mobility and firepower and capable of joint and combined operations; the TLFC has taken on increasing international peacekeeping responsibilities, and took charge of a NATO International Security Assistance Force (ISAF) command in Afghanistan in April 2007; the Turkish Navy is a regional naval power that wants to develop the capability to project power beyond Turkey's coastal waters; the Navy is heavily involved in NATO, multinational, and UN operations; its roles include control of territorial waters and security for sea lines of communications; the Turkish Air Force adopted an "Aerospace and Missile Defense Concept" in 2002 and has initiated project work on an integrated missile defense system; Air Force priorities include attaining a modern deployable, survivable, and sustainable force structure, and establishing a sustainable command and control system (2008)

TRANSNATIONAL ISSUES

Disputes—international: complex maritime, air, and territorial disputes with Greece in the Aegean Sea; status of north Cyprus question remains; Syria and Iraq protest Turkish hydrological projects to control upper Euphrates waters; Turkey has expressed concern over the status of Kurds in Iraq; in 2009, Swiss mediators facilitated an accord reestablishing diplomatic ties between Armenia and Turkey, but neither side has ratified the agreement and the rapprochement effort has faltered; Turkish authorities have complained that blasting from quarries in Armenia might be damaging the medieval ruins of Ani, on the other side of the Arpacay valley;

Refugees and internally displaced persons: refugees (country of origin): 11,322 (Iraq) (2012); 377,154 (Syria) (2013)

IDPs: 954,000-1.2 million (displaced from 1984-2005 because of fighting between Kurdish PKK and Turkish military; most IDPs are Kurds from eastern and southeastern provinces; no information available on persons displaced by development projects) (2006)

Illicit drugs: key transit route for Southwest Asian heroin to Western Europe and, to a lesser extent, the US—via air, land, and sea routes; major Turkish and other international trafficking organizations operate out of Istanbul; laboratories to convert imported morphine base into heroin exist in remote regions of Turkey and near Istanbul; government maintains strict controls over areas of legal opium poppy cultivation and over output of poppy straw concentrate; lax enforcement of money-laundering controls

TURKMENISTAN

INTRODUCTION

Background: Present-day Turkmenistan covers territory that has been at the crossroads of civilizations for centuries. The area was ruled in antiquity by various Persian empires, and was conquered by Alexander the Great, Muslim crusaders, the Mongols, Turkic warriors, and eventually the Russians. In medieval times Merv (today known as Mary) was one of the great cities of the Islamic world and an important stop on the Silk Road. Annexed by Russia in the late 1800s, Turkmenistan later figured prominently in the anti-Bolshevik movement in Central Asia. In 1924, Turkmenistan became a Soviet republic; it achieved independence upon the dissolution of the USSR in 1991. Extensive hydrocarbon/natural gas reserves, which have yet to be fully exploited, have begun to transform the country. Turkmenistan is moving to expand its extraction and delivery projects. The Government of Turkmenistan is actively working to diversify its gas export routes beyond the still important Russian pipeline network. In 2010, new gas export pipelines that carry Turkmen gas to China and to northern Iran began operating, effectively ending the Russian monopoly on Turkmen gas exports. President for Life Saparmurat NYIAZOW died in December 2006, and Turkmenistan held its first multi-candidate presidential election in February 2007. Gurbanguly BERDIMUHAMEDOW, a deputy cabinet chairman under NYIAZOW, emerged as the country's new president; he was chosen as president again in February 2012, in an election that the OSCE said lacked the freedoms necessary to create a competitive environment.

Flag description: green field with a vertical red stripe near the hoist side, containing five tribal guls (designs used in producing carpets) stacked above two crossed olive branches; five white stars and a white crescent moon appear in the upper corner of the field just to the fly side of the red stripe; the green color and crescent moon represent Islam; the five stars symbolize the regions or welayats of Turkmenistan; the guls reflect the national identity of Turkmenistan where carpet-making has long been a part of traditional nomadic life

note: the flag of Turkmenistan is the most intricate of all national flags

National symbol(s): Akhal-Teke horse**National anthem:** name: "Garassyz, Bitarap Turkmenistanyň" (Independent, Neutral, Turkmenistan State Anthem)

lyrics/music: collective/Veli MUKHATOV

note: adopted 1997, lyrics revised 2008; following the death of the President Saparmurat NYAZOW, the lyrics were altered to eliminate references to the former president

ECONOMY**Economy—overview:** Turkmenistan is largely a desert country with intensive agriculture in irrigated oases and sizeable gas and oil resources. The two largest crops are cotton, most of which is produced for export, and wheat, which is domestically consumed. Although agriculture accounts for roughly 8% of GDP, it continues to employ nearly half of the country's workforce. Turkmenistan's authoritarian regime has taken a cautious approach to economic reform, hoping to use gas and cotton export revenues to sustain its inefficient and highly corrupt economy. Privatization goals remain limited. From 1998-2005, Turkmenistan suffered from the continued lack of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose by an average of roughly 15% per year from 2003-08, largely because of higher international oil and gas prices. Additional pipelines to China, that began operation in early 2010, and increased pipeline capacity to Iran, have expanded Turkmenistan's export routes for its gas. Overall prospects in the near future are discouraging because of endemic corruption, a poor educational system, government misuse of oil and gas revenues, and Ashgabat's reluctance to adopt market-oriented reforms. The majority of Turkmenistan's economic statistics are state secrets. The present government established a State Agency for Statistics, but GDP numbers and other publicized figures are subject to wide margins of error. In particular, the rate of GDP growth is uncertain. Since his election, President BERDIMUHAMEDOW unified the country's dual currency exchange rate, ordered the redenomination of the manat, reduced state subsidies for gasoline, and initiated development of a special tourism zone on the Caspian Sea. Although foreign investment is encouraged, and

some improvements in macroeconomic policy have been made, numerous bureaucratic obstacles impede international business activity.

TRANSNATIONAL ISSUES

Disputes—International: cotton monoculture in Uzbekistan and Turkmenistan creates water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2005, but Caspian seabed delimitation remains stalled with Azerbaijan, Iran, and Kazakhstan due to Turkmenistan's indecision over how to allocate the sea's waters and seabed; bilateral talks continue with Azerbaijan on dividing the seabed and contested oilfields in the middle of the Caspian

Illicit drugs: transit country for Afghan narcotics bound for Russian and Western European markets; transit point for heroin precursor chemicals bound for Afghanistan

TURKS AND CAICOS ISLANDS

INTRODUCTION

Background: The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands remain a British overseas territory.

TUVALU

INTRODUCTION

Background: In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the

Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain name ".tv" for \$50 million in royalties over a 12-year period.

GEOGRAPHY

Location: Oceania, island group consisting of nine coral atolls in the South Pacific Ocean, about one-half of the way from Hawaii to Australia

Geographic coordinates: 8 00 S, 178 00 E

Map references: Oceania

Area: total: 26 sq km
country comparison to the world: 238
land: 26 sq km
water: 0 sq km

Area—comparative: 0.1 times the size of Washington, DC

Land boundaries: 0 km

Coastline: 24 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm
exclusive economic zone: 200 nm

Climate: tropical; moderated by easterly trade winds (March to November); westerly gales and heavy rain (November to March)

Terrain: low-lying and narrow coral atolls

Elevation extremes: lowest point: Pacific Ocean 0 m
highest point: unnamed location 5 m

Natural resources: fish

Land use: arable land: 0%
permanent crops: 60%
other: 40% (2011)

Irrigated land: NA

Natural hazards: severe tropical storms are usually rare, but in 1997 there were three cyclones; low levels of islands make them sensitive to changes in sea level

Environment—current issues: since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities (the Japanese

Government has built one desalination plant and plans to build one other); beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from the spread of the Crown of Thorns starfish; Tuvalu is concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which threaten the country's underground water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Law of the Sea, Ozone Layer Protection, Ship Pollution, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: one of the smallest and most remote countries on Earth; six of the nine coral atolls—Nanumea, Nui, Vaitupu, Nukufetau, Funafuti, and Nukulaelae—have lagoons open to the ocean; Nanumaya and Niutao have landlocked lagoons; Niulakita does not have a lagoon

ECONOMY

Economy—overview: Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. Only eight of the atolls are inhabited. The country has no known mineral resources and few exports and is almost entirely dependent upon imported food and fuel. Subsistence farming and fishing are the primary economic activities. Fewer than 1,000 tourists, on average, visit Tuvalu annually. Job opportunities are scarce and public sector workers make up most of those employed. About 15% of the adult male population work as seamen on merchant ships abroad, and remittances are a vital source of income contributing around \$2 million in 2007. Substantial income is received annually from the Tuvalu Trust Fund (TTF) an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this fund grew from an initial \$17 million to an estimated value of \$77 million in 2006. The TTF contributed nearly \$9 million towards the government budget in 2006 and is an important cushion for meeting shortfalls in the government's budget. The US Government is also a major revenue source for Tuvalu because of payments from a 1988 treaty on fisheries. In an effort to ensure financial stability and sustainability, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts. Tuvalu also derives royalties from the lease of its ".tv" Internet domain name with revenue of more than \$2 million in 2006. A minor source of government revenue comes from the sale of stamps and coins. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and income from overseas investments. Growing income disparities and the vulnerability of the country to climatic change are among leading concerns for the nation.

UGANDA

INTRODUCTION

Background: The colonial boundaries created by Britain to delimit Uganda grouped together a wide range of ethnic groups with different political systems and cultures. These differences prevented the establishment of a working political community after independence was achieved in 1962. The dictatorial regime of Idi AMIN (1971-79) was responsible for the deaths of some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980-85) claimed at least another 100,000 lives. The rule of Yoweri MUSEVENI since 1986 has brought relative stability and economic growth to Uganda. During the 1990s, the government promulgated non-party presidential and legislative elections.

ECONOMY

Economy—overview: Uganda has substantial natural resources, including fertile soils, regular rainfall, small deposits of copper, gold, and other minerals, and recently discovered oil. Uganda has never conducted a national minerals survey. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for the bulk of export revenues. Since 1986, the government—with the support of foreign countries and international agencies—has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation, and boosting production and export earnings. Since 1990 economic reforms ushered in an era of solid economic growth based on continued investment in infrastructure, improved incentives for production and exports, lower inflation, better domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Uganda has received about \$2 billion in multilateral and bilateral debt relief. In 2007 Uganda received \$10 million for a Millennium Challenge Account Threshold Program. The global economic downturn hurt Uganda's exports; however, Uganda's GDP growth has largely recovered due to past reforms and sound management of the downturn. Oil revenues and taxes will become a larger source of government funding as oil comes on line in the next few years. Rising food and fuel prices in 2011 led to protests. Instability in South Sudan is a risk for the Ugandan economy because Uganda's main export partner is Sudan, and Uganda is a key destination for Sudanese refugees. Unreliable power, high energy costs, inadequate transportation infrastructure, and corruption inhibit economic development and investor confidence.

UKRAINE

INTRODUCTION

Background: Ukraine was the center of the first eastern Slavic state, Kyivan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by interne-cine quarrels and Mongol invasions, Kyivan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kyivan Rus laid the foundation for Ukrainian nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by the Russian Empire. Following the collapse

of czarist Russia in 1917, Ukraine was able to achieve a short-lived period of independence (1917-20), but was reconquered and forced to endure a brutal Soviet rule that engineered two forced famines (1921-22 and 1932-33) in which over 8 million died. In World War II, German and Soviet armies were responsible for some 7 to 8 million more deaths. Although final independence for Ukraine was achieved in 1991 with the dissolution of the USSR, democracy and prosperity remained elusive as the legacy of state control and endemic corruption stalled efforts at economic reform, privatization, and civil liberties. A peaceful mass protest "Orange Revolution" in the closing months of 2004 forced the authorities to overturn a rigged presidential election and to allow a new internationally monitored vote that swept into power a reformist slate under Viktor YUSHCHENKO. Subsequent internal squabbles in the YUSHCHENKO camp allowed his rival Viktor YANUKOVYCH to stage a comeback in parliamentary elections and become prime minister in August of 2006. An early legislative election, brought on by a political crisis in the spring of 2007, saw Yuliya TYMOSHENKO, as head of an "Orange" coalition, installed as a new prime minister in December 2007. Viktor YANUKOVYCH was elected president in a February 2010 run-off election that observers

assessed as meeting most international standards. The following month, Ukraine's parliament, the Rada, approved a vote of no-confidence prompting Yuliya TYMOSHENKO to resign from her post as prime minister. In October 2012, Ukraine held Rada elections, widely criticized by Western observers as flawed due to use of government resources to favor ruling party candidates, interference with media access, and harassment of opposition candidates.

ECONOMY

Economy—overview: After Russia, the Ukrainian republic was the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Shortly after independence in August 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Ukraine depends on imports to meet about three-fourths of its annual oil and natural gas requirements and 100% of its nuclear fuel needs. After a two-week dispute that saw gas supplies cutoff to Europe, Ukraine agreed to 10-year gas supply and transit contracts with Russia in January 2009 that brought gas prices to "world" levels. The strict terms of the contracts have further hobbled Ukraine's cash-strapped state gas company, Naftohaz. Outside institutions—particularly the IMF—have encouraged Ukraine to quicken the pace and scope of reforms to foster economic growth. Ukrainian Government officials eliminated most tax and customs privileges in a March 2005 budget law, bringing more economic activity out of Ukraine's large shadow economy, but more improvements are needed, including fighting corruption, developing capital markets, and improving the legislative framework. Ukraine's economy was buoyant despite political turmoil between the prime minister and president until mid-2008. Real GDP growth exceeded 7% in 2006-07, fueled by high global prices for steel—Ukraine's top export—and by strong domestic consumption, spurred by rising pensions and wages. A drop in steel prices and Ukraine's exposure to the global financial crisis due to aggressive foreign borrowing lowered growth in 2008. Ukraine reached an agreement with the IMF for a \$16.4 billion Stand-By Arrangement in November 2008 to deal with the economic crisis, but the program quickly stalled due to the Ukrainian Government's lack of progress in implementing reforms. The economy contracted nearly 15% in 2009, among the worst economic performances in the world. In April 2010, Ukraine negotiated a price discount on Russian gas imports in exchange for extending Russia's lease on its naval base in Crimea. In August 2010, Ukraine, under the YANUKOVYCH Administration, reached a new agreement with the IMF for a \$15.1 billion Stand-By Agreement. Economic

growth resumed in 2010 and 2011, buoyed by exports. After initial disbursements, the IMF program stalled in early 2011 due to the Ukrainian Government's lack of progress in implementing key gas sector reforms, namely gas tariff increases. Economic growth slowed in the second half of 2012 with Ukraine finishing the year in technical recession following two consecutive quarters of negative growth.

Telephones—mobile cellular: 55.576 million (2011)

country comparison to the world: 23

Telephone system: *general assessment:* Ukraine's telecommunication development plan emphasizes improving domestic trunk lines, international connections, and the mobile-cellular system domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is rising and the domestic trunk system is being improved; about one-third of Ukraine's networks are digital and a majority of regional centers now have digital switching stations; improvements in local networks and local exchanges continue to lag; the mobile-cellular telephone system's expansion has slowed, largely due to saturation of the market which has reached 125 mobile phones per 100 people

international: country code—380; 2 new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and 3 Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by an unknown number of earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems (2010)

Broadcast media: Ukraine's state-controlled nationwide TV broadcast channel (UT1) and a number of privately owned TV networks provide basic TV coverage; multi-channel cable and satellite TV services are available; Russian television broadcasts have a small audience nationwide, but larger audiences in the eastern and southern regions; Ukraine's radio broadcast market, a mix

of independent and state-owned networks, is comprised of some 300 stations (2007)

TRANSNATIONAL ISSUES

Disputes—international: 1997 boundary delimitation treaty with Belarus remains unratified due to unresolved financial claims, stalling demarcation and reducing border security; delimitation of land boundary with Russia is complete with preparations for demarcation underway; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and ongoing expert-level discussions; Moldova and Ukraine operate joint customs posts to monitor transit of people and commodities through Moldova's break-away Transnistria Region, which remains under the auspices of an Organization for Security and Cooperation in Europe-mandated peacekeeping mission comprised of Moldovan, Transnistrian, Russian, and Ukrainian troops; the ICJ ruled largely in favor of Romania in its dispute submitted in 2004 over Ukrainian-administered Zmiynyy/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Illicit drugs: limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; Ukraine has improved anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in February 2004; Ukraine's anti-money-laundering regime continues to be monitored by FATF

UNITED ARAB EMIRATES

INTRODUCTION

Background: The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states—Abu Dhabi, 'Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn—merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra's al Khaymah. The UAE's per capita GDP is on par with those of leading West European nations. Its high oil revenues and its moderate foreign policy stance have allowed the UAE to play a vital role in the affairs of the region. For more than three decades, oil and global finance drove the UAE's economy. However, in 2008-09, the confluence of falling oil prices, collapsing real estate prices, and the international banking crisis hit the UAE especially hard. The UAE has essentially avoided the "Arab Spring" unrest seen elsewhere in the Middle East, though in March 2011, political activists and intellectuals signed a petition calling for greater public participation in governance that was widely circulated on the Internet. In an effort to stem potential further unrest, the government announced a multi-year, \$1.6-billion infrastructure investment plan for the poorer northern Emirates.

ECONOMY

Economy—overview: The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP based on oil and gas output to 25%. Since the discovery of oil in the UAE more than 30 years ago, the country has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. In April 2004, the UAE signed a Trade and Investment Framework Agreement with Washington and in November 2004 agreed to undertake negotiations toward a Free Trade Agreement with the US; however, those talks have not moved forward. The country's Free Trade Zones—offering 100% foreign ownership and zero taxes—are helping to attract foreign investors. The global financial crisis, tight international credit, and deflated asset prices constricted the economy in 2009. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency. The UAE Central Bank and Abu Dhabi-based banks bought the largest shares. In December 2009 Dubai received an additional \$10 billion loan from the emirate of Abu Dhabi. Dependence on oil, a large expatriate workforce, and growing inflation pressures are significant long-term challenges. The UAE's strategic plan for the next few years focuses on diversification and creating more opportunities for nationals through improved education and increased private sector employment.

TRANSNATIONAL ISSUES

Disputes—international: boundary agreement was signed and ratified with Oman in 2003 for entire border, including Oman's Musandam Peninsula and Al Madhah enclaves, but contents of the agreement and detailed maps showing the alignment have not been published; Iran and UAE dispute Tunb Islands and Abu Musa Island, which Iran occupies

Illicit drugs: the UAE is a drug transshipment point for traffickers given its proximity to Southwest Asian drug-producing countries; the UAE's position as a major financial center makes it vulnerable to money laundering; anti-money-laundering controls improving, but informal banking remains unregulated

UNITED KINGDOM

INTRODUCTION

Background: The United Kingdom has historically played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith in the 19th century, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two world wars and the Irish Republic's withdrawal from the union. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council and a founding member of NATO and the Commonwealth, the UK pursues a global approach to foreign policy. The UK is also an active member of the EU, although it chose to remain outside the Economic and Monetary Union. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1999. The latter was suspended until May 2007 due to wrangling over the peace process, but devolution was fully completed in March 2010.

ECONOMY

Economy—overview: The UK, a leading trading power and financial center, is the second largest economy in Europe after Germany. Over the past two decades, the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, natural gas, and oil resources, but its oil and natural gas reserves are declining and the UK

became a net importer of energy in 2005. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. After emerging from recession in 1992, Britain's economy enjoyed the longest period of expansion on record during which time growth outpaced most of Western Europe. In 2008, however, the global financial crisis hit the economy particularly hard, due to the importance of its financial sector. Sharply declining home prices, high consumer debt, and the global economic slowdown compounded Britain's economic problems, pushing the economy into recession in the latter half of 2008 and prompting the then BROWN (Labour) government to implement a number of measures to stimulate the economy and stabilize the financial markets; these include nationalizing parts of the banking system, temporarily cutting taxes, suspending public sector borrowing rules, and moving forward public spending on capital projects. Facing burgeoning public deficits and debt levels, in 2010 the CAMERON-led coalition government (between Conservatives and Liberal Democrats) initiated a five-year austerity program, which aimed to lower London's budget deficit from over 10% of GDP in 2010 to nearly 1% by 2015. In November 2011, Chancellor of the Exchequer George OSBORNE announced additional austerity measures through 2017 because of slower-than-expected economic growth and the impact of the euro-zone debt crisis. The CAMERON government raised the value added tax from 17.5% to 20% in 2011. It has pledged to reduce the corporation tax rate to 21% by 2014. The Bank of England (BoE) implemented an asset purchase program of up to £375 billion (approximately \$605 billion) as of December 2012. During times of economic crisis, the BoE coordinates interest rate moves with the European Central Bank, but Britain remains outside the European Economic and Monetary Union (EMU). In 2012, weak consumer spending and subdued business investment weighed on the economy. GDP fell 0.1%, and the budget deficit remained stubbornly high at 7.7% of GDP. Public debt continued to increase.

TRANSNATIONAL ISSUES

Disputes—international: in 2002, Gibraltar residents voted overwhelmingly by referendum to reject any "shared sovereignty" arrangement between the UK and Spain; the Government of Gibraltar insisted on equal participation in talks between the two countries; Spain disapproved of UK plans to grant Gibraltar greater autonomy; Mauritius and Seychelles claim the Chagos Archipelago (British Indian Ocean Territory); in 2001, the former inhabitants of the archipelago, evicted 1967–1973, were granted U.K. citizenship and the right of return, followed by Orders in Council in 2004 that banned rehabilitation, a High Court ruling reversed the ban, a Court of Appeal refusal to hear the case, and a Law Lords' decision in 2008 denied the right of return; in addition, the United Kingdom created the world's largest marine protection area around the Chagos islands prohibiting the extraction of any natural resources therein; UK rejects sovereignty talks requested by

Argentina, which still claims the Falkland Islands (Islas Malvinas) and South Georgia and the South Sandwich Islands; territorial claim in Antarctica (British Antarctic Territory) overlaps Argentine claim and partially overlaps Chilean claim; Iceland, the UK, and Ireland dispute Denmark's claim

that the Faroe Islands' continental shelf extends beyond 200 nm

UNITED STATES

INTRODUCTION

Background: Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65), in which a northern Union of states defeated a secessionist Confederacy of 11 southern slave states, and the Great Depression of the 1930s, an economic downturn during which about a quarter of the labor force lost its jobs. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation state. Since the end of World War II, the economy has achieved relatively steady growth, low unemployment and inflation, and rapid advances in technology.

GEOGRAPHY

Location: North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

Geographic coordinates: 38 00 N, 97 00 W

Map references: North America

Area: total: 9,826,675 sq km

country comparison to the world: 3

land: 9,161,966 sq km

water: 664,709 sq km

note: includes only the 50 states and District of Columbia

Area—comparative: about half the size of Russia; about three-tenths the size of Africa; about half the size of South America (or slightly larger than Brazil); slightly larger than China; more than twice the size of the European Union

Land boundaries: total: 12,034 km

border countries: Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,141 km

note: US Naval Base at Guantanamo Bay, Cuba is leased by the US and is part of Cuba; the base boundary is 28 km

Coastline: 19,924 km

Maritime claims: territorial sea: 12 nm contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: not specified

Climate: mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain: vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes: lowest point: Death Valley -86 m

highest point: Mount McKinley (Denali) 6,194 m (highest point in North America)

note: the peak of Mauna Kea (4,207 m above sea level) on the island of Hawaii rises about 10,200 m above the Pacific Ocean floor; by this measurement, it is the world's tallest mountain—higher than Mount Everest (8,850 m), which is recognized as the tallest mountain above sea level

Natural resources: coal, copper, lead, molybdenum, phosphates, rare earth elements, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

note: the US has the world's largest coal reserves with 491 billion short tons accounting for 27% of the world's total

Land use: arable land: 16.29%

permanent crops: 0.26%

other: 83.44% (2011)

Irrigated land: 266,440 sq km (2007)

Total renewable water resources: 3,069 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): total: 478.4 cu km/yr (14%/46%/40%)

per capita: 1,583 cu m/yr (2005)

Natural hazards: tsunamis; volcanoes; earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the Midwest and Southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development volcanism: volcanic activity in the Hawaiian Islands, Western Alaska, the Pacific Northwest, and in the Northern Mariana Islands; both Mauna Loa (elev. 4,170 m) in Hawaii and Mount Rainier (elev. 4,392 m) in Washington have been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study

due to their explosive history and close proximity to human populations; Pavlof (elev. 2,519 m) is the most active volcano in Alaska's Aleutian Arc and poses a significant threat to air travel since the area constitutes a major flight path between North America and East Asia; St. Helens (elev. 2,549 m, famous for the devastating 1980 eruption, remains active today; numerous other historically active volcanoes exist, mostly concentrated in the Aleutian arc and Hawaii; they include: in Alaska: Aniakchak, Augustine, Chiginagak, Fourpeaked, Iliamna, Katmai, Kupreanof, Martin, Novarupta, Redoubt, Spurr, Wrangell; in Hawaii: Trident, Ugaishik-Peulik, Ukinrek Maars, Veniaminof; in the Northern Mariana Islands: Anatahan; and in the Pacific Northwest: Mount Baker, Mount Hood

Environment—current issues: air pollution resulting in acid rain in both the US and Canada; the US is the largest single emitter of carbon dioxide from the burning of fossil fuels; water pollution from runoff of pesticides and fertilizers; limited natural freshwater resources in much of the western part of the country require careful management; desertification

Environment—international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Climate Change, Desertification, Endangered Species, Environmental Modification, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling signed, but not ratified: Air Pollution-Persistent Organic Pollutants, Air Pollution-Volatile Organic Compounds, Biodiversity, Climate Change-Kyoto Protocol, Hazardous Wastes

Geography—note: world's third-largest country by size (after Russia and Canada) and by population (after China and India); Mt. McKinley is highest point in North America and Death Valley the lowest point on the continent

ECONOMY

Economy—overview: The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$49,800. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, they face higher barriers to enter their rivals' home markets than foreign firms face entering US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment; their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. Since 1996, dividends and capital gains have grown faster than wages or any other category of after-tax income. Imported oil accounts for nearly 55% of US consumption. Crude oil prices doubled between 2001 and 2006, the year home prices peaked; higher gasoline prices ate into consumers' budgets and many individuals fell behind in their mortgage payments. Oil prices climbed another 50% between 2006 and 2008, and bank foreclosures more than doubled in the same period. Besides dampening the housing market, soaring oil prices caused a drop in the value of the dollar and a deterioration in the US merchandise trade deficit, which peaked at \$840 billion in 2008. The sub-prime mortgage crisis, falling home prices, investment bank failures, tight credit, and the global economic downturn pushed the United States into a recession by mid-2008. GDP contracted until the third quarter of 2009, making this the deepest and longest downturn since the Great Depression. To help stabilize financial markets, in October 2008 the US Congress established a \$700 billion Troubled Asset Relief Program (TARP). The government used some of these funds to purchase equity in US banks and industrial corporations, much of which had been returned to the government by early 2011. In January 2009 the US Congress passed and President Barack OBAMA signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10 years—two-thirds on additional spending and one-third on tax cuts—to create jobs and to help the economy recover. In 2010 and 2011, the federal budget deficit reached nearly 9% of

GDP. In 2012 the federal government reduced the growth of spending and the deficit shrank to 7.6% of GDP. Wars in Iraq and Afghanistan required major shifts in national resources from civilian to military purposes and contributed to the growth of the budget deficit and public debt. Through 2011, the direct costs of the wars totaled nearly \$900 billion, according to US government figures. US revenues from taxes and other sources are lower, as a percentage of GDP, than those of most other countries. In March 2010, President OBAMA signed into law the Patient Protection and Affordable Care Act, a health insurance reform that will extend coverage to an additional 32 million American citizens by 2016, through private health insurance for the general population and Medicaid for the impoverished. Total spending on health care—public plus private—rose from 9.0% of GDP in 1980 to 17.9% in 2010. In July 2010, the president signed the DODD-FRANK Wall Street Reform and Consumer Protection Act, a law designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled banks that are "too big to fail," and improving accountability and transparency in the financial system—in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight. In December 2012, the Federal Reserve Board announced plans to purchase \$85 billion per month of mortgage-backed and Treasury securities in an effort to hold down long-term interest rates, and to keep short term rates near zero until unemployment drops to 6.5% from the December rate of 7.8%, or until inflation rises above 2.5%. Long-term problems include stagnation of wages for lower-income families, inadequate investment in deteriorating infrastructure, rapidly rising medical and pension costs of an aging population, energy shortages, and sizable current account and budget deficits—including significant budget shortages for state governments.

TRANSNATIONAL ISSUES

Disputes—international: the US has intensified domestic security measures and is collaborating closely with its neighbors, Canada and Mexico, to monitor and control legal and illegal personnel, transport, and commodities across the international borders; abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; 1990 Maritime Boundary Agreement in the Bering Sea still awaits Russian Duma ratification; Canada and the United States dispute how to divide the Beaufort Sea and the status of the Northwest Passage but continue to work cooperatively to survey the Arctic continental shelf; The Bahamas and US have not been able to agree on a maritime boundary; US Naval Base at Guantanamo Bay is leased from Cuba and only mutual agreement or US abandonment of the area can terminate the lease; Haiti claims US-administered Navassa Island; US has made no territorial claim in Antarctica (but has reserved the right to do so) and does not recognize the claims of any other states; Marshall Islands claims Wake Island; Tokelau included American Samoa's Swains Island among the islands listed in its 2006 draft constitution

Refugees and internally displaced persons: refugees (country of origin): the US admitted 76,000 refugees during FY2012 including 15,070 (Bhutan); 14,160 (Burma); 12,163 (Iraq); 4,911 (Somalia); 1,948 (Cuba); 1,758 (Iran); 1,346 (Eritrea)

Illicit drugs: world's largest consumer of cocaine (shipped from Colombia through Mexico and the Caribbean), Colombian heroin, and Mexican heroin and marijuana; major consumer of ecstasy and Mexican methamphetamine; minor consumer of high-quality Southeast Asian heroin; illicit producer of cannabis, marijuana, depressants, stimulants, hallucinogens, and methamphetamine; money-laundering center

UNITED STATES PACIFIC ISLAND WILDLIFE REFUGES

INTRODUCTION

Background: All of the following US Pacific island territories except Midway Atoll constitute the Pacific Remote Islands National Wildlife Refuge (NWR) Complex and as such are managed by the Fish and Wildlife Service of the US Department of the Interior. Midway Atoll NWR has been included in a Refuge Complex with the Hawaiian Islands NWR and also designated as part of Papahānaumokuākea Marine National Monument. These remote refuges are the most widespread collection of marine- and terrestrial-life protected areas on the planet under a single country's jurisdiction. They sustain many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land birds, insects, and vegetation not found elsewhere.

Baker Island: The US took possession of the island in 1857. Its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization began on this island but was disrupted by World War II and thereafter abandoned. The island was established as a NWR in 1974.

Howland Island: Discovered by the US early in the 19th century, the uninhabited atoll was officially claimed by the US in 1857. Both US and British companies mined for guano deposits until about 1890. In 1935, a short-lived attempt at colonization began on this island, similar to the effort on nearby Baker Island, but was disrupted by World War II and thereafter abandoned. The famed American aviatrix Amelia EARHART disappeared while seeking out Howland Island as a refueling stop during her 1937 round-the-world flight; Earhart Light, a day beacon near the middle of the west coast, was named in her memory. The island was established as a NWR in 1974.

Jarvis Island: First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858 but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889 but never carried out plans

for further exploitation. The US occupied and reclaimed the island in 1935. It was abandoned in 1942 during World War II. The island was established as a NWR in 1974.

Johnston Atoll: Both the US and the Kingdom of Hawaii annexed Johnston Atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. Johnston and Sand Islands were designated wildlife refuges in 1926. The US Navy took over the atoll in 1934. Subsequently, the US Air Force assumed control in 1948. The site was used for high-altitude nuclear tests in the 1950s and 1960s. Until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons. Munitions destruction, cleanup, and closure of the facility were completed by May 2005. The Fish and Wildlife Service and the US Air Force are currently discussing future management options; in the interim, Johnston Atoll and the three-mile Naval Defensive Sea around it remain under the jurisdiction and administrative control of the US Air Force.

Kingman Reef: The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa flights during the late 1930s. There are no terrestrial plants on the reef, which is frequently awash, but it does support abundant and diverse marine fauna and flora. In 2001, the waters surrounding the reef out to 12 nm were designated a US NWR.

Midway Islands: The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for transpacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a NWR and are the site of the world's largest Laysan albatross colony.

Palmyra Atoll: The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now partly privately owned by the Nature Conservancy with the rest owned by the Federal government and managed by the US Fish and Wildlife Service. These organizations are managing the atoll as a wildlife refuge. The lagoons and surrounding waters within the 12 nm US territorial seas were transferred to the US Fish and Wildlife Service and designated as a NWR in January 2001.

Climate: Baker, Howland, and Jarvis Islands: equatorial; scant rainfall, constant wind, burning sun

Johnston Atoll and Kingman Reef: tropical, but generally dry; consistent northeast trade winds with little seasonal temperature variation

Midway Islands: subtropical with cool, moist winters (December to February) and warm, dry summers (May to October); moderated by prevailing easterly winds; most of the 1,067 mm (42 in) of annual rainfall occurs during the winter

Palmyra Atoll: equatorial, hot; located within the low pressure area of the Intertropical Convergence Zone (ITCZ) where the northeast and southeast trade winds meet, it is extremely wet with between 4,000–5,000 mm (160–200 in) of rainfall each year

Terrain: low and nearly level sandy coral islands with narrow fringing reefs that have developed at the top of submerged volcanic mountains, which in most cases rise steeply from the ocean floor

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: Baker Island, unnamed location—8 m; Howland Island, unnamed location—3 m; Jarvis Island, unnamed location—7 m; Johnston Atoll, Sand Island—10 m; Kingman Reef, unnamed location—less than 2 m; Midway Islands, unnamed location—13 m; Palmyra Atoll, unnamed location—3 m

Natural resources: terrestrial and aquatic wildlife

Land use: arable land: 0%

permanent crops: 0%

other: 100% (2011)

Natural hazards: Baker, Howland, and Jarvis Islands: the narrow fringing reef surrounding the island poses a maritime hazard

Kingman Reef: wet or awash most of the time, maximum elevation of less than 2 m makes Kingman Reef a maritime hazard

Midway Islands, Johnston, and Palmyra Atolls: NA

Environment—current issues: Baker, Howland, and Jarvis Islands, and Johnston Atoll: no natural freshwater resources

Kingman Reef: none

Midway Islands and Palmyra Atoll: NA

Geography—note: Baker, Howland, and Jarvis Islands: scattered vegetation consisting of grasses, prostrate vines, and low growing shrubs; primarily

a nesting, roosting, and foraging habitat for sea-birds, shorebirds, and marine wildlife; closed to the public

Johnston Atoll: Johnston Island and Sand Island are natural islands, which have been expanded by coral dredging; North Island (Akau) and East Island (Hikina) are manmade islands formed from coral dredging; the egg-shaped reef is 34 km in circumference; closed to the public

Kingman Reef: barren coral atoll with deep interior lagoon; closed to the public

Midway Islands: a coral atoll managed as a NWR and open to the public for wildlife-related recreation in the form of wildlife observation and photography

Palmyra Atoll: the high rainfall and resulting lush vegetation make the environment of this atoll unique among the US Pacific Island territories; supports a large undisturbed stand of Pisonia beach forest

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: public entry is only by special-use permit from US Fish and Wildlife Service and generally restricted to scientists and educators; visited annually by US Fish and Wildlife Service

Johnston Atoll: in previous years, an average of 1,100 US military and civilian contractor personnel were present; as of May 2005, all US government personnel had left the island

Midway Islands: approximately 40 people make up the staff of US Fish and Wildlife Service and their services contractor living at the atoll

Palmyra Atoll: four to 20 Nature Conservancy, US Fish and Wildlife staff, and researchers

GOVERNMENT

Country name: conventional long form: none

conventional short form: Baker Island; Howland Island; Jarvis Island; Johnston Atoll; Kingman Reef; Midway Islands; Palmyra Atoll

Dependency status: unincorporated territories of the US; administered from Washington, DC by the Fish and Wildlife Service of the US Department of the Interior as part of the National Wildlife Refuge system

note on Palmyra Atoll: incorporated Territory of the US; partly privately owned and partly federally owned;

administered from Washington, DC by the Fish and Wildlife Service of the US Department of the Interior; the Office of Insular Affairs of the US Department of the Interior continues to administer nine excluded areas comprising certain tidal and submerged lands within the 12 nm territorial sea or within the lagoon

Legal system: the laws of the US where applicable apply

Diplomatic representation from the US: none (territories of the US)

Flag description: the flag of the US is used

ECONOMY

Economy—overview: no economic activity

TRANSPORTATION

Airports: Baker Island: one abandoned World War II runway of 1,665 m covered with vegetation and unusable

Howland Island: airstrip constructed in 1937 for scheduled refueling stop on the round-the-world flight of Amelia EARHART and Fred NOONAN; the aviators left Lae, New Guinea, for Howland Island but were never seen again; the airstrip is no longer serviceable

Johnston Atoll: one closed and not maintained

Kingman Reef: lagoon was used as a halfway station between Hawaii and American Samoa by Pan American Airways for flying boats in 1937 and 1938

Midway Islands: 3—one operational (2,377 m paved); no fuel for sale except emergencies

Palmyra Atoll: 1—1,846 m unpaved runway; privately owned (2012)

Ports and terminals: Baker, Howland, and Jarvis Islands, and Kingman Reef: none; offshore anchorage only

Johnston Atoll: Johnston Island

Midway Islands: Sand Island

Palmyra Atoll: West Lagoon

URUGUAY

INTRODUCTION

Background: Montevideo, founded by the Spanish in 1726 as a military stronghold, soon took advantage of its natural harbor to become an important commercial center. Claimed by Argentina but annexed by Brazil in 1821, Uruguay declared its independence four years later and secured its freedom in 1828 after a three-year struggle. The administrations of President Jose BATLLE in the early 20th century established widespread political, social, and economic reforms that established a statist tradition. A violent Marxist urban guerrilla movement named the Tupamaros, launched in the late 1960s, led Uruguay's president to cede control of the government to the military in

1973. By yearend, the rebels had been crushed, but the military continued to expand its hold over the government. Civilian rule was not restored until 1985. In 2004, the left-of-center Frente Amplio Coalition won national elections that effectively ended 170 years of political control previously held by the Colorado and Blanco parties. Uruguay's political and labor conditions are among the freest on the continent.

GEOGRAPHY

Location: Southern South America, bordering the South Atlantic Ocean, between Argentina and Brazil

Geographic coordinates: 33 00 S, 56 00 W

Map references: South America

Area: total: 176,215 sq km

country comparison to the world: 91

land: 175,015 sq km

Coastline: 660 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm
exclusive economic zone: 200 nm
continental shelf: 200 nm or edge of continental margin

Climate: warm temperate; freezing temperatures almost unknown

Terrain: mostly rolling plains and low hills; fertile coastal lowland

Elevation extremes: lowest point: Atlantic Ocean 0 m

highest point: Cerro Catedral 514 m

Natural resources: arable land, hydropower, minor minerals, fish

Land use: arable land: 10.25%
 permanent crops: 0.22%
 other: 89.52% (2011)

Irrigated land: 1,810 sq km (2003)

Total renewable water resources: 139 cu km (2011)

Freshwater withdrawal (domestic/industrial/agricultural): total: 3.66 cu km/yr (11%/2%/87%)
 per capita: 1,101 cu m/yr (2000)

Natural hazards: seasonally high winds (the pampero is a chilly and occasional violent wind that blows north from the Argentine pampas), droughts, floods; because of the absence of mountains, which act as weather barriers, all locations are particularly vulnerable to rapid changes from weather fronts

Environment—current issues: water pollution from meat packing/tannery industry; inadequate solid/hazardous waste disposal

Environment—international agreements: party to: Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Ozone Layer Protection, Ship Pollution, Wetlands
 signed, but not ratified: Marine Dumping, Marine Life Conservation

Geography—note: second-smallest South American country (after Suriname); most of the low-lying landscape (three-quarters of the country) is grassland, ideal for cattle and sheep raising

PEOPLE AND SOCIETY

Nationality: noun: Uruguayan(s)
 adjective: Uruguayan

Ethnic groups: white 88%, mestizo 8%, black 4%, Amerindian (practically nonexistent)

Languages: Spanish (official), Portuguese, Brazilian Portuguese (Portuguese-Spanish mix on the Brazilian frontier)

Religions: Roman Catholic 47.1%, non-Catholic Christians 11.1%, nondenominational 23.2%, Jewish 0.3%, atheist or agnostic 17.2%, other 1.1% (2006)

Demographic profile: Uruguay rates high for most development indicators and is known for its secularism, liberal social laws, and well-developed social security, health, and educational systems. It is one of the few countries in Latin America and the Caribbean where the entire population has access to clean water. Uruguay's provision of free primary through university education has contributed to the country's high levels of literacy and educational attainment. However, the emigration of human capital has diminished the state's return on its investment in education. Remittances from the roughly 18% of Uruguayans abroad amount to less than 1 percent of national GDP. The emigration of young adults and a low birth rate are causing Uruguay's population to age rapidly. In the 1960s, Uruguayans for the first time emigrated en masse—primarily to Argentina and Brazil—because of economic decline and the onset of more than a decade of military dictatorship. Economic crises in the early 1980s and 2002 also triggered waves of emigration, but since 2002 more than 70% of Uruguayan emigrants have selected the US and Spain as destinations because of better job prospects. Uruguay had a tiny population upon its independence in 1828 and welcomed thousands of predominantly Italian and Spanish immigrants, but the country has not experienced large influxes of new arrivals since the aftermath of World War II. More recent immigrants include Peruvians and Arabs.

ECONOMY

Economy—overview: Uruguay has a free market economy characterized by an export-oriented agricultural sector, a well-educated work force, and high levels of social spending. Following financial difficulties in the late 1990s and early 2000s, economic growth for Uruguay averaged 8% annually during the period 2004-08. The 2008-09 global financial crisis put a brake on Uruguay's vigorous growth, which decelerated to 2.6% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment, and GDP growth reached 8.9% in 2010 but fell to about 3.5% in 2012, the result of a renewed slowdown in the global economy and in Uruguay's main trade partners and Common Market of the South (Mercosur) counterparts, Argentina and Brazil. Uruguay has sought to expand trade within Mercosur and with non-Mercosur members. Uruguay's total merchandise trade with Mercosur since 2006 has increased by nearly 70% to more than \$5 billion while its total trade with the world has almost doubled to roughly \$20 billion.

TRANSNATIONAL ISSUES

Disputes—international: in 2010, the ICJ ruled in favor of Uruguay's operation of two paper mills on the Uruguay River, which forms the border with Argentina; the two countries formed a joint pollution monitoring regime; uncontested boundary dispute between Brazil and Uruguay over Braziliera/Brasiliera Island in the Quarai/Cuareim River leaves the tripoint with Argentina in question; smuggling of firearms and narcotics continues to be an issue along the Uruguay-Brazil border

Illicit drugs: small-scale transit country for drugs mainly bound for Europe, often through sea-borne containers; law enforcement corruption; money laundering because of strict banking secrecy laws; weak border control along Brazilian frontier; increasing consumption of cocaine base and synthetic drugs

Coastline: 0 km (doubly landlocked); note—Uzbekistan includes the southern portion of the Aral Sea with a 420 km shoreline

Maritime claims: none (doubly landlocked)

Climate: mostly midlatitude desert, long, hot summers, mild winters; semiarid grassland in east

Terrain: mostly flat-to-rolling sandy desert with dunes; broad, flat intensely irrigated river valleys along course of Amu Darya, Syr Darya (Sirdaryo), and Zarafshon; Fergana Valley in east surrounded by mountainous Tajikistan and Kyrgyzstan; shrinking Aral Sea in west

Elevation extremes: lowest point: Sariatqamish Kuli-12 m

highest point: Adelunga Toghi 4,301 m

Natural resources: natural gas, petroleum, coal, gold, uranium, silver, copper, lead and zinc, tungsten, molybdenum

Land use: arable land: 9.61%

permanent crops: 0.8%

other: 89.58% (2011)

Irrigated land: 41,980 sq km (2005)

Freshwater withdrawal (domestic/industrial/agricultural): total: 56 cu km/yr (7%/3%/90%)
per capita: 2,113 cu m/yr (2005)

Natural hazards: NA

Environment—current issues: shrinkage of the Aral Sea has resulted in growing concentrations of chemical pesticides and natural salts; these substances are then blown from the increasingly exposed lake bed and contribute to desertification and respiratory health problems; water pollution from industrial wastes and the heavy use of fertilizers and pesticides is the cause of many human health disorders; increasing soil salination; soil contamination from buried nuclear processing and agricultural chemicals, including DDT

INTRODUCTION

Background: Russia conquered the territory of present-day Uzbekistan in the late 19th century. Stiff resistance to the Red Army after the Bolshevik Revolution was eventually suppressed and a socialist republic established in 1924. During the Soviet era, intensive production of "white gold" (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land degraded and the Aral Sea and certain rivers half dry. Independent since 1991, the country seeks to gradually lessen its dependence on the cotton monoculture by diversifying agricultural production while developing its mineral and petroleum reserves and increasing its manufacturing base. Current concerns include terrorism by Islamic militants, economic stagnation, and the curtailment of human rights and democratization.

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Ozone Layer Protection, Wetlands signed, but not ratified: none of the selected agreements

Geography—note: along with Liechtenstein, one of the only two doubly landlocked countries in the world

note: adopted 1992; after the fall of the Soviet Union, Uzbekistan kept the music of the anthem from its time as a Soviet Republic but adopted new lyrics

ECONOMY

Economy—overview: Uzbekistan is a dry, landlocked country; 11% of the land is intensely cultivated, in irrigated river valleys. More than 60% of the population lives in densely populated rural communities. Export of hydrocarbons, primarily natural gas, provided 18.5% of foreign exchange earnings in 2011 and 35.1% in the first nine months of 2012. Other major export earners include gold and cotton. Despite ongoing efforts to diversify crops, Uzbekistani agriculture remains largely centered around cotton production, although production has dropped by 35% since 1991. Uzbekistan is now the world's fifth largest cotton exporter and sixth largest producer; Uzbekistan is aggressively addressing international criticism for the use of child labor in its cotton harvest. Following independence in September 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. While aware of the need to improve the investment climate, the government still sponsors measures that often increase, not decrease, its control over business decisions. A sharp increase in the inequality of income distribution has hurt the lower ranks of society since independence. In 2003, the government accepted Article VIII obligations under the IMF, providing for full currency convertibility. However, strict currency controls and tightening of borders have lessened the effects of convertibility and have also led to some shortages that have further stifled economic activity. The Central Bank often delays or restricts convertibility, especially for consumer goods. According to official statistics, Uzbekistan has posted GDP growth of over 8% per year for several years, driven primarily by state-led investments and a favorable export environment. Growth may slip in 2013 as a result of lower export prices due to the continuing European recession. In the past Uzbekistani authorities have accused US and other foreign companies operating in Uzbekistan of violating Uzbekistani tax laws and have frozen their assets, with several new expropriations in 2012. At the same time, the Uzbekistani Government has actively courted several major US and international corporations, offering attractive financing and tax advantages, and has landed a significant US investment in the automotive industry, including the opening of a powertrain manufacturing facility in Tashkent in November, 2011. Uzbekistan has seen few effects from the global economic downturn, primarily due to its relative isolation from the global financial markets.

Telephone system: general assessment: digital exchanges in large cities and in rural areas

domestic: the state-owned telecommunications company, Uzbektelecom, owner of the fixed line telecommunications system, has used loans from the Japanese government and the China Development Bank to upgrade fixed-line services including conversion to digital exchanges; mobile-cellular services are growing rapidly, with the subscriber base reaching 25 million in 2011

international: country code—998; linked by fiber-optic cable or microwave radio relay with CIS member states and to other countries by leased connection via the Moscow international gateway switch; after the completion of the Uzbek link to the Trans-Asia-Europe (TAE) fiber-optic

cable, Uzbekistan plans to establish a fiber-optic connection to Afghanistan (2009)

Broadcast media: government controls media; 11 state-owned broadcasters—7 TV and 4 radio—provide service to virtually the entire country; about 20 privately owned TV stations, overseen by local officials, broadcast to local markets; privately-owned TV stations are required to lease transmitters from the government-owned Republic TV and Radio Industry Corporation; about 15 privately owned radio broadcasters are affiliated with the National Association of Electronic Mass Media of Uzbekistan, a government sponsored NGO for private broadcast media

MILITARY

Military branches: Army, Air and Air Defense Forces (2013)

Military service age and obligation: 18 years of age for compulsory military service; 1-year conscript service obligation; moving toward a professional military, but conscription will continue; the military cannot accommodate everyone who wishes to enlist, and competition for entrance into the military is similar to the competition for admission to universities (2012)

Manpower available for military service:

males age 16-49: 7,887,292

females age 16-49: 7,886,459 (2010 est.)

Manpower fit for military service:

males age 16-49: 6,566,118

females age 16-49: 6,745,818 (2010 est.)

Manpower reaching militarily significant age annually: male: 306,404

female: 295,456 (2010 est.)

Military expenditures: 3.5% of GDP (2010)

country comparison to the world: 34

TRANSNATIONAL ISSUES

Disputes—International: prolonged drought and cotton monoculture in Uzbekistan and Turkmenistan created water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2004; border delimitation of 130 km of border with Kyrgyzstan is hampered by serious disputes around enclaves and other areas

Refugees and internally displaced persons: IDPs: undetermined (government forcibly relocated an estimated 3,400 people from villages near the Tajikistan border in 2000-2001; no new data is available) (2012)

Trafficking in persons: current situation:

Uzbekistan is a source country for women and girls trafficked to Kazakhstan, Russia, the Middle East, and Asia for the purpose of commercial sexual exploitation; men are trafficked to Kazakhstan and Russia for purposes of forced labor in the construction, cotton, and tobacco industries; men and women are also trafficked internally for the purposes of domestic servitude, forced labor in the agricultural and construction industries, and for commercial sexual exploitation

tier rating: Tier 2 Watch List—Uzbekistan is on the Tier 2 Watch List for its negligible progress in ending forced labor, including forced child labor, in the annual cotton harvest, and did not make

efforts to investigate or prosecute government officials suspected to be complicit in forced labor; the government did not conduct any awareness campaigns regarding forced labor in the annual cotton harvest or other internal trafficking, but did continue its previous awareness campaigns about the dangers of transnational trafficking (2008)

Illicit drugs: transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of cannabis and small amounts of opium poppy for domestic consumption; poppy cultivation almost wiped out by government crop eradication program; transit point for heroin precursor chemicals bound for Afghanistan

VANUATU

INTRODUCTION

Background: Multiple waves of colonizers, each speaking a distinct language, migrated to the New Hebrides in the millennia preceding European exploration in the 18th century. This settlement pattern accounts for the complex linguistic diversity found on the archipelago to this day. The British and French, who settled the New Hebrides in the 19th century, agreed in 1906 to an Anglo-French Condominium, which administered the islands until independence in 1980, when the new name of Vanuatu was adopted.

GEOGRAPHY

Location: Oceania, group of islands in the South Pacific Ocean, about three-quarters of the way from Hawaii to Australia

Geographic coordinates: 16 00 S, 167 00 E

Map references: Oceania

Area: total: 12,189 sq km

country comparison to the world: 164

land: 12,189 sq km

water: 0 sq km

note: includes more than 80 islands, about 65 of which are inhabited

Area—comparative: slightly larger than Connecticut

ECONOMY

Economy—overview: This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for about two-thirds of the population. Fishing, offshore financial services, and tourism, with nearly 197,000 visitors in 2008, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. In mid-2002, the government stepped up efforts to boost tourism through improved air connections, resort development, and cruise ship facilities. Agriculture, especially livestock farming, is a second target for growth. Australia and New Zealand are the main suppliers of tourists and foreign aid.

VENEZUELA

INTRODUCTION

Background: Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and New Granada, which became Colombia). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Hugo CHAVEZ, president from 1999 to 2013, sought to implement his "21st Century Socialism," which purported to alleviate social ills while at the same time attacking capitalist globalization and existing democratic institutions. Current concerns include: a weakening of democratic institutions, political polarization, a politicized military, rampant violent crime, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

PEOPLE AND SOCIETY

Nationality: noun: Venezuelan(s)

adjective: Venezuelan

Ethnic groups: Spanish, Italian, Portuguese, Arab, German, African, indigenous people

Languages: Spanish (official), numerous indigenous dialects

Religions: nominally Roman Catholic 96%, Protestant 2%, other 2%

Demographic profile: Although poverty in Venezuela has declined during the CHAVEZ administration, dropping from nearly 50% in 1999 to about 27% in 2011, it remains high and some experts question how much of a role social expenditures have played in this poverty reduction. Progress in lowering poverty, income inequality, and unemployment may in fact be more closely linked to the rise and fall of prices for oil, Venezuela's dominant export. In the long-run, education and healthcare spending may increase economic growth and reduce income inequality, but rising costs and the staffing of new healthcare jobs with foreigners are slowing development. In the meantime, social investment has led to better living standards, including increased school enrollment, a substantial reduction in infant and child mortality, and greater access to potable water and sanitation.

Since CHAVEZ came to power in 1999, more than a million predominantly middle-and upper-class

Venezuelans are estimated to have emigrated. The brain drain is attributed to a repressive political system, lack of economic opportunities, steep inflation, a high crime rate, and corruption. Thousands of oil engineers emigrated to Canada, Colombia, and the United States following CHAVEZ's firing of over 20,000 employees of the state-owned petroleum company during a 2002-2003 oil strike. Additionally, thousands of Venezuelans of European descent have taken up residence in their ancestral homelands. Nevertheless, Venezuela continues to attract immigrants from South America and southern Europe because of its lenient migration policy and the availability of education and healthcare. Venezuela also has been a fairly accommodating host to more than 200,000 Colombian refugees.

Flag description: three equal horizontal bands of yellow (top), blue, and red with the coat of arms

on the hoist side of the yellow band and an arc of eight white five-pointed stars centered in the blue band; the flag retains the three equal horizontal bands and three main colors of the banner of Gran Colombia, the South American republic that broke up in 1830; yellow is interpreted as standing for the riches of the land, blue for the courage of its people, and red for the blood shed in attaining independence; the seven stars on the original flag represented the seven provinces in Venezuela that united in the war of independence; in 2006, President Hugo CHAVEZ ordered an eighth star added to the star arc—a decision that sparked much controversy—to conform with the flag proclaimed by Simon Bolivar in 1827 and to represent the province of Guayana

National symbol(s): toupial (bird)

National anthem: *name:* "Gloria al bravo pueblo" (Glory to the Brave People)

lyrics/music: Vicente SALIAS/Juan Jose LANDAETA

note: adopted 1881; the lyrics were written in 1810, the music some years later; both SALIAS and LANDAETA were executed in 1814 during Venezuela's struggle for independence

ECONOMY

Economy—overview: Venezuela remains highly dependent on oil revenues, which account for roughly 95% of export earnings, about 45% of federal budget revenues, and around 12% of GDP. Fueled by high oil prices, record government spending helped to boost GDP growth by 4.2% in 2011, after a sharp drop in oil prices caused an economic contraction in 2009-10. Government spending, minimum wage hikes, and improved access to domestic credit created an increase in consumption which combined with supply problems to cause higher inflation—roughly 26% in 2011 and 21% in 2012. President Hugo CHAVEZ's efforts to increase the government's control of the economy by nationalizing firms in the agribusiness, financial, construction, oil, and steel sectors have hurt the private investment environment, reduced productive capacity, and slowed non-petroleum exports. In the first half of 2010 Venezuela faced the prospect of lengthy nationwide blackouts when its main hydroelectric power plant—which provides more than 35% of the country's electricity—nearly shut down. In May 2010, CHAVEZ closed the unofficial foreign exchange market—the "parallel market"—in an effort to stem inflation and slow the currency's depreciation. In June 2010, the government created the "Transaction System for Foreign Currency Denominated Securities" to replace the "parallel" market. In December 2010, CHAVEZ eliminated the dual exchange rate system and unified the exchange rate at 4.3 bolivars per dollar. In January 2011, CHAVEZ announced the second devaluation of the bolivar within twelve months. In December 2010, the National Assembly passed a package of five organic laws designed to complete the transformation of the Venezuelan economy in line with CHAVEZ's vision of 21st century socialism. In 2012, Venezuela continued to wrestle with a housing crisis, high inflation, an electricity crisis, and rolling food and goods shortages—all of which were fallout from the government's unorthodox economic policies. The budget deficit for the entire government reached 17% of GDP in 2012, and public debt as a percent

of GDP climbed steeply to 49%, despite record oil prices.

TRANSNATIONAL ISSUES

Disputes—international: claims all of the area west of the Essequibo River in Guyana, preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before the United Nations Convention on the Law of the Sea that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; dispute with Colombia over maritime boundary and Venezuelan administered Los Monjes islands near the Gulf of Venezuela; Colombian organized illegal narcotics and paramilitary activities penetrate Venezuela's shared border region; in 2006, an estimated 139,000 Colombians sought protection in 150 communities along the border in Venezuela; US, France, and the Netherlands recognize Venezuela's granting full effect to

Aves Island, thereby claiming a Venezuelan Economic Exclusion Zone/continental shelf extending over a large portion of the eastern Caribbean Sea; Dominica, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines protest Venezuela's full effect claim

Refugees and internally displaced persons: *refugees (country of origin):* 201,941 (Colombia) (2011)

Trafficking in persons: *current situation:* Venezuela is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; Venezuelan women and girls are trafficked within the country for sexual exploitation, lured from the nation's interior to urban and tourist areas; to a lesser extent, Brazilian women and Colombian women are subjected to forced prostitution; some Venezuelan women are transported to Caribbean islands, particularly Aruba, Curacao,

and Trinidad & Tobago, where they are subjected to forced prostitution
tier rating: Tier 3—the government investigated potential cases of suspected human trafficking and arrested at least 12 people for trafficking crimes during the reporting period; however, there was no further publicly available information regarding those cases; Venezuela is not making significant efforts to comply with the minimum standards for the elimination of trafficking (2008)

Illicit drugs: small-scale illicit producer of opium and coca for the processing of opiates and coca derivatives; however, large quantities of cocaine, heroin, and marijuana transit the country from Colombia bound for US and Europe; significant narcotics-related money-laundering activity, especially along the border with Colombia and on Margarita Island; active eradication program primarily targeting opium; increasing signs of drug-related activities by Colombian insurgents on border

VIETNAM

Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South reuniting the country under communist rule. Despite the return of peace, for over a decade the country experienced little economic growth because of conservative leadership policies, the persecution and mass exodus of individuals—many of them successful South Vietnamese merchants—and growing international isolation. However, since the enactment of Vietnam's "doi moi" (renovation) policy in 1986, Vietnamese authorities have committed to increased economic, liberalization and enacted structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The communist leaders, however, maintain control on political expression and have resisted outside calls to improve human rights. The country continues to experience small-scale protests from various groups—the vast majority connected to land-use issues, calls for increased political space, and the lack of equitable mechanisms for resolving disputes. Various ethnic minorities, such as the Montagnards of the Central Highlands and the Khmer Krom in the southern delta region, have also held protests.

INTRODUCTION

Background: The conquest of Vietnam by France began in 1858 and was completed by 1884. It became part of French Indochina in 1887. Vietnam declared independence after World War II, but France continued to rule until its 1954 defeat by communist forces under Ho Chi MINH. Under the Geneva Accords of 1954, Vietnam was divided into the communist North and anti-communist South. US economic and military aid to South

ECONOMY

Economy—overview: Vietnam is a densely-populated developing country that has been transitioning from the rigidities of a centrally-planned economy since 1986. Vietnamese authorities have reaffirmed their commitment to economic modernization in recent years. Vietnam joined the World Trade Organization in January 2007, which has promoted more competitive, export-driven industries. Vietnam became an official negotiating partner in the Trans-Pacific Partnership trade agreement in 2010. Agriculture's share of economic output has continued to shrink from about 25% in 2000 to less than 22% in 2012, while industry's share increased from 36% to nearly 41% in the same period. State-owned enterprises account for roughly 40% of GDP. Poverty has declined significantly, and Vietnam is working to create jobs to meet the challenge of a labor force that is growing by more than one million people every year. The global recession hurt Vietnam's export-oriented economy, with GDP in 2012 growing at 5%, the slowest rate of growth since 1999. In 2012, however, exports increased by more than 18%, year-on-year; several administrative actions brought the trade deficit back into balance. Between 2008 and 2011, Vietnam's managed currency, the dong, was devalued in excess of 20%, but its value remained stable in 2012. Foreign direct investment inflows fell 4.5% to \$10.5 billion in 2012. Foreign donors have pledged \$6.5 billion in new development assistance for 2013. Hanoi has oscillated between promoting growth and emphasizing macroeconomic stability in recent years. In February 2011, the Government shifted policy away from policies aimed at achieving a high rate of economic growth, which had stoked inflation, to those aimed at stabilizing the economy, through tighter monetary and fiscal control. Although Vietnam unveiled a broad, "three pillar" economic reform program in early 2012, proposing the restructuring of public investment, state-owned enterprises, and the banking sector, little perceptible progress had been made by early 2013. Vietnam's economy continues to face challenges from an undercapitalized banking sector. Non-performing loans weigh heavily on banks and businesses. In September 2012, the official bad debt ratio climbed to 8.8%, though some independent analysts believe it could be higher than 15%.

TRANSNATIONAL ISSUES

Disputes—international: southeast Asian states have enhanced border surveillance to check the spread of avian flu; Cambodia and Laos protest Vietnamese squatters and armed encroachments along border; Cambodia accuses Vietnam of a wide variety of illicit cross-border activities; progress on a joint development area with Cambodia is hampered by an unresolved dispute over sovereignty of offshore islands; an estimated 300,000 Vietnamese refugees reside in China; establishment of a maritime boundary with Cambodia is

hampered by unresolved dispute over the sovereignty of offshore islands; the decade-long demarcation of the China-Vietnam land boundary was completed in 2009; China occupies the Paracel Islands also claimed by Vietnam and Taiwan; Brunei claims a maritime boundary extending beyond as far as a median with Vietnam, thus asserting an implicit claim to Lousia Reef; the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions but falls short of a legally binding "code of conduct" desired by several of the disputants; Vietnam continues to expand construction of facilities in the Spratly Islands; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Economic Exclusion Zone negotiations with Indonesia are ongoing, and the two countries in Fall 2011 agreed to work together to reduce illegal fishing along their maritime boundary

Illicit drugs: minor producer of opium poppy; probable minor transit point for Southeast Asian heroin; government continues to face domestic opium/heroin/methamphetamine addiction problems despite longstanding crackdowns

VIRGIN ISLANDS

INTRODUCTION

Background: During the 17th century, the archipelago was divided into two territorial units, one English and the other Danish. Sugarcane, produced by African slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish portion, which had been in economic decline since the abolition of slavery in 1848.

ECONOMY

ISLANDS Economy—overview: Tourism, trade, and other services are the primary economic activities, accounting for roughly 57% of GDP and about half of total civilian employment in 2010. Goods-producing industries accounted for 23% of GDP in 2010 and government represented 20%. The islands hosted nearly 2.74 million visitors—2.2 million cruise ship and 536,000 air passengers—in 2011. The manufacturing sector consists of rum distilling, electronics, pharmaceuticals, and watch assembly. The agriculture sector is small, with most food being imported. The islands are vulnerable to damage from storms. The government is working to improve fiscal discipline, to support construction projects in the private sector,

to expand tourist facilities, to reduce crime, and to protect the environment.

WAKE ISLAND

INTRODUCTION

Background: The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940-41. In December 1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake was developed as a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military, as well as for emergency landings. Operations on the island were suspended and all personnel evacuated in 2006 with the approach of super typhoon IOKE (category 5), but resultant damage was comparatively minor. A US Air Force repair team restored full capability to the airfield and facilities, and the island remains a vital strategic link in the Pacific region.

WALLIS AND FUTUNA

INTRODUCTION

Background: The Futuna island group was discovered by the Dutch in 1616 and Wallis by the British in 1767, but it was the French who declared a protectorate over the islands in 1842, and took official control of them between 1886 and 1888. Notably, Wallis and Futuna was the only French colony to side with the Vichy regime during World War II, a phase that ended in May of 1942 with the arrival of 2,000 American troops. In 1959, the inhabitants of the islands voted to become a French overseas territory and officially assumed this status in July 1961.

GEOGRAPHY

Location: Oceania, islands in the South Pacific Ocean, about two-thirds of the way from Hawaii to New Zealand

Geographic coordinates: 13 18 S, 176 12 W

Area—comparative: 1.5 times the size of Washington, DC

Land boundaries: 0 km

Coastline: 129 km

Maritime claims: territorial sea: 12 nm
exclusive economic zone: 200 nm

Climate: tropical; hot, rainy season (November to April); cool, dry season (May to October); rains 2,5003,000 mm per year (80% humidity); average temperature 26.6 degrees C

Terrain: volcanic origin; low hills

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: Mont Singavi (on Futuna) 765 m

Natural resources: NEGL

Land use: arable land: 7.14%

permanent crops: 35.71%

other: 57.15% (2011)

WEST BANK

INTRODUCTION

Background: From the early 16th century through 1917, the area now known as the West Bank fell under Ottoman rule. Following World War I, the Allied powers (France, UK, Russia) allocated the area to the British Mandate of Palestine. After World War II, the UN passed a resolution to establish two states within the Mandate, and designated a territory including what is now known as the West Bank as part of the proposed Arab state. Following the 1948 Arab-Israeli War the area was captured by Transjordan (later renamed Jordan). Jordan annexed the West Bank in 1950. In June 1967, Israel captured the West Bank and East Jerusalem during the 1967 Six-Day War. With the exception of East Jerusalem and the former Israeli-Jordanian border zone, the West Bank has remained under Israeli military control. Under a series of agreements signed between 1994 and 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the West Bank as well as the Gaza Strip. Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled after the outbreak of an intifada in mid-2000. In early 2003, the "Quartet" of the US, EU, UN, and Russia, presented a roadmap to a final peace settlement by 2005, calling for two states—Israel and a democratic Palestine. Following Palestinian leader Yasir ARAFAT's death in late 2004 and the subsequent election of Mahmud

ABBAS (head of the Fatah political party) as the PA president, Israel and the PA agreed to move the peace process forward. Israel in late 2005 unilaterally withdrew all of its settlers and soldiers and dismantled its military facilities in the Gaza Strip and redeployed its military from several West Bank settlements, but continues to control maritime, airspace, and other access. In early 2006, the Islamic Resistance Movement, HAMAS, won the Palestinian Legislative Council election and took control of the PA government. Attempts to form a unity government failed, and violent clashes between Fatah and HAMAS supporters ensued, culminating in HAMAS's violent seizure of all military and governmental institutions in the Gaza Strip. Fatah and HAMAS in early 2011 agreed to reunify the Gaza Strip and West Bank, but the factions have struggled to implement details on governance and security. The status quo remains with HAMAS in control of the Gaza Strip and the PA governing the West Bank. Since the collapse of direct talks between the Israelis and Palestinians in late 2010, President ABBAS has reaffirmed that he will not resume negotiations until Israel halts all settlement activity in the West Bank and East Jerusalem.

ECONOMY

Economy—overview: The West Bank—the larger of the two areas comprising the Palestinian territories—has sustained a moderate rate of economic growth since 2008. Inflows of donor aid

and government spending have driven most of the gains, however. Private sector development has been weak. After a multiyear downturn following the start of the second intifada in 2000, overall standard-of-living measures have recovered and now exceed levels seen in the late 1990s. Despite the Palestinian Authority's (PA) successful implementation of economic and security reforms and the easing of some movement and access restrictions by the Israeli Government, Israeli closure policies continue to disrupt labor and trade flows, industrial capacity, and basic commerce, eroding the productive capacity of the West Bank economy. The biggest impediments to economic improvements in the West Bank remain Palestinians' inability to access land and resources in Israeli-controlled areas, import and export restrictions, and a high-cost capital structure. The PA for the foreseeable future will continue to rely heavily on donor aid for its budgetary needs, and West Bank economic activity will depend largely on the PA's ability to attract such aid.

TRANSNATIONAL ISSUES

Disputes—International: The current status of the West Bank is subject to the Israeli-Palestinian Interim Agreement—permanent status to be determined through further negotiation; Israel continues construction of a "seamline" separation barrier along parts of the Green Line and within the West Bank; Israel withdrew from four settlements in the northern West Bank in August 2005; since 1948, about 350 peacekeepers from the UN Truce Supervision Organization (UNTSO), headquartered in Jerusalem, monitor ceasefires, supervise armistice agreements, prevent isolated incidents from escalating, and assist other UN personnel in the region

WESTERN SAHARA

INTRODUCTION

Background: Western Sahara is a disputed territory on the northwest coast of Africa bordered by Morocco, Mauritania, and Algeria. After Spain withdrew from its former colony of Spanish Sahara in 1976, Morocco annexed the northern two-thirds of Western Sahara and claimed the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Morocco's sovereignty ended in a 1991 cease-fire and the establishment of a UN peace-keeping operation. As part of this effort, the UN sought to offer a choice to the peoples of the Western Sahara between independence (favored by the Polisario Front) or integration into Morocco. A proposed referendum never took place due to lack of agreement on voter eligibility. The 2,700 km-(1,700 mi-) long defensive sand berm, built by the Moroccans from 1980 to 1987 and running the length of the territory, continues to separate the opposing forces with Morocco controlling the roughly 80 percent of the territory west of the berm. Ethnic tensions in Western Sahara occasionally erupt into violence requiring a Moroccan security force response.

ECONOMY

Economy—overview: Western Sahara has a small market-based economy whose main industries are fishing, phosphate mining, and pastoral nomadism. The territory's arid desert climate makes sedentary agriculture difficult, and Western Sahara imports much of its food. The Moroccan Government administers Western Sahara's economy and is a key source of employment, infrastructure development, and social spending in the territory. Western Sahara's unresolved legal status makes the exploitation of its natural resources a contentious issue between Morocco and the Polisario. Morocco and the EU in July 2006 signed a four-year agreement allowing European vessels to fish off the coast of Morocco, including the disputed waters off the

coast of Western Sahara, but this agreement was terminated in 2011. Oil has never been found in Western Sahara in commercially significant quantities, but Morocco and the Polisario have quarreled over who has the right to authorize and benefit from oil exploration in the territory. Western Sahara's main long-term economic challenge is the development of a more diverse set of industries capable of providing greater employment and income to the territory.

TRANSNATIONAL ISSUES

Disputes—international: many neighboring states reject Moroccan administration of Western Sahara; several states have extended diplomatic relations to the "Sahrawi Arab Democratic Republic" represented by the Polisario Front in exile in Algeria, while others recognize Moroccan sovereignty over Western Sahara; most of the approximately 102,000 Sahrawi refugees are sheltered in camps in Tindouf, Algeria

WORLD

INTRODUCTION

Background: Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the

Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about environmental degradation including deforestation, energy and water shortages, declining biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The

planet's population continues to explode: from 1 billion in 1820 to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1987, 6 billion in 1999, and 7 billion in 2012. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances in medicine) and fears (e.g., development of even more lethal weapons of war).

GEOGRAPHY

Geographic overview: The surface of the earth is approximately 70.9% water and 29.1% land. The former portion is divided into large water bodies termed oceans. The World Factbook recognizes and describes five oceans, which are in decreasing order of size: the Pacific Ocean, Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean. The land portion is generally divided into several, large, discrete landmasses termed continents. Depending on the convention used, the number of continents can vary from five to seven. The most common classification recognizes seven, which are (from largest to smallest): Asia, Africa, North America, South America, Antarctica, Europe, and Australia. Asia and Europe are sometimes lumped together into a Eurasian continent resulting in six continents. Alternatively, North and South America are sometimes grouped as simply the Americas, resulting in a continent total of six (or five, if the Eurasia designation is used).

North America is commonly understood to include the island of Greenland, the isles of the Caribbean, and to extend south all the way to the Isthmus of Panama. The easternmost extent of Europe is generally defined as being the Ural Mountains and the Ural River; on the southeast the Caspian Sea; and on the south the Caucasus Mountains, the Black Sea, and the Mediterranean. Portions of Azerbaijan, Georgia, Kazakhstan, Russia, and Turkey fall within both Europe and Asia, but in every instance the larger section is in Asia. These countries are considered part of both continents. Armenia and Cyprus, which lie completely in Western Asia, are geopolitically European countries.

Asia usually incorporates all the islands of the Philippines, Malaysia, and Indonesia. The islands of the Pacific are often lumped with Australia into a "land mass" termed Oceania or Australasia. Africa's northeast extremity is frequently delimited at the Isthmus of Suez, but for geopolitical purposes, the Egyptian Sinai Peninsula is often included as part of Africa.

Although the above groupings are the most common, different continental dispositions are recognized or taught in certain parts of the world, with some arrangements more heavily based on cultural spheres rather than physical geographic considerations.

Maritime claims: a variety of situations exist, but in general, most countries make the following claims measured from the mean low-tide baseline as described in the 1982 UN Convention on the Law of the Sea: territorial sea—12 nm, contiguous zone—24 nm, and exclusive economic zone—200 nm; additional zones provide for exploitation of continental shelf resources and an exclusive fishing zone; boundary situations with neighboring states prevent many countries from extending their fishing or economic zones to a full 200 nm

Climate: a wide equatorial band of hot and humid tropical climates—bordered north and south by subtropical temperate zones—that separate two large areas of cold and dry polar climates

Terrain: the greatest ocean depth is the Mariana Trench at 10,924 m in the Pacific Ocean

Elevation extremes: *lowest point:* Bentley Subglacial Trench (Antarctica) -2,555 m

note: in the oceanic realm, Challenger Deep in the Mariana Trench is the lowest point, lying -10,924 m below the surface of the Pacific Ocean

top ten highest mountains (measured from sea level): Mount Everest (China-Nepal) 8,850 m; K2 (Pakistan) 8,611 m; Kanchenjunga (India-Nepal) 8,598 m; Lhotse (Nepal) 8,516 m; Makalu (China-Nepal) 8,463 m; Cho Oyu (China-Nepal) 8,201 m; Dhaulagiri (Nepal) 8,167 m; Manaslu (Nepal) 8,163 m; Nanga Parbat (Pakistan) 8,125 m; Annapurna (Nepal) 8,091 m

Natural resources: the rapid depletion of nonrenewable mineral resources, the depletion of forest areas and wetlands, the extinction of animal and plant species, and the deterioration in air and water quality (especially in some countries of Eastern Europe, the former USSR, and China) pose serious long-term problems that governments and peoples are only beginning to address

Natural hazards: large areas subject to severe weather (tropical cyclones); natural disasters (earthquakes, landslides, tsunamis, volcanic eruptions)

volcanism: volcanism is a fundamental driver and consequence of plate tectonics, the physical process reshaping the Earth's lithosphere; the world is home to more than 1,500 potentially active volcanoes, with over 500 of these having erupted in historical times; an estimated 500 million people live

near these volcanoes; associated dangers include lava flows, lahars (mudflows), pyroclastic flows, ash clouds, ash fall, ballistic projectiles, gas emissions, landslides, earthquakes, and tsunamis; in the 1990s, the International Association of Volcanology and Chemistry of the Earth's Interior, created a list of 16 volcanoes worthy of special study because of their great potential for destruction: Avachinsky-Koryaksky (Russia), Colima (Mexico), Etna (Italy), Galeras (Colombia), Mauna Loa (United States), Merapi (Indonesia), Nyiragongo (Democratic Republic of the Congo), Rainier (United States), Sakurajima (Japan), Santa Maria (Guatemala), Santorini (Greece), Taal (Philippines), Teide (Spain), Ulawun (Papua New Guinea), Unzen (Japan), Vesuvius (Italy)

Environment—current issues: large areas subject to overpopulation, industrial disasters, pollution (air, water, acid rain, toxic substances), loss of vegetation (overgrazing, deforestation, desertification), loss of wildlife, soil degradation, soil depletion, erosion; global warming becoming a greater concern

Geography—note: the world is now thought to be about 4.55 billion years old, just about one-third of the 13.8-billion-year age estimated for the universe

Legal system: the legal systems of nearly all countries are generally modeled upon elements of five main types: civil law (including French law, the Napoleonic Code, Roman law, Roman-Dutch law, and Spanish law); common law (including United States law); customary law; mixed or pluralistic law; and religious law (including Islamic law); an additional type of legal system—international law—governs the conduct of independent nations in their relationships with one another

International law organization participation:

all members of the UN are parties to the statute that established the International Court of Justice (ICJ) or World Court; 54 countries have accepted jurisdiction of the ICJ as compulsory with reservations and 14 countries have accepted ICJ jurisdiction as compulsory without reservations; states parties to the Rome Statute of the International Criminal Court (ICCt) are those countries that have ratified or acceded to the Rome Statute, the treaty that established the Court; a total of 121 (effective 1 July 2012) countries have accepted jurisdiction of the ICCt (see Appendix B for a clarification on the differing mandates of the ICJ and ICCt)

ECONOMY**Economy—overview:**

The international financial crisis of 2008-09 led to the first downturn in global output since 1946 and presented the world with a major new challenge: determining what mix of fiscal and monetary policies to follow to restore growth and jobs, while keeping inflation and debt under control. Financial stabilization and stimulus programs that started in 2009-11, combined with lower tax revenues in 2009-10, required most countries to run large budget deficits. Treasuries issued new public debt—totaling \$7.6 trillion since 2008—to pay for the additional expenditures. To keep interest rates low, most central banks monetized that debt, injecting large sums of money into their economies—between December 2008 and December 2012 the global money supply increased by more than 35%. Governments now are faced with the difficult task of

spurring current growth and employment without saddling their economies with so much debt that they sacrifice long-term growth and financial stability. And when economic activity picks up, central banks will confront the difficult task of containing inflation without raising interest rates so high they snuff out further growth.

Fiscal and monetary data for 2012 are currently available for 180 countries, which together account for 98.5% of World GDP. Of the 180 countries, 85 pursued unequivocally expansionary policies, boosting government spending while also expanding their money supply relatively rapidly—faster than the world average of 6%; 47 followed restrictive fiscal and monetary policies, reducing government spending and holding money growth to less than the 6% average; and the remaining 48 followed a mix of counterbalancing fiscal and monetary policies, either reducing government spending while accelerating money growth, or boosting spending while curtailing money growth. (For more information, see attached Fiscal and Monetary Data, 2008-2012 spreadsheet.)

In 2012, fiscal policy shifted towards greater austerity for a majority of the countries. In an attempt to attack their deficit and debt problems head-on, nearly 5 out of 6 countries slowed the rate of growth of government spending, and 1 in 3 countries actually lowered the level of their expenditures. The global growth rate for government expenditures dropped from 5.9% in 2010 and 10.1% in 2011, to just 1.6% in 2012. Roughly 1 out of 3 central banks tightened monetary policy, decelerating the rate of growth of their money supply, and about 1 out of 7 actually withdrew money from circulation. Growth of the global money supply, as measured by the narrowly defined M1, slowed from 10.5% in 2009 and 10.4% in 2010 to 4.6% in 2011 and 6.0% in 2012.

These policy choices significantly affected economic performance. The global budget deficit narrowed to roughly \$2.7 trillion in 2012, or 3.8% of World GDP. But growth of the world economy slipped from 5.1% in 2010 and 3.7% in 2011, to just 3.1% in 2012. And world unemployment increased to 9.2%.

Countries with expansionary fiscal and monetary policies achieved significantly higher rates of growth, lower unemployment, higher growth of tax revenues, and greater success reducing the public debt burden than those countries that chose contractionary policies. In 2012, the 85 countries that followed a pro-growth approach achieved a median GDP growth rate of 4.9%, compared to just 0.8% for the 47 countries with restrictive fiscal and monetary policies, a difference of more than 4 percentage points. Among the 85, China grew 7.8%, Indonesia 6.0%, Mexico 4.0%, Russia 3.4%, Turkey 3.0%, the United States 2.2%, and Canada 1.9%, while among the 47, Brazil grew 1.3%, Germany 0.7%, France 0.1%, Belgium -0.2%, Netherlands -0.5%, Spain -1.4%, and Italy -2.3%. The median unemployment rate for the 47 countries jumped to 11.5%, while the median for the pro-growth countries held steady at 7.3%.

Faster GDP growth and lower unemployment rates translated into increased tax revenues and a lower debt burden. Revenues for the 85 expansionary countries grew at a median rate of 10.8%, whereas tax revenues fell at a median rate of 6.2% for the 47 countries that chose austere economic policies. Budget balances improved for about half

of the 47, but, for most, debt grew faster than GDP, and the median level of their public debt as a share of GDP increased 2.5 percentage points, to 57.8%. On the other hand, budget balances deteriorated for most of the 85 pro-growth countries, but GDP growth outpaced increases in debt, and the median level of public debt as a share of GDP actually declined slightly (-0.1 percentage points). The world recession has suppressed inflation rates—world inflation declined 1.0 percentage point in 2012 to about 4.0%. At the same time, the median inflation rate for the 85 pro-growth countries, at 5.5%, was 2.5 percentage points higher than that for the countries that followed more austere fiscal and monetary policies. Overall, the latter countries also improved their current account balances by shedding imports; as a result, current account balances deteriorated for most of the countries that pursued pro-growth policies. Slower growth of world income reduced import demand and crude oil prices fell. Consequently, the dollar value of world trade grew just 1% in 2012, compared with 18% in 2011.

Beyond the current global slowdown, the world faces several long-standing economic challenges. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of pollution, waste-disposal, epidemics, water-shortages, famine, over-fishing of oceans, deforestation, desertification, and depletion of non-renewable resources. The nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of people, goods, services, funds, and technology. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, has created economic risks because the participating nations have varying income levels and growth rates, and hence, require a different mix of monetary and fiscal policies. Governments, especially in Western Europe, face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. Because of their own internal problems and priorities, the industrialized countries are unable to devote sufficient resources to deal effectively with the poorer areas of the world, which, at least from an economic point of view, are becoming further marginalized. The terrorist attacks on the US on 11 September 2001 accentuated a growing risk to global prosperity—the diversion of resources away from capital investments to counter-terrorist programs.

Despite these vexing problems, the world economy also shows great promise. Technology has made possible further advances in a wide range of fields, from agriculture, to medicine, alternative energy, metallurgy, and transportation. Improved global communications have greatly reduced the costs of international trade, helping the world gain from the international division of labor, raise living standards, and reduce income disparities among nations. Much of the resilience of the world economy in the aftermath of the financial crisis resulted from government and central bank leaders around the globe working in concert to stem the financial onslaught, knowing well the lessons of past economic failures.

TRANSNATIONAL ISSUES

Disputes—international: stretching over 250,000 km, the world's 322 international land boundaries separate 195 independent states and

71 dependencies, areas of special sovereignty, and other miscellaneous entities; ethnicity, culture, race, religion, and language have divided states into separate political entities as much as history, physical terrain, political fiat, or conquest, resulting in sometimes arbitrary and imposed boundaries; most maritime states have claimed limits that include territorial seas and exclusive economic zones; overlapping limits due to adjacent or opposite coasts create the potential for 430 bilateral maritime boundaries of which 209 have agreements that include contiguous and non-contiguous segments; boundary, borderland/resource, and territorial disputes vary in intensity from managed or dormant to violent or militarized; undemarcated, indefinite, porous, and unmanaged boundaries tend to encourage illegal cross-border activities, uncontrolled migration, and confrontation; territorial disputes may evolve from historical and/or cultural claims, or they may be brought on by resource competition; ethnic and cultural clashes continue to be responsible for much of the territorial fragmentation and internal displacement of the estimated 6.6 million people and cross-border displacements of 8.6 million refugees around the world as of early 2006; just over one million refugees were repatriated in the same period; other sources of contention include access to water and mineral (especially hydrocarbon) resources, fisheries, and arable land; armed conflict prevails not so much between the uniformed armed forces of independent states as between stateless armed entities that detract from the sustenance and welfare of local populations, leaving the community of nations to cope with resultant refugees, hunger, disease, impoverishment, and environmental degradation

Refugees and internally displaced persons: the United Nations High Commissioner for Refugees (UNHCR) estimated in June 2011 that there were 43.7 million people forcibly displaced worldwide; this includes 15.1 million refugees and as many as 27.5 million IDPs in more than 40 countries (2011)

Trafficking in persons: current situation: approximately 800,000 people, mostly women and children, are trafficked annually across national borders, not including millions trafficked within their own countries; at least 80% of the victims are female and up to 50% are minors; 75% of all

victims are trafficked into commercial sexual exploitation; almost two-thirds of the global victims are trafficked intra-regionally within East Asia and the Pacific (260,000 to 280,000 people) and Europe and Eurasia (170,000 to 210,000 people)

Tier 2 Watch List: (42 countries) Afghanistan, Angola, Azerbaijan, the Bahamas, Bahrain, Barbados, Belarus, Burma, Burundi, Chad, China, Comoros, Republic of the Congo, Cyprus, Djibouti, Ecuador, Federated States of Micronesia, The Gambia, Guinea-Bissau, Haiti, Iraq, Jamaica, Kenya, Lebanon, Liberia, Macau, Malawi, Malaysia, Maldives, Mauritania, Namibia, Niger, Russia, Senegal, Seychelles, Sierra Leone, South Sudan, Suriname, Thailand, Turkmenistan, Uzbekistan, Venezuela

Tier 3: (17 countries) Algeria, Central African Republic, Democratic Republic of Congo, Cuba, Equatorial Guinea, Eritrea, Iran, North Korea, Kuwait, Libya, Madagascar, Papua New Guinea, Saudi Arabia, Sudan, Syria, Yemen, Zimbabwe (2012)

Illicit drugs: cocaine: worldwide coca leaf cultivation in 2007 amounted to 232,500 hectares; Colombia produced slightly more than two-thirds of the worldwide crop, followed by Peru and Bolivia; potential pure cocaine production decreased 7% to 865 metric tons in 2007; Colombia conducts an aggressive coca eradication campaign, but both Peruvian and Bolivian Governments are hesitant to eradicate coca in key growing areas; 551 metric tons of export-quality cocaine (85% pure) is documented to have been seized or destroyed in 2005; US consumption of export quality cocaine is estimated to have been in excess of 380 metric tons

opiates: worldwide illicit opium poppy cultivation continued to increase in 2007, with a potential opium production of 8,400 metric tons, reaching the highest levels recorded since estimates began in mid-1980s; Afghanistan is world's primary opium producer, accounting for 95% of the global supply; Southeast Asia—responsible for 9% of global opium—saw marginal increases in production; Latin America produced 1% of global opium, but most was refined into heroin destined for the US market; if all potential opium was processed into pure heroin, the potential global production would be 1,000 metric tons of heroin in 2007

YEMEN

INTRODUCTION

Background: North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement and brief civil war in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border. Fighting in the northwest between the government and Huthi rebels, a group seeking a return to traditional Zaydi Islam, began in 2004 and has since resulted in six rounds of fighting—the last ended in early 2010 with a cease-fire that continues to hold. The southern secessionist movement was revitalized in 2008 when a popular socioeconomic protest movement initiated the prior year took on political goals including secession. Public rallies in Sana'a against then President SALIH—inspired by similar demonstrations in Tunisia and Egypt—slowly built momentum starting in late January 2011 fueled by complaints over high unemployment, poor economic conditions, and corruption. By the following month, some protests had resulted in violence, and the demonstrations had spread to other major cities. By March the opposition had hardened its demands and was unifying behind calls for SALIH's immediate ouster. The Gulf Cooperation Council (GCC) in late April 2011, in an attempt to mediate the crisis in Yemen, proposed an agreement in which the president would step down in exchange for immunity from prosecution. SALIH's refusal to sign an agreement led to heavy street fighting and his injury in an explosion in June 2011. The UN Security Council passed Resolution 2014 in October 2011 calling on both sides to end the violence and complete a power transfer deal. In late November 2011, SALIH signed the GCC-brokered agreement to step down and to transfer some of his powers to Vice President Abd Rabbuh Mansur HADI. Following elections in February 2012, won by HADI, SALIH formally transferred his powers. In accordance with the GCC initiative, Yemen launched a

National Dialogue to discuss key constitutional, political, and social issues in mid-March 2013.

ECONOMY

Economy—overview: Yemen is a low income country that is highly dependent on declining oil resources for revenue. Petroleum accounts for roughly 25% of GDP and 70% of government revenue. Yemen has tried to counter the effects of its declining oil resources by diversifying its economy through an economic reform program initiated in 2006 that is designed to bolster non-oil sectors of the economy and foreign investment. In October 2009, Yemen exported its first liquefied natural gas as part of this diversification effort. In January 2010, the international community established the Friends of Yemen group that aims to support Yemen's efforts toward economic and political reform. In 2012, the Friends of Yemen pledged over \$7 billion in assistance to Yemen. The Yemeni government also endorsed a Mutual Accountability Framework to facilitate the efficient implementation of donor aid. The unrest that began in early 2011 caused GDP to plunge more than 15% in 2011, and about 2% in 2012. Availability of basic services, including electricity, water, and fuel, has improved since the transition, but progress toward achieving more sustainable economic stability has been slow and uneven. Yemen continues to face difficult long term challenges, including declining water resources, high unemployment, and a high population growth rate.

ZAMBIA

INTRODUCTION

Background: The territory of Northern Rhodesia was administered by the [British] South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices, economic mismanagement and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule, but the subsequent vote in 1996 saw blatant harassment of opposition parties. The election in 2001 was marked by administrative problems with three parties filing a legal petition challenging the election of ruling party candidate Levy MWANAWASA. MWANAWASA was reelected in 2006 in an election that was deemed free and fair. Upon his abrupt death in August 2008, he was succeeded by his vice president, Rupiah BANDA, who subsequently won a special presidential by election in October 2008. Michael SATA was elected president in September 2011.

ECONOMY

Economy—overview: Zambia's economy has experienced strong growth in recent years, with real GDP growth in 2005-12 more than 6% per year. Privatization of government-owned copper mines in the 1990s relieved the government from covering mammoth losses generated by the industry and greatly increased copper mining output and profitability to spur economic growth. Copper output has increased steadily since 2004, due to higher copper prices and foreign investment. In 2005, Zambia qualified for debt relief under the Highly Indebted Poor Country Initiative, consisting of approximately US\$6 billion in debt relief. Poverty remains a significant problem in Zambia, despite a stronger economy. Zambia's dependency on copper makes it vulnerable to depressed commodity prices, but record high copper prices and a bumper maize crop in 2010 helped Zambia rebound quickly from the world economic slowdown that began in 2008. Zambia has made some strides to improve the ease of doing business. A high birth rate, relatively high HIV/AIDS burden, and market distorting agricultural policies have meant that Zambia's economic growth has not dramatically decreased the stubbornly high poverty rate.

TRANSNATIONAL ISSUES

Disputes—international: in 2004, Zimbabwe dropped objections to plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river
Refugees and internally displaced persons:
refugees (country of origin): 23,500 (Angola); 5,559 (Rwanda) (2011); 9,835 (Democratic Republic of the Congo) (2012)
Illicit drugs: transshipment point for moderate amounts of methaqualone, small amounts of heroin, and cocaine bound for southern Africa and possibly Europe; a poorly developed financial infrastructure coupled with a government commitment to combating money laundering make it an unattractive venue for money launderers; major consumer of cannabis

ZIMBABWE

INTRODUCTION

Background: The UK annexed Southern Rhodesia from the [British] South Africa Company in 1923. A 1961 constitution was formulated that favored whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded more complete voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign, which began in 2000, caused an exodus of white farmers,

crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection. In April 2005, the capital city of Harare embarked on Operation Restore Order, ostensibly an urban rationalization program, which resulted in the destruction of the homes or businesses of 700,000 mostly poor supporters of the opposition. President MUGABE in June 2007 instituted price controls on all basic commodities causing panic buying and leaving store shelves empty for months. General elections held in March 2008 contained irregularities but still amounted to a censure of the ZANU-PF-led government with the opposition winning a majority of seats in parliament. MDC opposition leader Morgan TSVANGIRAI won the most votes in the presidential polls, but not enough to win outright. In the lead up to a run-off election in late June 2008, considerable violence enacted against opposition party members led to the withdrawal of TSVANGIRAI from the ballot. Extensive evidence of violence and intimidation resulted in international condemnation of the process. Difficult negotiations over a power-sharing government, in which MUGABE remained president and TSVANGIRAI became prime minister, were finally settled in February 2009, although the leaders failed to agree upon many key outstanding governmental issues. MUGABE since 2010 has called for early elections—his term does not expire until June 2013—but no election has been held.

ECONOMY

Economy—overview: Zimbabwe's economy is growing despite continuing political uncertainty. Following a decade of contraction from 1998 to 2008, Zimbabwe's economy recorded real growth of more than 9% per year in 2010-11, before slowing to 5% in 2012, due in part to a poor harvest and low diamond revenues. How ever, the government of Zimbabwe still faces a number of difficult economic problems, including infrastructure and regulatory deficiencies, ongoing indigenization pressure, policy uncertainty, a large external debt burden, and insufficient formal employment. Zimbabwe's 1998-2002 involvement in the war in the Democratic Republic of the Congo drained hundreds of millions of dollars from the economy. The government's subsequent land reform program, characterized by chaos and violence, badly damaged the commercial farming sector, the traditional source of exports and foreign exchange and the provider of 400,000 jobs, turning Zimbabwe into a net importer of food products. Until early 2009, the Reserve Bank of Zimbabwe routinely printed money to fund the budget deficit, causing hyperinflation. Dollarization in early 2009—which allowed currencies such as the Botswana pula, the South Africa rand, and the US dollar to be used locally—ended hyperinflation and reduced inflation to about 10%, but exposed structural weaknesses that continue to inhibit broad-based growth.

TRANSNATIONAL ISSUES

Disputes—international: Namibia has supported, and in 2004 Zimbabwe dropped objections

to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river; South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration

Refugees and internally displaced persons: *IDPs:* undetermined (political violence, human rights violations, land reform, and economic collapse) (2012)

Trafficking in persons: *current situation:* Zimbabwe is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; some victims of forced prostitution are subsequently transported across the border to South Africa where they suffer continued

exploitation; Zimbabwean men, women, and children are subjected to forced labor in agriculture and domestic service in rural areas, as well as domestic servitude and sex trafficking in cities and towns; children are also utilized in the commission of illegal activities, including gambling and drug smuggling

tier rating: Tier 3—the Government of Zimbabwe does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government did not report investigations, prosecutions, or convictions of trafficking cases and continued to rely on an international organization to provide law enforcement training, coordinate victim care and repatriation, and to lead prevention efforts (2009)

Illicit drugs: transit point for cannabis and South Asian heroin, mandrax, and methamphetamines en route to South Africa

Antarctic—Environmental Protocol

see Protocol on Environmental Protection to the Antarctic Treaty

Antarctic Treaty

opened for signature—1 December 1959

entered into force—23 June 1961

objective—to ensure that Antarctica is used for peaceful purposes only (such as international cooperation in scientific research); to defer the question of territorial claims asserted by some nations and not recognized by others; to provide an international forum for management of the region; applies to land and ice shelves south of 60 degrees south latitude

parties—(46) Argentina, Australia, Austria, Belarus, Belgium, Brazil, Bulgaria, Canada, Chile, China, Colombia, Cuba, Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Germany, Greece, Guatemala, Hungary, India, Italy, Japan, North Korea, South Korea, Netherlands, NZ, Norway, Papua New Guinea, Peru, Poland, Romania, Russia, Slovakia, South Africa, Spain, Sweden, Switzerland, Turkey, Ukraine, UK, US, Uruguay, Venezuela

Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal

note—abbreviated as Hazardous Wastes

opened for signature—22 March 1989

entered into force—5 May 1992

objective—to reduce transboundary movements of wastes subject to the Convention to a minimum consistent with the environmentally sound and efficient management of such wastes; to minimize the amount and toxicity of wastes generated and ensure their environmentally sound management as closely as possible to the source of generation; and to assist LDCs in environmentally sound management of the hazardous and other wastes they generate

parties—(172) Albania, Algeria, Andorra, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, The Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burundi, Cambodia, Cameroon, Canada, Cape Verde, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Cook Islands, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, EU, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Guatemala, Guinea, Guinea-Bissau, Guyana, Honduras, Hungary, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kiribati, North Korea, South Korea, Kuwait, Kyrgyzstan, Latvia, Lebanon, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Federated States of Micronesia, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, Netherlands, NZ, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Samoa, Saudi Arabia, Senegal, Serbia, Seychelles, Singapore, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Sudan, Swaziland, Sweden, Switzerland, Syria, Tanzania, Thailand, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Uganda, Ukraine, UAE, UK, Uruguay, Uzbekistan, Venezuela, Vietnam, Yemen, Zambia

Convention on the Conservation of Antarctic Marine Living Resources

note—abbreviated as Antarctic-Marine Living Resources

opened for signature—5 May 1980

entered into force—7 April 1982

objective—to safeguard the environment and protect the integrity of the ecosystem of the seas surrounding Antarctica, and to conserve Antarctic marine living resources

parties—(31) Argentina, Australia, Belgium, Brazil, Bulgaria, Canada, Chile, EU, Finland, France, Germany, Greece, India, Italy, Japan, South Korea, Mauritius, Namibia, Netherlands, NZ, Norway, Peru, Poland, Russia, South Africa, Spain, Sweden, Ukraine, UK, US, Uruguay, Vanuatu

Convention on the International Trade in Endangered Species of Wild Flora and Fauna (CITES)

note—abbreviated as Endangered Species

opened for signature—3 March 1973

entered into force—1 July 1975

objective—to protect certain endangered species from overexploitation by means of a system of import/export permits

parties—(170) Afghanistan, Albania, Algeria, Antigua and Barbuda, Argentina, Australia, Austria, Azerbaijan, The Bahamas, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Canada, Cape Verde, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Honduras, Hungary, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, South Korea, Kuwait, Laos, Latvia, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Mali, Malta, Mauritania, Mauritius, Mexico, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nepal, Netherlands, NZ, Nicaragua, Niger, Nigeria, Norway, Palau, Pakistan, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Samoa, San Marino, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, Somalia, South Africa, Spain, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Syria, Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia, Turkey, Uganda, Ukraine, UAE, UK, US, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zambia, Zimbabwe

Convention on the Prevention of Marine Pollution by Dumping Wastes and Other Matter (London Convention)

note—abbreviated as Marine Dumping

opened for signature—29 December 1972

entered into force—30 August 1975

objective—to control pollution of the sea by dumping and to encourage regional agreements supplementary to the Convention; the London Convention came into force in 1996

parties—(88) Afghanistan, Angola, Antigua and Barbuda, Argentina, Australia, Azerbaijan, Barbados, Belarus, Belgium, Bolivia, Brazil, Bulgaria, Canada, Cape Verde, Chile, China, Democratic Republic of the Congo, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Denmark, Dominican Republic, Egypt, Equatorial Guinea, Finland, France, Gabon, Germany, Greece, Guatemala, Haiti, Honduras, Hong Kong (associate member), Hungary, Iceland, Iran, Ireland, Italy, Jamaica, Japan, Jordan, Kenya, Kiribati, South Korea, Libya, Luxembourg, Malta, Mexico, Monaco, Montenegro, Morocco, Nauru, Netherlands, NZ, Nigeria, Norway, Oman, Pakistan, Panama, Papua New Guinea, Peru, Philippines, Poland, Portugal, Russia, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Saudi Arabia, Serbia, Seychelles, Slovenia, Solomon Islands, South Africa, Spain, Suriname, Sweden, Switzerland, Tonga, Trinidad and Tobago, Tunisia, Ukraine, UAE, UK, US, Vanuatu

associate members to the London Convention—(2) Faroe Islands, Macau

countries that have signed, but not yet ratified—(3) Chad, Kuwait, Uruguay

Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques

note—abbreviated as Environmental Modification

opened for signature—10 December 1976

entered into force—5 October 1978

objective—to prohibit the military or other hostile use of environmental modification techniques in order to further world peace and trust among nations

parties—(73) Afghanistan, Algeria, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Bangladesh, Belarus, Belgium, Benin, Brazil, Bulgaria, Canada, Cape Verde, Chile, China, Costa Rica, Cuba, Cyprus, Czech Republic, Denmark, Dominica, Egypt, Finland, Germany, Ghana, Greece, Guatemala, Hungary, India, Ireland, Italy, Japan, Kazakhstan, North Korea, South Korea, Kuwait, Laos, Lithuania, Malawi, Mauritius, Mongolia, Netherlands, NZ, Nicaragua, Niger, Norway, Pakistan, Panama, Papua New Guinea, Poland, Romania, Russia, Saint Lucia, Saint Vincent and the Grenadines, Sao Tome and Principe, Slovakia, Slovenia, Solomon Islands, Spain, Sri Lanka, Sweden, Switzerland, Tajikistan, Tunisia, Ukraine, UK, US, Uruguay, Uzbekistan, Vietnam, Yemen

International Convention for the Regulation of Whaling

note—abbreviated as Whaling

opened for signature—2 December 1946

entered into force—10 November 1948

objective—to protect all species of whales from overhunting; to establish a system of international regulation for the whale fisheries to ensure proper conservation and development of whale stocks; and to safeguard for future generations the great natural resources represented by whale stocks

parties—(84) Antigua and Barbuda, Argentina, Australia, Austria, Belgium, Belize, Benin, Brazil, Cambodia, Cameroon, Chile, China, Republic of the Congo, Costa Rica, Cote D'Ivoire, Croatia, Cyprus, Czech Republic, Denmark, Dominica, Ecuador, Eritrea, Estonia, Finland, France, Gabon, The Gambia, Germany, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Hungary, Iceland, India, Ireland, Israel, Italy, Japan, Kenya, Kiribati, South Korea, Laos, Lithuania, Luxembourg, Mali, Marshall Islands, Mauritania, Mexico, Monaco, Mongolia, Morocco, Nauru, Netherlands, NZ, Nicaragua, Norway, Oman, Palau, Panama, Peru, Portugal, Romania, Russia, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, San Marino, Senegal, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Suriname, Sweden, Switzerland, Tanzania, Togo, Tuvalu, UK, US, Uruguay

International Tropical Timber Agreement, 1983

note—abbreviated as Tropical Timber 83

opened for signature—18 November 1983

entered into force—1 April 1985; this agreement expired when the International Tropical Timber Agreement, 1994, went into force

objective—to provide an effective framework for cooperation between tropical timber producers and consumers and to encourage the development of national policies aimed at sustainable utilization and conservation of tropical forests and their genetic resources

parties—(59) Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Cameroon, Canada, Central African Republic, China, Colombia, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Denmark, Ecuador, Egypt, EU, Fiji, Finland, France, Gabon, Germany, Ghana, Greece, Guatemala, Guyana, Honduras, India, Indonesia, Ireland, Italy, Japan, South Korea, Liberia, Luxembourg, Malaysia, Mexico, Nepal, Netherlands, NZ, Nigeria, Norway, Panama, Papua New Guinea, Peru, Philippines, Portugal, Russia, Spain, Suriname, Sweden, Switzerland, Thailand, Togo, Trinidad and Tobago, UK, US, Vanuatu, Venezuela

International Tropical Timber Agreement, 1994

note—abbreviated as Tropical Timber 94

opened for signature—26 January 1994

entered into force—1 January 1997

objective—to ensure that by the year 2000 exports of tropical timber originate from sustainably managed sources; to establish a fund to assist tropical timber producers in obtaining the resources necessary to reach this objective

parties—(61) Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Cameroon, Canada, Central African Republic, China, Colombia, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Denmark, Ecuador, Egypt, EU, Fiji, Finland, France, Gabon, Germany, Ghana, Greece, Guatemala, Guyana, Honduras, India, Indonesia, Ireland, Italy, Japan, South Korea, Liberia, Luxembourg, Malaysia, Mexico, Nepal, Netherlands, NZ, Nigeria, Norway, Panama, Papua New Guinea, Peru, Philippines, Poland, Portugal, Spain, Suriname, Sweden, Switzerland, Thailand, Togo, Trinidad and Tobago, UK, US, Vanuatu, Venezuela

Kyoto Protocol to the United Nations Framework Convention on Climate Change

note—abbreviated as Climate Change-Kyoto Protocol

opened for signature—16 March 1998

entered into force—23 February 2005

objective—to further reduce greenhouse gas emissions by enhancing the national programs of developed countries aimed at this goal and by establishing percentage reduction targets for the developed countries

parties—(184) Albania, Algeria, Angola, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, The Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Bulgaria, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Cape Verde, Central African Republic, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Cook Island, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, EU, Fiji, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kenya, Kiribati, North Korea, South Korea, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Federated States of Micronesia, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, Netherlands, NZ, Nicaragua, Niger, Nigeria, Niue, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Samoa, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Syria, Tajikistan, Tanzania, Thailand, Timor-Leste, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkmenistan, Tuvalu, Uganda, Ukraine, UAE, UK, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zambia

note—abbreviated as Ship Pollution

opened for signature—17 February 1978

entered into force—2 October 1983

objective—to preserve the marine environment through the complete elimination of pollution by oil and other harmful substances and the minimization of accidental discharge of such substances

parties—(139) Algeria, Angola, Antigua and Barbuda, Argentina, Australia, Austria, Azerbaijan, The Bahamas, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bolivia, Brazil, Brunei, Bulgaria, Burma, Cambodia, Canada, Cape Verde, Chile, China, Colombia, Comoros, Republic of Congo, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, Equatorial Guinea, Estonia, Faroe Islands, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Guatemala, Guinea, Guyana, Honduras, Hong Kong, Hungary, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Jamaica, Japan, Kazakhstan, Kenya, North Korea, South Korea, Latvia, Lebanon, Liberia, Lithuania, Luxembourg, Libya, Macau, Madagascar, Malawi, Malaysia, Maldives, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Netherlands, NZ, Nicaragua, Nigeria, Norway, Oman, Pakistan, Panama, Papua New Guinea, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Samoa, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Syria, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Tuvalu, Ukraine, UK, US, Uruguay, Vanuatu, Venezuela, Vietnam

Protocol on Environmental Protection to the Antarctic Treaty

note—abbreviated as Antarctic-Environmental Protocol

opened for signature—4 October 1991

entered into force—14 January 1998

objective—to provide for comprehensive protection of the Antarctic environment and dependent and associated ecosystems; applies to the area covered by the Antarctic Treaty

consultative parties—(31) Argentina, Australia, Belgium, Brazil, Bulgaria, Canada, Chile, China, Czech Republic, Ecuador, Finland, France, Germany, India, Italy, Japan, South Korea, Netherlands, NZ, Norway, Peru, Poland, Romania, Russia, South Africa, Spain, Sweden, Ukraine, UK, US, Uruguay

CROSS-REFERENCE LIST OF COUNTRY DATA CODES

GEOPOLITICAL ENTITIES and CODES (formerly FIPS PUB 10-4): Geopolitical Entities, Names, and Codes (GENC) Standard, the US Government's implementation of ISO 3166, has been designated as thereplacement standard for FIPS PUB 10-4. The GENC Standard will provide a list of the basic geopolitical entities in the world, together with the principal divisions that comprise each entity. The names of the political entities are derived from official meeting records of the Foreign Names Committee of the US Board on Geographic Names (US BGN). The National Geospatial-Intelligence Agency (NGA), is the maintenance authority for the GENC Standard.

ISO 3166: Codes for the Representation of Names of Countries (ISO 3166) is prepared by the International Organization for Standardization. ISO 3166 includes two- and three-character alphabetic codes and three-digit numeric codes that may be needed for activities involving exchange of data with international organizations that have adopted that standard. Except for the numeric codes, ISO 3166 codes have been adopted in the US as FIPS 104-1: American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange.

STANAG 1059: Letter Codes for Geographical Entities (8th edition, 2004) is a Standardization Agreement (STANAG) established and maintained by the North Atlantic Treaty Organization (NATO/OTAN) for the purpose of providing a common set of geo-spatial identifiers for countries, territories, and possessions. The 8th edition established trigraph codes for each country based upon the ISO 3166-1 alpha-3 character sets. These codes are used throughout NATO.

Internet: The Internet country code is the two-letter digraph maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

CROSS-REFERENCE LIST OF HYDROGRAPHIC DATA CODES

IHO 23-4th: *Limits of Oceans and Seas*, Special Publication 23, Draft 4th Edition 1986, published by the International Hydrographic Bureau of the International Hydrographic Organization.

IHO 23-3rd: *Limits of Oceans and Seas*, Special Publication 23, 3rd Edition 1953, published by the International Hydrographic Organization.

ACIC M 49-1: *Chart of Limits of Seas and Oceans*, revised January 1958, published by the Aeronautical Chart and Information Center (ACIC), United States Air Force.

DIAM 65-18: *Geopolitical Data Elements and Related Features*, Data Standard No. 4, Defense Intelligence Agency Manual 65-18, December 1994, published by the Defense Intelligence Agency. The US Government has not yet adopted a standard for hydrographic codes similar to the Federal Information Processing Standards (FIPS) 10-4 country codes. The names and limits of the following oceans and seas are not always directly comparable because of differences in the customers, needs, and requirements of the individual organizations. Even the number of principal water bodies varies from organization to organization. *Facebook* users, for example, find the Atlantic Ocean and Pacific Ocean entries useful, but none of the following standards include those oceans in their entirety. Nor is there any provision for combining codes or overcodes to aggregate water bodies. The recently delimited Southern Ocean is not included.

WEIGHTS AND MEASURES

Note: At this time, only three countries—Burma, Liberia, and the US—have not adopted the International System of Units (SI, or metric system) as their official system of weights and measures. Although use of the metric system has been sanctioned by law in the US since 1866, it has been slow in displacing the American adaptation of the British Imperial System known as the US Customary System. The US is the only industrialized nation that does not mainly use the metric system in its commercial and standards activities, but there is increasing acceptance in science, medicine, government, and many sectors of industry.

THE COUNTRY-BY-COUNTRY GUIDE TO THE WORLD

PRODUCT OF SEVENTY YEARS OF CIA INTELLIGENCE

From Afghanistan to Zimbabwe, *The CIA World Factbook 2014* offers complete and up-to-date information on the world's nations. This comprehensive guide is packed with detailed information on the politics, populations, military expenditures, and economics of 2014.

For each country, *The CIA World Factbook 2014* includes:

- Detailed maps with new geopolitical data
- Statistics on the population of each country, with details on literacy rates, HIV prevalence, and age structure
- New data on military expenditures and capabilities
- Information on each country's climate and natural hazards
- Details on prominent political parties, and contact information for diplomatic consultation
- Facts on transportation and communication infrastructure
- And much more!

Also included are appendixes with useful abbreviations, international environmental agreements, international organizations and groups, weight and measure conversions, and more. Originally intended for use by government officials, this is a must-have resource for students, travelers, journalists, and businesspeople with a desire to know more about their world.

The **Central Intelligence Agency** is an independent agency responsible for providing national security intelligence to senior US policymakers. The CIA is separated into four basic components: the National Clandestine Service, the Directorate of Intelligence, the Directorate of Science & Technology, and the Directorate of Support. They carry out "the intelligence cycle," the process of collecting, analyzing, and disseminating intelligence information.
